"Structural Weakness"

## TRIUMPHANT FRANCE [New York Times.]

Our entire war finance was a tri-mph, and the Victory Loan crowns tion of these Yet in respect of an early realiza ictory Loan crowns tion of these sound aims, Senator It will be a week Penrose and all of us may be doomed the achievement.

gitimate business.

the achievement. It will be a week or two before all the duplications are corrected and the precise figures are known, but it is sure that the Fifth Loan, like all before it, was over-subscribed. The Treasury asked the people altogether for \$18,500,000,000, and there was offered "above and beyond the line of duty" something more than the largest single loan in addition to the requisitions. As a result, the United States alone among the belligerents has all its war loans funded before the war is ended. Moreover, our currency is the only tors which is in normal condition.

Colonel L. V. Rausch, who has been in the service since the begin-ning of the war and who is located at Camp Shelby, Mississippi, for some months, but who is now on special duty at Washington, writing to the circulation department of the Telegraph, directing a change of address says: "The Telegraph has been the source of a great deal of informa-tion about the homefolks and doings, the receipt of which lightens the burdens of camp life very much. I have found correspondence during busy weeks laborious and entirely unsatisfactory on account of delays, but to have the home paper arrive daily was a satisfaction, the extent of which cannot be described. If any one has any complaints to make about the Harrisburg Telegraph, I should say that an absence from home for a month or more during which time they receive the paper by mail would change their opinion entirely."

Subject and be constructed and more than the basic field of the subject and the professor of the subject. And it looked and subject. More many the construction of the treat were normalities of the subject. And it looked and the motel son had been stratuted to the professor of the subject.
