The questions answered below are general in character; the symptoms of diseases are given and the answers should apply to any case of similar nature.

"Mrs. W. W." writes: "Can I take off 40 pounds of fat? I weigh 180 pounds; too much for my height."

"Anna R." writes: "I have taken medicine from several doctors for liver and kidney trouble and constipation, but it does not seem to help me at all. My skin is sallow. I have constant headaches and dizzy spells. What shall I do?"

"Mrs. P. G." writes: "I hesitate to ask advice as my case is so unusual. In a word, I am tired and worn out all the time. I have been married over a year and formerly did not know what it was to tire or nervous. Sometimes I feel hysterical. I fear I will become a nuisance to my husband if this continues."

"Lee" writes: "I have tried so many remedies for rheumatism that I am almost afraid to try any more, but if you can tell me a sure remedy I will try it."
