NEW SYSTEM FOR PA. SILK MILLS

THURSDAY EVENING,

B. E. David to Extend His Plan For Improving Management

turers and union labor leaders all over the United States are said to be watching with interest and sympathy the experiment in industrial democracy which is now being conducted in five cities—Fort Wayne, Ind., Shelton, Conn., Cleveland, O., Paterson, N. J., and Brooklyn, N. Y., and which it is believed by some of them, will scotch if it does not prevent Bolshevism in industrial

enters where it is put into effect.

The originator of the plan, John Leitch, an efficiensy engineer, started it among 300 employes of a Fort Wayne piano factory. Its basis was the Constitution of the United States. The factory was adminis-tered by a Senate, a House of Representatives and a cabinet corresponding to the aids and advisors of the President. Its success is said to have been immediate and perma-nent. Yale University, the National Council of Defense and the Na-tional Association of Manufacturers are said to be a few of the bodies that are investigating the merits of

are said to be a few of the bodies that are investigating the merits of the plan.

B. Edmund David, head of a silk manufacturing corporation in Paterson, N. J., who was instrumental in introducing the system in his factory in that city about a year ago, expressed to-day the keenest satisfaction at the results attained and said he hoped, ultimately, to establish similar working conditions in four other of his mills in York, Reading, Scranton and Beavertown, Pa. The Paterson manufacturer, however, said the new system should not be considered a "panacea" or adaptable to all kinds and sizes of industrial establishments. "Its outstanding feature," said Mr. David, "is the ungrudging recognition, on the part of the employer, of the worker's right to a voice in the determination of matters which are of vital interest to him, which lends the additional dignity to his position which self-government invariable carries with t."

"Industrial democracy or constitutionalism in industry," he said, "was first explained to the workers. A broad and fundamental set of rules adopted which was to guide management and workers. The four cornerstones of this business edifice were justice, co-operation, economy and emergency. Its capstone was service. This policy, as the supreme law of the establishment, has never failed to suggest a solution when troublesome questions arise."

In proof of the system's practicability Mr. David pointed out that last winter, when almost every other silk mill in Paterson, was closed as the result of a strike, the David mill was not affected but maintained full production and kas kept in continuous operation as by members of one contented and harmonious family.

They Think the Old Penn-Harris Steam Shovel Has Come to the Surface, Maybe, Along the River Front

No sooner had the Telegraph appeared on the streets last evening with the announcement that a big steam shovel had been placed on the lot at Front and Boas street. We real strawberries," a member of members were already on the lot at Evening before dusk a number of members were already on the lot at evening before dusk a number of members were already on the lot at evening before dusk a number of members were already on the lot in the shovel and immediately began a minute inspection. "Yes the same one III bet is to it." Intertainty looks like it," Newforce we tell the other people, because them there contractors in the park opposite the Penn-Harris cellar. Nobody else did either. That there steam shovel just dug a big hole the whole way from that there hotel to this place and came up to the surface. That's all there is to it."

An argument that almost ended in the disorganization of the order contractors followed, and the debate was confollowed, and the debate was confollowed.

mund James, of Camp Hill, another department officials about removing noted member, declared. "We didn't some of the benches to a concer
