Experiments on humans and animals by many scientists have demonstrated beyond question of doubt that a body deficient in phosphorous becomes nervous, sickly and thin. Beer is getting harder and harder to get and unheard of prices are being asked by some wholesalers who are fortunate enough to have a supply. The retail price of a barrel of two and three-fourths per cent alcoholic content beer, sells at \$19, while \$3 is asked for a case of two dozen twelve ounce bottles of beer. Retail price of beer is now ten cents for six ounces in most places and 30 cents a bottle will be asked at the besinning of next week.

Hotelmen say they do not fear much about the future, as they are filled up with transient boarders lightly, and that an inevitable increase in rates after liquor selling is stopped will enable the larger places to remain in business at astisfactory profit.
