

Mangin Prohibits Strikes Against the Rhenish Republic

Berlin, June 6.—A proclamation by General Mangin, commander of the French army of occupation at Mayence, forbidding strikes against

the Rhenish republic and threatening leaders of any such movements with expulsion, is published in the Frankfurt Gazette. "The Rhenishers have been discussing the interests of their fatherland for the last six months without disturbing public order," the proclamation says, "but now the German government threatens them with imprisonment. They have created a

republic within the German empire and have sought the right of election, in which they will have complete freedom. There is nothing in their procedure which might occasion protests or strikes, which disturb order and economic life."

The French have a propaganda fund amounting to 10,000,000 francs with which to further the movement for the Rhenish republic, declares the Karlsruhe correspondent of the Lokal Anzeiger. This sum, he says, is being used principally in the Rhineland and Palatinate and it is being partly distributed to those favoring an independent republic at Landau, Mayence, Cologne and Wiesbaden, who without doubt, he adds, "have been bribed."

Germans Left Big Stocks of Wood Behind in Belgium

Washington, June 6.—The discovery that the Germans abandoned considerable stocks of wood in their hasty retreat from Belgium, has made valuable the estimate of the present lumber needs of that country and a new estimate is now being

made. A report of after-war conditions has just been issued by the Comité Central Industriel de Belgique, the unofficial organization of the Belgian government, which was charged with the collection of information regarding the destruction of property in Belgium by actual warfare or with the deliberate intention of crippling the country's industries.

Except for the loss of numerous wood-working machines, the lumber and furniture manufacturing situation in Belgium is not so bad as is that in the steel, metal-working, chemical and some other industries. A serious consequence of the war is, however, the loss of stocks of dried and seasoned lumber, the replacing of which in equivalent quantities will require considerable time.
