Viola Dana will be shown in "The Parisian Tigress."

Enormous crowds attended the Victoria Theater yesterday to see the picture of the military expedition.

This picture shows the Bolsheviki system of government under a real test. A millionaire wishing to know how the "Red" government would apply to the United States finances an experimental colony where the law of free love rules.

The university soon must close, for its students are going home to America to be demobilized. Yet what it has done and still is doing at this writing will perhaps serve as a guide to the development of an Army educational system yet to be worked out in America.

More than 8,000 American soldiers have since March 15 been obtaining a higher education in this university as a gift from Uncle Sam.

The institution was composed of thirteen colleges with 534 instructors and offered 302 courses of study, any of which the soldiers might elect to pursue.

The directors of these thirteen colleges were distinguished educators in America and the grade of instruction given at Beauce was regarded as equivalent to university work in America.

The feature of the exercises yesterday was the pageant "where the years divide."

The honor roll of the senior class was announced yesterday. It included: Elsie Van Dyck Dewitt, New London, Conn.; Rachel Gibson Franklin, Philadelphia; Margaret Emma Kretschner, Demarest, N. J.; and Louise Elizabeth Catherine Stuorm, Philadelphia.

Rescind Orders For Strike of Telephone Workers Over Nation
Springfield, Ill., June 10. - "Orders issued a week ago, calling for a national strike of telephone workers, have been rescinded," Charles P. Ford, international secretary of the International Brotherhood of Electrical Workers, said.

Makes Successful Trial Flight For Transatlantic Prize
St. Johns, N. F., June 10. - The Vickers-Vimy entry in the London Daily Mail's \$50,000 transatlantic flight contest made a trial flight here yesterday. The machine, piloted by Captain "Jack" Alcock, took the air at 5.47 p. m. local time and descended forty minutes later, after a highly successful test.

FORMER KAISER TRACES DESCENT TO FRENCH ADMIRAL
Berlin - The former German kaiser is of French blood and French descent, descended, indeed, from one of the most famous and noble figures in the annals of France.

A daughter of Gaspare de Coligny, admiral of France and the incomparable leader of the Huguenots, who was murdered among his compatriots in the massacre of St. Bartholomew's day, so the annals run, in 1533, married William of Nassau-Dillenburg.

Such is the descent of the queen from Admiral Coligny, in the ninth generation.

Frederick I of Prussia, was succeeded by his own son, Frederick II, called the Great, who in turn was succeeded by his nephew, Frederick William II, who again was succeeded by Frederick William III.

The son of the Great Elector, Frederick I, king of Prussia, married the Princess Sophia Charlotte, who bore him eleven children, among whom was a Princess Wilhelmina, who was the great-great-grandmother of the present Queen Wilhelmina of the Netherlands.

The former kaiser is, therefore, descended directly from the great French admiral, in the tenth generation.

SEAGOING RAFT HAS CREW OF SEVEN MEN
London - While log rafts are by no means new, the huge raft recently constructed at Haparanda, Sweden, and used to ship a large number of logs to Copenhagen, Denmark, is worthy of passing mention.

The raft took six months to build and contains as much wood as four big steamers. It is held together by an ingenious system of steel cables and is capable of carrying...

13 COLLEGES FOR SOLDIERS

Experiment at Beauce, France, Proves to Be a Big Success.

Correspondence of The Associated Press
Beauce, France, June 10. - The possibility of making the United States Army a great educational medium for all America has been demonstrated by the American Expeditionary Force University here.

The university soon must close, for its students are going home to America to be demobilized. Yet what it has done and still is doing at this writing will perhaps serve as a guide to the development of an Army educational system yet to be worked out in America.

More than 8,000 American soldiers have since March 15 been obtaining a higher education in this university as a gift from Uncle Sam.

The institution was composed of thirteen colleges with 534 instructors and offered 302 courses of study, any of which the soldiers might elect to pursue.

Class Day Is Held at Vassar College

Poughkeepsie, N. Y., June 10. - With the revival of the Daisy Chain, of former years, class day exercises of Vassar College took on the appearance of former years.

The feature of the exercises yesterday was the pageant "where the years divide."

The honor roll of the senior class was announced yesterday. It included: Elsie Van Dyck Dewitt, New London, Conn.; Rachel Gibson Franklin, Philadelphia; Margaret Emma Kretschner, Demarest, N. J.; and Louise Elizabeth Catherine Stuorm, Philadelphia.

Justice Brandeis to Go to Palestine for Summer

Washington, June 10. - Justice Brandeis will leave to-day for New York to sail for Palestine to be gone most of the summer. The trip, he said, is for a vacation and is not of an official character.

"DON'TS" ISSUED TO AVOID FIRES

Washington, June 10. - Now is the time to stop the forest fires by not having any, says an announcement from the American Forestry Association. The fire in Minnesota, last year is still fresh in the public mind and when it is estimated that the fire loss in 1918 was \$28,500,000 and that 8,400,000 acres were burned, every precaution should be taken by summer campers, says the association.

Don't throw your match away until you are sure it is out. Don't drop cigarettes or cigar butts until the glow is extinguished.

Don't leave a fire until you are sure it is out. Don't smother it with earth or water. Don't burn brush or refuse in or near the woods if there is any chance for a camp fire any larger than is absolutely necessary.

SOLDIER CREATES EVENING GOWN

Coblenz, June 10. - Probably the only Y. M. C. A. entertainer in Germany in possession of an evening gown which is the creation of a doughboy is Miss Paula Lind Ayers, formerly a concert singer in New York City.

Her trunk was lost on one of her trips, and she found herself on the opening night of a big "Y" theater with only a uniform to wear. A sergeant who had been a clerk in one of the big shops in New York offered to cut and make her gown. He had never made gowns, he explained, but he had seen it done, and it looked easy to him.

A committee of doughboys accompanied Miss Ayers on her shopping tour in the village, and voted for some rather violently rose-tinted material as their choice for the frock. Within three hours the sergeant had the dress made, and that night boys hung from the rafters of the new theater to hear Miss Ayers sing and to see her gown, the fame of which had spread through the division.

"I never in my life had a dress that I liked better," Miss Ayers declares.

PHYSICIAN IS SUED ON NEGLIGENCE CHARGE
San Francisco - Charging Dr. S. Anson Hill with negligence which resulted in the death of her 20-year-old son, Thaxter E. Clark, Mrs. Theresa Raynor, living at 234 Fourteenth street, filed a suit in the superior court against the physician for \$25,000 damages.

A Clean Scalp

Parisian Sage Quickly Stops All Itching and Prevents Dandruff
Almost everybody nowadays knows that Parisian sage, the invigorating hair restorer, is guaranteed to remove every trace of dandruff, stop falling hair and itching scalp, or the cost, small as it is, will be refunded.

But you should know more about this marvelous hair grower. You ought to know that it immediately destroys all odors that are bound to come from the excretions of the scalp, and in five minutes after an application, your head will feel cool and comfortable.

Everyone should have a bottle of Parisian sage handy because it is such a pleasant and exhilarating hair treatment. Ladies use it because they know it is delicately perfumed, not sticky or greasy, and surely does make the hair beautiful, silky and abundant. Here what a New York woman writes: "I have used Parisian sage two weeks only, yet in that time my hair has wonderfully increased in beauty, thickness and luxuriance, but what surprised me most was the disappearance of all dandruff."

A large bottle of Parisian sage can be obtained from Kennedy's or at any good drug or toilet counter - it's not expensive.

The Plague of Carbon and Its Cure

No device ever put on the market has so conclusively demonstrated its usefulness to the motorist as the ESTA WATER AUXILIATOR
Carbon delays on the road and in the workshop are entirely eliminated by its use. To say nothing of the increased efficiency obtained from the motor and the saving of fuel and annoyances. The principle is as old as the hills, but no master mind has, previous to this time, been able to put into practice an efficient article. Many makeshifts have been discarded, many more will appear, but none accomplish the results that the ESTA WATER AUXILIATOR will.

The ESTA WATER AUXILIATOR was not offered to the public until it had been thoroughly tested by the national authorities on motor devices - The Automobile Club of America and the Pratt Institute of Brooklyn. There are a series of chemical compounds of hydrogen and carbon differing from one another only in the proportions in which these two elements are present.

The internal combustion engine depends for its lubrication upon the heavy members of this same series.

When a hydrocarbon is burned, the oxygen of the air first unites with the hydrogen of the hydrocarbon, and the carbon of the hydrocarbon is left isolated and alone.

Thus when the fuel charge is ignited carbon is produced. Thus, while the lubricating oil is heated to the burning point, carbon is produced.

It is needless to dwell on the symptoms of a carbonized motor - loss of power, irregular running, knocking on high speed, increased explosions in mufflers by back-firing, pre-ignition, greatly increased gasoline consumption are some of them. To remedy this costs money and may have been previously deposited. Thus the ESTA WATER AUXILIATOR keeps the motor clean and working at its highest efficiency at all times.

The Plague of Carbon and Its Cure

No device ever put on the market has so conclusively demonstrated its usefulness to the motorist as the ESTA WATER AUXILIATOR
Carbon delays on the road and in the workshop are entirely eliminated by its use. To say nothing of the increased efficiency obtained from the motor and the saving of fuel and annoyances. The principle is as old as the hills, but no master mind has, previous to this time, been able to put into practice an efficient article. Many makeshifts have been discarded, many more will appear, but none accomplish the results that the ESTA WATER AUXILIATOR will.

The ESTA WATER AUXILIATOR was not offered to the public until it had been thoroughly tested by the national authorities on motor devices - The Automobile Club of America and the Pratt Institute of Brooklyn. There are a series of chemical compounds of hydrogen and carbon differing from one another only in the proportions in which these two elements are present.

The internal combustion engine depends for its lubrication upon the heavy members of this same series.

When a hydrocarbon is burned, the oxygen of the air first unites with the hydrogen of the hydrocarbon, and the carbon of the hydrocarbon is left isolated and alone.

Thus when the fuel charge is ignited carbon is produced. Thus, while the lubricating oil is heated to the burning point, carbon is produced.

It is needless to dwell on the symptoms of a carbonized motor - loss of power, irregular running, knocking on high speed, increased explosions in mufflers by back-firing, pre-ignition, greatly increased gasoline consumption are some of them. To remedy this costs money and may have been previously deposited. Thus the ESTA WATER AUXILIATOR keeps the motor clean and working at its highest efficiency at all times.

The Cure

But suppose that you were able to introduce directly into the cylinder an additional charge of pure oxygen. This would do the trick! Practically, this is inexpedient, but if to the air that is taken in through the carburetor we add a heavy percentage of moisture - water vapor - the large amount of air that it would take to weigh an amount equal to even one drop of water, you can commence to appreciate the truth of the statement that there is more oxygen contained in a drop of water than there is in many cubic inches of air.

Naturally, therefore, the inventor turned his mind to perfect a device to introduce oxygen into the cylinders by means of water. This is exactly what the ESTA WATER AUXILIATOR does. It is a handsome cast-aluminum tank containing water, (so constructed that it will not burst in the coldest weather) through which a constant current of air is passed. The moist air is then carried to the intake manifold and there introduced, with its load of oxygen, into the explosive charge that is entering the cylinders. In the enormous heat of the ensuing explosion, the saturated air is dissociated into oxygen and hydrogen and this added oxygen ensures the absolute combustion of every particle of the explosive charge and also burns off any carbon which may have been previously deposited. Thus the ESTA WATER AUXILIATOR keeps the motor clean and working at its highest efficiency.

Again quite naturally this moisture is only wanted when the motor is exploding. The ESTA WATER AUXILIATOR is a vacuum device so constructed and attached that as soon as the motor stops it ceases to function and a vacuum is created in the device so that the saturated air about to enter the combustion chamber is drawn back into the tank. Thus no ill effects result from the saturated air entering the combustion chamber after the explosion has dried it out, thereby eliminating any chance of rusting the combustion chamber or valves, but as soon as the motor is started again it comes into play and starts functioning immediately.

In certified tests conducted by unprejudiced experts, the ESTA WATER AUXILIATOR registered a substantial decrease in fuel consumption, a big increase in speed and a development of more power. It makes no claims. It sells on facts.

We can't lay before you on paper all the real proof of the claims we make for the ESTA WATER AUXILIATOR - the real proof of any pudding is in the eating.

Immediate Delivery of New Models

The temptation is to be superlative about the beauty and performance of the new Lexington Touring Car.

Unfortunately, if words could describe its fashionable design, color schemes, and accommodations they fail utterly as a substitute for a demonstration of its efficient operation.

In order to fully appreciate the success Lexington has achieved in perfecting the dependable six cylinder type of car, one must take the wheel and observe -

The smooth, silent starting; the quick get-away; the rhythmic flow and ebb of power, highly responsive to your wish; the emergency brake that operates with one-finger; the complete confidence and restfulness one enjoys whether taking a hill on high or inching through traffic.

Lexington owners benefit by a substantial saving in fuel because of the exclusive Moore Multiple Exhaust System which produces more horse power with less fuel.
Let us demonstrate this new Touring Car or other new open and closed models.
