#### CHILD BUREAUS TO BE CONTINUED

Relief Work in Europe Will Not End, Hoover Cables

ment of the continuation of the activity of the American Relief Adninistration in Europe in connection with the work of child feeding after the conclusion of its general relief program on June 30 was announced to-day by Edgar Rickard, joint director of the American Relief Administration, upon cable advices from Mr. Hoover in Paris. The various foreign governments where such work is being carried on have been notified that America will not for the present terminate her support of the children's bu-

It is Mr. Hoover's present plan, according to his cable, for America to maintain representatives in each of the countries where child bureaus are established, with a general director in Europe and a staff in the United States. The American Relief Administration will not intervene locally in the work of the bureaus except as to advice and inspection, but will in all probability devote such funds as it has for disposal to subsidizing national committees in the United States, to assist in carrying on the work.

The children's relief program of the American Relief Administration adopted last April covered Rouma nia, Czecho-Slovakia, Greater Siberia, Poland, Finland, Esthonia, Lithuania and Leattonia. In these countries approximately 600,000 children were supplied with one meal per day for three months unmeal per day for three months un-der the program. The total num-ber of meals for the same period amounted to 51,170,202. Orignially, the sum assigned to child relief work was \$2,000,000, but this has since been raised by funds placed in Mr. Hoover's hands here and abroad by various charitable or-ganizations.

#### School Teachers to Spread Doctrine of Anti-Bolshevism

Anti-Bolshevism

New York, June 20.—As another step in its nation-wide educational propaganda of Americanization to counteract the growing influence in this country of the doctrines of disorganization and destruction, the National Security League announced to-day that it has enlisted the heads of all teachers Normal Schools in 22 states for active work against Bolshevism. This effort of the Security League is based on the idea that the school teachers of the country, while intensely patriotic, are largely unqualified to answer the insidious arguments of present day radicals. The League has found this contention supported by many of the leading educators of the country and is exerting every effort to overcome this condition.

The Normal School heads and teachers whose co-operation has already been secured by the Security League, representing the leading institutions for the training of school teachers in all parts of the country, have promised to create special courses for the instruction of their teachers in sound pro-American arguments against Bolshevism. Starting with the Normal Schools in the 22 states already covered, the Security League hopes to be able to obtain similar action in every state in the Union.
