ROBBERY LOSSES ON PENNSY ARE RATHER COSTLY

Reports Show Emergency Employees Were Rather Loose With Company Property

Losses on the Pennsylvania Railroad through thievery during the past two years were heavy. In a report showing total value of losses east of Pittsburgh the cause is placed on the necessity for employing anybody and everybody to take places of men who went to war.

The most distressing feature of the wholesale crime is the fact that records of arrests show that nearly fifty per cent of the persons arrested were railroad employees.

GARY SEES NO REVOLT DANGER AMONG WORKERS

Tells Trinity Students Wage Earners are on High Plane

Hartford, Conn., June 23.—There is no danger of industrial demoralization, revolution or retrogradation in this country, E. J. Gary, chairman of the Board of Directors of the United States Steel Corporation, told the students of Trinity College today at a commencement address. "Those who claim that large numbers of workmen in this country could be induced to participate in any attempt to override the law or overthrow the government are underrate them," said Mr. Gary. The great majority are opposed and of this majority there are in control the young men and the young women; the pride and security of the Nation.

Perfection Unlikely

"We may not expect perfection in economic enterprise and management. Perhaps that is not so universal, uninterrupted tranquility even in this highly civilized, progressive and prosperous country. The workmen are credited with worthy achievement or charged with lawless and destructive tendencies perhaps in both respects in unjustified measure in most instances. The final attitude of the large majority certainly in the United States, will be right. Their own welfare will be thus promoted. "Many of the wage earners have become property owners, owning the houses in which they reside. Some are holders of interest-bearing securities. The number of this character of investors is increasing. They have as keen a desire to see the institutions of this country protected as those who have greater riches, and they may be relied upon to lend their influence and their votes in favor of the protection of property and person. Opportunity must be given to the workman to increase their pecuniary holdings as far as practicable. To this end, the employers will do their part."
