levotion to the State and National governments which shall be taught in all the public schools of the

State." In every school district required to provide medical inspection for its schools, the secretary of the board or the district superintendent of schools shall on or before September 1 of each year report to the Com-missioner of Health the names of the medical inspectors or the name of the chief medical inspector with the number of assistants or ad-ditional inspectors appointed for the ensuing term.

ditional inspectors appointed for the ensuing term. The Governor has before him the Martin bill broadening the pro-visions of the school code relating to the use of school grounds and build-ings for social, recreation and other proper purposes. His amendment would allow the board of any dis-trict upon the petition of the resi-dents of the district, equal to one-fifth of the number of pupils at-tending the schools, to permit the use of the building and grounds for social and recreational purposes, providing the use would not be of a sectarian character nor under sec-tarian control. Appropriations for these purposes may be made by the boards. The proposed act would be effective at once. Two great administration projects

boards. The proposed act would be effective at once. Two great administration projects which are authorized by this Leg-islature are the erection of a Sol-diers' and Sailors' Memorial bridge at Harrisburg and the construction of an office building in Capitol Park extension and the beautifying of the grounds. The bridge is given an initial apropriation of \$750,000 and \$1,250,000 is set aside for the other improvements. Both measures are in the hands of the Governor. The creation of a State Art Com-mission is one of the Sproul ideas that has been written into a law. It provides for a commission of five citizens to be appointed by the Gov-ernor to 'Jork in conjunction with the Commissioners of Grounds and Buildings and to serve without pay. #### Motor Legislation

Motor Legislation Several important measures relat-ing to motor vehicles were passed by this Legislature. The most impor-tant is the Dithrich bill which deals with the registration fees. It is es-timated that it will increase the rev-enues from \$1,000,000 to \$2,000,000 a year. The receipts of the depart-ment in 1918 were \$4,000,000. The Dithrich bill replaces the act of 1913. It places the registration fees for pleasure vehicles at forty cents per horsepower, an increase of approximately twenty per cent. All trucks under 2,000 pounds are reg-istered by the horsepower and above that are licensed by the weight of the chassis. Trucks are divided into seven classes, according to weight, with fees running from \$20 to \$150. The present charge is from \$5 to \$25. A limit of 26,000 pounds is placed on the gross load of truck. The width is limited to ninety inches and the length to twenty-eight feet. A speed limit is placed on each class of trucks. Another provision of the bill regutates the use of lights and prohibits muffler cutouts. The speed limit in the open country is In-creased from twenty-four to thirty miles an hour, and municipalities are allowed to place a limit of fifbill regulates the use of lights and prohibits muffler cutouts. sion on Constitutional Amendment and Revision, one member to be designated as the chairman. Gen-eral amendments to the constitu-tion are proposed. One of the very important achieve-ments of Governor Sproul was the ratifiation of the prohibition amend-ment to the Federal Constitution. The "dry" forces had a large num-ber of votes, but lacked a majority in both branches. These votes were produced and Pennsylvania was added to the list of States ratifying. As a candidate Mr. Sproul had pledged himself to bring about rati-fication and the promise was re-dicemed. Sedition Bill

It was de-feated in the House last week be-cause a number of members were afraid they would offend "labor" by voting for it. There is nothing in the measure to injure real Amer-icans. The legislation simply fur-nishes the machinery for getting after the element in society that is endeavoring to destroy the present form of government. The Governor knows the necessity for the pro-posed law and used the influence at his command to get the bill through the Legislature. It is now on his desk. Its provisions follow: **Workmen's Compensation** Bills reorganizing the Workmen's Compensation Bureau, increasing the schedule of compensation and providing for a bureau of rehabili-tation are in the hands of the Gov-ernor. The legislation goes to him in fust about the shape the Gov-ernor desired it, all attempts to make mdical changes having been successfully blocked by the admin-istration. State Insurance Commissioner Thomas Donaldson addressed the life men on co-operation between the companies, the men in the field and the department. "There are no insurance laws on the books of Pennsylvania which any honest man need fear," said Mr. Donaldson. Lincoln K.
