

TWELVE FUNDS IN TREASURY

Instead of the Two of Ten Years Ago There Are Now a Dozen to Look After

The cash of the Commonwealth of Pennsylvania which used to be accounted for under but two funds, the general and the sinking, is now carried in a round dozen of funds because of the passage of various acts of assembly, involving considerable increase of bookkeeping. The two new funds are the banking department and State road bond funds, both created by acts of assembly this year. The act reorganizing the Banking Department made it self supporting, fees to furnish the cash, while the proceeds of the sale of road bonds and the moneys to form the sinking fund by direct appropriation and otherwise are to be kept separately from the old sinking fund which contains \$588,329.26, the amount of bonds of the State outstanding and which could be paid off in an hour if the holders would only present them. Some of these bonds may never be heard of, but the money must be held.

The funds which are now carried are the general, from which the money to run the Government and to pay appropriations is taken; the sinking; the road bond fund, for which the general appropriation will carry appropriations of something like \$1,400,000 of sinking fund; the game protection and bounty funds which share alike in proceeds of the hunters' licenses; the State fire insurance fund and State school fund, which contain the uninvested cash of these funds, both of which are increasing; prison labor and manufacturing; fish propagation and Federal vocational education funds, the latter being money paid by the United States Government.

EXPLAINS LIFTING OF IMPORT RULES

French High Commission Makes Official Announcement

New York, July 8.—An official announcement is made here by the French High Commission in explanation of two decrees recently issued by the French government under which restrictions on imports into France were partly removed.

Under a decree becoming effective June 20, the prohibition of imports was lifted on all merchandise not enumerated in the decree. The principal articles of merchandise which remained prohibited for the time being, except under license, are enumerated by the announcement as follows:

Cold-storage meats, carded and combed wool, cheese, spelt and mlin in seed of flour, (drinks?), oil, potassium, chemical products, derivatives of oil-tar other than those obtained directly by distillation of the tar dyes derived from tar, perfumes, twines with the exception of binding twine, textiles, news-print paper, dressed or made-up furs, gold or silver wares, jewelry, clocks and watches, arms, powders and munitions, musical instruments and their parts, various articles of luxury, tobacco, and other materials prohibited by special law such as saccharine, distilled liquors, chemical matches, etc.

The second decree, gives the table of surtaxes ad valorem to be levied in addition to the specified duties on taxes merchandise.

The rate of surtaxes varies with the nature of the products under consideration and according to whether the general tariff or the minimum tariff is to be applied; it ranges between 5 per cent. and 20 or 25 per cent. and occasionally 40 per cent.

For example: The surtax on typewriters is 10 per cent., general tariff and 5 per cent. minimum tariff, that on automobiles is 20 per cent. general tariff, and 10 per cent. minimum tariff for those which are not already taxed ad valorem. For this latter, the tax is 70 per cent. It has not been increased.

Says Eat Less To

Put on Flesh And Get Strong

Thin weak, nervous wrecks, who want to put on flesh, get strong and fine, can almost invariably do so in two or three weeks by taking with each meal a 5-grain tablet of the great French nerve and blood builder, Blood-iron Phosphate. Big eaters are often thin as a rail simply because the food they eat is not assimilated. Blood-iron Phosphate, by strengthening the nervous system and enriching the blood, promotes the normal activity of those vital organs upon which the processes of assimilation and metabolism depend, thus enabling you to make use of the very last bit of nourishment from the food that you eat. If you don't feel well, if you tire easily, don't sleep well or are too thin, go to Geo. A. Gargas or any other good druggist and get enough Blood-iron Phosphate for a three weeks' treatment—it costs only 50 cents a week—and take as directed. Eat less, chew your food thoroughly, and if at the end of three weeks, you don't feel stronger and better than you have for months; if your eyes aren't brighter and your nerves steadier; if you don't sleep better, and your vim, vigor, endurance and vitality aren't more than doubled, the druggist will return your money for the asking and Blood-iron Phosphate will cost you nothing.
