### HALF PEACH CROP

Sunbury, Pa., July 11.—The peach crop in Northumberland, Union and Snyder counties will be about half the usual yield, according to growers, who have thousands of trees in their orchards. Heavy storms whipping off the fruit is given as one of the causes. Another is that the blossoms had no chance to fertilize properly. In some sections peach "yellow" is making inroads on the crop, while the 17-year locusts have also done their share of the damage, they say.
