

SURPLUS SUPPLY OF SUGAR IS TO BE SOLD PEOPLE

Colonel Kemper Announces 21,000,000 Pounds Are to Be Disposed Of

Colonel J. B. Kemper, Army recruiting officer for the Harrisburg district, announced to-day that the Secretary of War, acting upon recommendation made by the director of sales, has authorized the United States Sugar Equalization Board to dispose of the War Department's entire present surplus of granulated sugar, about 21,000,000 pounds.

None of the surplus sugar is to be sold for export, but that all must be sold for domestic consumption with a view to relieving promptly the acute sugar shortage that now exists in certain sections of the United States. The United States Sugar Equalization Board was selected as the medium for distribution of this surplus because, having erected during the war the machinery for sugar supply, it is the best channel through which the War Department's surplus stock may be made available to the general public most expeditiously and at the most equitable distribution yet assured.

Public to Get Benefit The export market afforded a higher price than the War Department will realize through this method of marketing. Offers of 10 cents per pound had been made for the entire surplus by exporters, but the Secretary of War, realizing that a shortage of sugar existed in the United States during the canning season, a time when the demand for sugar is greatest, desired that the benefit of the surplus be given to the community through sales control.

Courage Which Brought Victory Will Carry on Through Reconstruction

Paris, Saturday, July 12.—In the statement issued to the French press last night, the Secretary of War expressed belief that the courage which had carried France through to victory would bring her through the trying period of reconstruction. The Secretary's statement was: "I return home with a deep sense of what France has suffered in the war, but with a still deeper conviction that the courage which carried her through to victory will carry her over the trying days of reconstruction. "I think that I should say that a delay in the sailing of the steamer will be of that day so historic to France and which now is doubly consecrated by the first victory parade of the Allied arm.

BRITISH FEEL PINCH OF ECONOMY IN COAL PRICES

Export Industries Explain That Increase Will Handicap Them in Their Competition With Other Countries

London, Saturday, July 12.—Seldom has any people received such a swift and vivid lesson in practical economics as the British government has given its nation by the notice in the House of Commons on Wednesday that it was raising the price of coal six shillings per ton from next Wednesday.

Great export industries declare that the increase in the price of coal will handicap them in their competition with other countries and may mean, in some instances, a stoppage of their plants and an increase in unemployment. The general public is told how much the increase will mean to them in their pocket.
