

### 1,500 TROOPS BROUGHT HOME

Passengers on the Santa Barbara Are Mostly Casuals

Philadelphia, July 24.—Fifteen hundred troops, mostly casuals, arrived here last night on the transport Santa Barbara from Brest. The trip across the Atlantic was without incident. An official reception committee representing the city of Philadelphia met the returning soldiers who expressed great pleasure in being back in the United States.

bara included the 541st Engineers Service Battalion, headquarters and medical detachment and companies A and D, 301st Water Tank Train, Company E, Third Company Transportation Corps, 318th Salvage Squad, 309th Mobile Laundry, 108rd St. Nazaire Casual Detachment, Casual Companies 166, 167, 168, 169, 170, 171, 172, 173, 174 and 175, Marine discharges, Special Casual Company 1,684, a casual officer, casual chaplain and casual Army field clerks.

Gilbert A. Spencer, Sumner, Mich., was the only one on the ship who wore the D. S. C. Grover C. Davis, a newspaper man of Muncie, Ind., who was editor of the Grand Gazette, a Marine Corps publication at St. Nazaire, was among the arrivals.

### MOSQUITO BILL DRAWS A VETO

Governor Says That the Method of Assessment Is Too Radical a Departure

Governor William C. Sproul has vetoed the bill providing a method of getting rid of mosquito breeding places on the ground that it would make a radical innovation in the assessment laws of the State. The measure was urged by health officials and was designed to enable spots found to favor propagation of the pests to be drained or treated, the counties, municipalities and interested property owners to be assessed for the cost.

The Governor says that the division of the assessment is not clear in some places and that instead of voters being named as is usual when benefits are assessed the Commissioner of Health is to determine the benefits. The Governor also objects to the fact that after the Commissioner determines the amount is notice given to the property owners and then only by advertisement in the newspapers. "I know of no instance of the assessment of benefits upon property where notice is not first given of the proceedings and an opportunity given the owners to be heard before the assessment is made. I doubt also the legal power of the Commissioner of Health to assess damages or benefits upon private property," concludes the Governor.

Ready For Preserves—Preparations to take over several tracts for establishment of game preserves before the opening of the fall hunting season are being made by State Game Commission officials. They have arranged for surveys and search of titles on a dozen or more properties and groups of properties and it may be possible that in western counties they may purchase only surface rights. Some of the preserves will be of large size and will be stocked with game this year if conditions permit. Scores of inquiries regarding the provisions of the game preserve bills are being sent here.

Send Engineers—Sanitary engineers have been sent to Wellsboro in response to an urgent appeal to the Commissioner of Health Edward Martin by residents of that place which was visited by a cloudburst on Tuesday afternoon. The conditions were said to be so serious that expert assistance was needed. This is the only place that has asked for aid of the Health Department as a result of the heavy rains.

Compensation Board—The State Compensation Board, whose members were reappointed by the Governor, organized yesterday by reelecting Harry A. Mackey, Philadelphia, secretary; and Lee C. C. Hunter, Huntingdon, assistant secretary.

Commissioner of Labor C. B. Connelley, ex-officio a member of the board, announced the reappointment of all of the present compensation referees. There are four new places, created by the act just approved, to be named.

Heavy Loss on Roads—State Highway Department reports indicate heavy loss by contractors on new State highways as a result of the tremendous fall of rain the last fortnight and serious interference with traffic and the Highway Department's own oiling and surfacing operations. The reports received are to the effect that the rainfall was heaviest east of Huntingdon, Centre, Clinton and Potter counties and that in some eastern counties work on the roads was stopped and grading excavations seriously washed. In some instances cement supplies were flooded while the dead loss to contractors because of idle labor will be heavy. The department maintenance forces have lost almost two weeks in what is ordinarily the busiest time of the year.

Unique Case Up—The first application from an individual to sell a telephone system to a company has been received by the Public Service Commission and will be acted upon next week. Jay A. Putnam, of Rome, Crawford county, asked the right to sell his system known as the Rome Telephone Co., to the Rome Telephone Co., Ltd. The Smithfield Rural Telephone Co., operating in Monroe county, has filed notice of an increase of rates.

Printing Branch Is Reorganized

Reorganization of the State Department of Printing and its division of distribution of documents have been authorized by Governor Sproul's approval of the Murdoch Senate bills. Under terms of one there have been established numerous definitions and regulations governing the printing are made. One is that bids may be received for a State printing contract for four or six years in 1921 and thereafter; the bidder's bond increased to \$50,000; that the State printer must do all printing except when the superintendent of public printing and binding shall give an emergency order; place of deputy at \$3,000 is created; new schedule of prices arranged and additional clerks provided.

The second bill provides a new system of distribution of documents with the number to be supplied for each branch of the Government.

Pershing Compliments Units of First Division

H. N. Morgan, a sergeant in the First Division, has sent home a letter written to Major General McGlachlin, commanding the division from General Pershing.

General Pershing in his letter pays a splendid tribute to the appearance of the First in its review at Montaubauer last March. He compliments the units on their fighting qualities and the way in which they conducted themselves throughout the campaigns. The First Division is the original division of the American Expeditionary Force in France.

### Senate Passes Agricultural Bill Without Rider

By Associated Press. Washington, July 24.—The Senate has passed the \$34,000,000 agricultural appropriation bill, which recently was vetoed by President Wilson because of the rider for repeal of the daylight saving law. No effort to restore the rider was made in the Senate.

### Secures Revolver to Play Wild West Show Boy Kills Playmate

By Associated Press. Warren, Pa., July 24.—Fired into a spirit of emulation of wild west stunts by a medicine show playing in their home town, Allen Engman and Milford Nordine played to-day with fatal results. They secured an automatic revolver to use in their play and Milford Nordine, 13, shot and instantly killed Allen Engman, aged 10.

### IS YOUR BLOOD HUNGRY FOR IRON?

Modern Methods of Cooking and Living Have Made An Alarming Increase in Iron Deficiency in Blood of American Men and Women

**NUXATED IRON**  
Helps Make Red Blood The Kind That Puts Roses Into the Cheeks of Women and Force Strength and Courage Into Veins of Men.

"Is your blood starving for want of iron? Iron is the red blood food. If you were to go without eating until you became weak, thin and emaciated, you could not do a more serious harm to yourself than when you let your blood literally go hungry for want of iron—that gives it strength and power to change food into living tissue," says Dr. James Francis Sullivan, formerly physician of Bellevue Hospital (Outdoor Dept.), New York, and the Westchester County Hospital.

"Modern methods of cooking and the rapid pace at which people of this country live has made such an alarming increase in iron deficiency in the blood of American men and women that I have often marveled at the large number of people who lack iron in the blood—and who never suspect the cause of their weak, nervous, run-down state. But in my opinion, you can't make strong, sturdy men and women by feeding them on metallic iron. The old forms of metallic iron must go through a difficult process to transform them into organic iron—Nuxated Iron—before they are to be taken up and assimilated by the human system. Notwithstanding all that has been said and written on this subject by well-known physicians, thousands of people still insist in dosing themselves with metallic iron simply, I suppose, because it costs a few cents less. I strongly advise readers in all cases to get a physician's prescription for organic iron—Nuxated Iron—if you don't want to die of this trouble, then purchase only Nuxated Iron in its original packages and see that this particular name, Nuxated Iron, appears on the packages. If you have taken preparations such as Nux and Iron and other similar iron products and failed to get results, re-

member that such products are an entirely different thing from Nuxated Iron. If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of ordinary Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. Numbers of nervous, run-down people who were ailing all the while have increased their strength and endurance in two weeks' time while taking iron in its proper form. Sold by Troll Keller, G. A. Gorgas and J. Nelson Clark.
