

Men from many walks in life are taking up the automobile and aeroplane mechanical trade. They are fitting themselves for important positions. Our course will prove beneficial to owners of cars as well as to men and women who desire to use it as a trade. The following testimonials from students who are now in our school and also from those who have recently graduated will tell you what our course can do for you.

# The Automobile and Aeroplane HARRISBURG, PA. Mechanical School STEELTON, PA.

The School That Gives You a Thorough Course of Training in Automobile and Aeroplane Mechanical Construction

## Instruction on the Automobile

In the instructions on the automobile every working part or repair is given covering the motor, chassis, transmission, differential, rear construction, clutch, magneto, carburetor, electrical system, body, etc., as well as a thorough course in driving. Welding, brazing and blacksmithing is also included so that when our student graduates he is capable of making any repair to an automobile, even tearing it down and building it up again. He learns to grind valves, time the motor, adjust the carburetor and the hundred and one other intricate adjustments of an automobile. He is an expert mechanic. This course can be taken in a short time according to the time and thought placed on it by the student. It is equally beneficial to the automobile owner, enabling him to take care of his car and to save himself many dollars in repair bills. In fact, it is the coming business and one in which a man is always sure of a job and good money.

## \$7 Per Week

Seven dollars a week is all it costs you to become an expert mechanic. This is our new price for a course of instruction. The old price was fifty dollars for the course. A man can take these instructions, staying here as long as he desires—at least three weeks and up to six months if he wishes. Most men learn very quickly. You can too. A few dollars wisely spent now may mean a sure job for you later on. Come in to-day, or next week and let us tell you just what the automobile trade has done for thousands of men and what it can do for you if you are an expert.

## Instruction on the Aeroplane

In the instructions on the aeroplane, the mechanical end is given the most thought. It is our aim to produce thorough mechanics, men who know the motor and the other working parts of the aeroplanes to such a degree that they can make every adjustment that may be required of them. We train you to do work on all kinds of aeroplane motors, to adjust the wings and to overhaul and repair the controls in the fuselage. This is delicate work and must be thoroughly understood for a good bit depends on every thing being in first-class mechanical condition. That is the reason that the Government and also private owners pay such high wages for expert mechanics, and the reason for the great demand at the present time for the expert. This business once learned assures you of a position at all times, and one that will pay you big wages. This course is included with our automobile course and does not cost an additional penny. We have aeroplanes by which we give actual instructions.

To Whom It May Concern:  
I take great pleasure in endorsing the Automobile and Aeroplane Mechanical School. On June 1st I knew absolutely nothing about an automobile; to-day, just two months later, I am in the automobile repairing business for myself. I sincerely hope this school will have continued success.  
Hummelstown, Pa.  
Jacob A. Kline.

To Whom It May Concern:  
I think the Automobile and Aeroplane Mechanical School is the best of its kind in the State and would be glad to recommend it to any young man who desires to learn the automobile trade.  
2627 N. 6th St., Harrisburg, Pa.  
R. W. Yeagley.

To Whom It May Concern:  
In regards to the Automobile and Aeroplane Mechanical School, it deserves great credit in teaching and instructing students to become competent and worthy mechanics. I do not hesitate to praise it to the fullest for what I have learned, practiced and experienced, along with the other students. The teacher, Mr. Felton, deserves our thanks for making us what we are.  
413 Lebanon St., Steelton.  
Anthony Smothers.

To Whom It May Concern:  
In reference to the Automobile and Aeroplane Instruction School, located at Steelton, Pa., I wish to state that I have taken several lessons on automobiles and know that I have greatly benefited and am more than pleased with what I have learned so far. I, therefore, cheerfully recommend the school to any one who desires to take up the studies of the above-named subject.  
1116 N. 14th St., Harrisburg.  
Charles B. Crossby.

To Whom It May Concern:  
Concerning the Automobile and Aeroplane School, I think it is very good and that the trade is the best one a young man can take up.  
17 N. Cameron St., Harrisburg, Pa.  
Issac May.

To Whom It May Concern:  
I have been a student at the Automobile and Aeroplane School and can say that I do not regret the money or the time I have spent while in this institution. When I came here I knew practically nothing about an automobile, but now I will place myself with anyone and will guarantee the public that I will give equally as good or better service in this line of business. I am well pleased with this school.  
312 Ridge St., Steelton.  
J. M. Ross.

To Whom It May Concern:  
In regards to the Automobile and Aeroplane Mechanical School, I am very glad to state that I think any ambitious man seeking an auto or aeroplane mechanical trade will be making a good investment by entering this school.  
1807 North 5th St., Harrisburg, Pa.  
H. C. Weader.

To Whom It May Concern:  
Gentlemen—I am very much pleased with what I have seen and learned so far and realize I am working under a very able instructor.  
Harrisburg, Pa.  
W. B. Bair.

To Whom It May Concern:  
I have taken a course in the Automobile and Aeroplane Mechanical School and am more than pleased with what I have learned so far and find that my money was well spent, and would advise any one who desires to learn automobile construction and repairing to drop in and see the boys.  
Progress, Pa.  
Amos G. Peters.

Students Who Are Now Taking Our Course of Instruction

Automobile and Aeroplane Mechanical School:  
Gentlemen—For the time I have been attending your auto school, I am getting good instructions and I think the school is very satisfactory.  
421 Catherine St., Steelton, Pa.  
C. V. Peterman.

Automobile and Aeroplane Mechanical School:  
Gentlemen—In seventeen days' time I have learned to drive an auto, solder brass pipe and can weld with a gasoline torch.  
321 S. 4th St., Steelton, Pa.  
Charles Barbush.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I feel that the money I have spent in taking your course is the most profitable to me of any that I have spent in Harrisburg. Boys, wake up and appreciate what a course in this school will mean to you.  
1152 Cumberland St., Harrisburg.  
Tracy Lamb.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I enrolled for a course in your school in April and in less than four months I have learned to time the motor, weld with brass and many other important points. I can drive with any kind of a machine.  
319 S. 4th St., Steelton.  
Biagio Biocco.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I have been attending your school for more than two weeks and think it is the best in the country. I have been learning very fast and think our teacher is second to none.  
323 S. Front St., Steelton.  
George B. Willis.

To Whom It May Concern:  
The Automobile and Aeroplane Mechanical School is all right. It is good for me and good for anyone that wants to learn the automobile business.  
167 Main St., Steelton.  
John Dubravec.

To Whom It May Concern:  
I have started a course in the Automobile and Aeroplane Mechanical School and am well pleased with the lessons received so far and would advise any one that has a car and a few spare hours to take the benefit of this school.  
319 S. Front St., Steelton.  
J. H. Bowermaster.

To Whom It May Concern:  
I am more than pleased for the short time I have been coming to the Automobile and Aeroplane Mechanical School and am very glad to have the chance to learn the automobile and aeroplane business.  
1114 N. 14th St., Harrisburg.  
Wesley Metzger.

To Whom It May Concern:  
I am glad to recommend the Automobile and Aeroplane Mechanical School, as I have learned the trade in a short time, and think the school is one of the best in Pennsylvania. Any man wishing to learn this trade should come to this school.  
1011 Market St., Harrisburg.  
Clarence V. Forsythe.

To Whom It May Concern:  
I have been a student at the Automobile and Aeroplane Mechanical School for the last two months. I cannot speak too highly of the school and their methods of instruction and am glad to recommend the school to men and women who are striving for a higher goal in life, as the bridge which safely leads to success.  
Onset, Lebanon Co., Pa.  
S. L. Reinbold.

To Whom It May Concern:  
I hereby recommend the Automobile and Aeroplane Mechanical School. It is the best of its kind in the State. I enrolled in this school about two months ago and did not know anything about the trade. Now I can name and repair every part of an automobile and aeroplane. Come, boys, get into this; you will not regret your chance, time or money.  
325 S. 14th St., Harrisburg, Pa.  
D. L. Belton.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I earnestly thank you for the kind interest you have taken in my welfare. I can truthfully say that your training school deserves all credit for my success, for I knew absolutely nothing about an automobile until I entered your school. Since July 28 I have learned soldering tin, brass; setting brushes in generator, and many other parts of the motor. I take pleasure in recommending the training school to any one who wishes to learn and seize the successful opportunity.  
120 Franklin St., Steelton.  
George Zenck.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I have been a student in this school a few months and am very well pleased with the results I have obtained. I have learned something new every day. Should I have this course to take over again, I would do it with a smile, for I know this school is the best that can be conducted, and deserves to be continued. This trade is the best a man can learn.  
446 Ridge St., Steelton.  
T. R. Harrison.

Automobile and Aeroplane Mechanical School:  
Gentlemen—I enrolled in your school July 15 and up until this date I have learned more than I expected to in six months; in fact, my teacher doesn't know how much I have learned. Young man, you are losing an opportunity by not taking a course. Don't wait any longer—take it up to-day.  
491 Mohn St., Steelton.  
Judson Branch.

To Whom It May Concern:  
I am glad to recommend the Automobile and Aeroplane Mechanical School, as I have learned the trade in a short time and think the school is one of the best in Pennsylvania. Every man wishing to learn this trade should come to this school; he won't regret the time nor the money spent.  
325 S. 14th St., Harrisburg, Pa.  
A. Belton.

To Whom It May Concern:  
I can repair magnetos, carburetors, storage batteries and also fit piston rings and grind in valves, and I am only in this school three weeks. I am so well pleased with what I have learned that I will recommend it to anybody.  
538 S. 2nd St., Steelton, Pa.  
Mike Spoljavic.
