

TO REORGANIZE SCHOOL DEPT.

Dr. Becht in Charge of Affairs; Dr. Finegan to Return Soon

Reorganization of the State Department of Public Instruction is one of the big movements which will be effected immediately upon the return of Governor William C. Sprull from the conference of Governors at Salt Lake City.

Dr. Thomas E. Finegan, the new superintendent of Public Instruction is expected to return to assume active charge of Pennsylvania's school system on September 1, when important rulings concerning the teacher's salary increase and other school matters will be made.

In the meantime Dr. J. George Becht, recently appointed by Governor Sprull as Deputy Superintendent of Public Instruction is carrying out the detail work of the Department. Governor Sprull under the acts passed by the recent Legislature will have the appointment of a second deputy at a salary of \$6,000 a year, but no intimation has been made as to who will get this appointment.

You Need Not Suffer From Catarrh

But You Must Drive It Out of Your Blood to Get Rid of It Permanently.

You have probably been in the habit of applying external treatments, trying to cure your Catarrh. You have used rays, washes and lotions and possibly been temporarily relieved. But after a short time you had another attack and wondered why. You must realize that catarrh is an infection of the blood and to get permanent relief the catarrh infection must be driven out of the blood. The quicker you come to understand this the quicker you will get it out of your system.

\$4,000 a year, and Mr. Koch will head a Bureau of High School Inspectors at a salary of \$4,000 a year. It is understood that Dr. Finegan will establish new bureaus to look after each separate character of school work which comes under the supervision of the department and that there will be the closest cooperation between the school and health authorities relative to the physical condition of pupils in the public schools. Under the provisions of the Lanus act, special schools are to be established for children who are backward in their work on account of physical or mental handicaps. The work of the vocational and agricultural schools will also be enlarged and it is likely that the school authorities will work in conjunction with the Department of Labor and Industry in the rehabilitation of industrial workers.

State Fair Changes - Secretary of Agriculture Frederik Rasmussen to-day met members of the executive committee of the State Fair Association and outlined the plan under which State aid would be allocated county fairs for strictly agricultural exhibits. Under a law passed by the last Legislature, supervision of the State aid to county fair associations is placed in the hands of the Secretary of Agriculture and \$100,000 was appropriated for the purpose. The law limits payments for exhibits of livestock and livestock products, horticultural products, cereals, bees and bee products. The Legislature also passed an appropriation \$63,016.88 to reimburse counties for money advanced to agricultural shows during the years 1915, 1916 and 1918. Secretary Rasmussen explained to the fair association men that he did not want to interfere with their present premium lists, but that needle work and other premiums which had formerly been classed in with the agricultural show would not be included further. The Secretary outlined a report that must be mailed not later than November 15 to the

Department of Agriculture showing the actual amount expended for agricultural premiums and other records made by the fair for the year. Secretary Rasmussen says that it is the desire of the agricultural department to help build up the exhibits of farm products so as to educate the producers to the value of greater effort in both the quality and quantity of farm products. "The county fair is the barometer of the community to determine the quality of its products or the spirit of the people," says Rasmussen. Meeting with the Secretary to-day were: J. F. Seldomridge, Lancaster; Harry B. Correl, Bloomsburg; Walter R. Buckman, Byberry; Morris G. Temple, West Chester.

Food Investigations On - Robert M. Simmers, special agent for the State Bureau of Foods in the Philadelphia district, has been instructed by James Foust, head of the Bureau, to give Tod Daniel, the federal food investigator there, all information at his disposal concerning the hoarding or profiteering of foods in that vicinity. Mr. Daniel also has been placed in possession of the State's detailed information concerning cold storage warehouses and their contents.

Industrial Conference Planned For Canada

Ottawa, Ont., Aug. 13.—The industrial future of Canada may be influenced to a marked degree by the meeting of the National Industrial Conference to be held here Sept. 11, to discuss labor problems in the Dominion. Building contracts said to amount to millions of dollars have been held up pending some action by the federal government or an agreement between capital and labor which would tend to restore industrial tranquility.

The conference will be attended by representatives of the Dominion and provincial governments, employers and labor leaders from all branches of industry. Subjects to be considered will include the right of employees to organize, recognition of labor unions, collective bargaining, and the suggestion by the Royal Commission on Industrial Relations that a bureau be established to promote the organization of a joint industrial council. Labor features of the Peace Treaty also will be brought up for discussion.

Philadelphia, Pa., Aug. 13.—State officials investigating the failure of the North Penn Bank, which closed its doors July 18 with an apparent shortage of \$2,144,000, held a long conference yesterday with representatives of J. J. Boland, head of the New York National Insurance Company and the Seneca Fire Insurance Company, also of New York. Boland is alleged to have had overdrafts in the North Penn Bank aggregating \$380,000, and since the failure, the New York National Insurance Company has been taken over by the New York State Insurance officials. Representing Boland at the meeting were Frank T. McCormick, his law partner, and R. S. Houck, Mr. Houck is city solicitor of Scranton and a vice-president of two insurance companies. After the meeting Colonel Frederick T. Pusey, in charge of the investigation, said it had not been "particularly productive."

"As far as I am concerned," Col. Pusey said, "things are just where they were before the two men were called. They did not succeed in clearing up a single point."

Harry Ambler, a brother of Charles A. Ambler, former Insurance Commissioner of Pennsylvania, who is said to owe the bank more than \$100,000, also called at Colonel Pusey's office. Colonel Pusey said Mr. Ambler told him his brother would make settlement this week.

Yellow Fever Threatens State of Yucatan

Mexico City, Aug. 13.—Advices from the state of Yucatan are that a threatened epidemic of yellow fever has been averted by hygienic measures and a quarantine.

AMERICAN LEGION IS AID TO ITS MANY MEMBERS

New York, Aug. 13.—To inform discharged soldiers, sailors and marines of the facilities provided by the American Legion to furnish information and service in all insurance and money matters where aid is required to secure final adjustment and settlement from the Government, the following statement issued to-day from National Headquarters the Legion, 19 West 44th street, New York City, will be read to every post in the United States.

"In accordance with a resolution passed at the caucus of the American Legion at St. Louis, the Legion is giving to its members, and to those eligible for membership, all possible aid in matters concerning their War Risk Insurance, allotments, liberty bonds, bonuses, travel pay, etc. For the last few months the Legion has been rendering this service to all of its members who have had occasion to ask for aid. During that time it has helped hundreds of men to obtain a final and complete settlement on their accounts. In every section a member of the Legion acquainted with the procedure necessary to obtain a speedy settlement of any account that a discharged soldier may have with the Government officials, is available and ready to help.

"Delivery of liberty bonds has been expedited in matters concerning their War Risk Insurance. Claims for bonuses presented by the Legion have been settled in record time. Compensation claims have

been settled and payment secured. Men who had been discharged from the army or navy, and whose discharge certificates showed them to be in apparent good health, have through the American Legion, proved to the Government that they are, as a matter of fact, not in good health, and have had their compensation claims allowed and paid. These results have been obtained through full co-operation with the various Government Bureaus.

"In addition, the Legion is carrying on a general campaign to inform ex-service men of their rights and privileges and to assist in obtaining them. Compensation is now paid to injured soldiers on the basis of 33 1/3 per cent. Legislation has been introduced to make it payable on the basis of 100 per cent. Government insurance at present is payable to the beneficiary in installments covering a period of 20 years. Most men desire to have their insurance paid in one lump sum. Legislation is now pending to have this done. Also Legislation is pending to enlarge greatly the class of persons who may be named as beneficiaries of insurance.

"This service has been established for the benefit of ex-service men. It is urgently requested that every member be informed so that he may avail himself of any assistance necessary in connection with his relations with the Bureau of War Risk Insurance, the Zone Finance Officer, or other Government agencies."

SAYS AMBLER WILL PAY BANK

Brother of Former Insurance Commissioner Sees Colonel Pusey

Philadelphia, Pa., Aug. 13.—State officials investigating the failure of the North Penn Bank, which closed its doors July 18 with an apparent shortage of \$2,144,000, held a long conference yesterday with representatives of J. J. Boland, head of the New York National Insurance Company and the Seneca Fire Insurance Company, also of New York. Boland is alleged to have had overdrafts in the North Penn Bank aggregating \$380,000, and since the failure, the New York National Insurance Company has been taken over by the New York State Insurance officials. Representing Boland at the meeting were Frank T. McCormick, his law partner, and R. S. Houck, Mr. Houck is city solicitor of Scranton and a vice-president of two insurance companies. After the meeting Colonel Frederick T. Pusey, in charge of the investigation, said it had not been "particularly productive."

"As far as I am concerned," Col. Pusey said, "things are just where they were before the two men were called. They did not succeed in clearing up a single point."

Harry Ambler, a brother of Charles A. Ambler, former Insurance Commissioner of Pennsylvania, who is said to owe the bank more than \$100,000, also called at Colonel Pusey's office. Colonel Pusey said Mr. Ambler told him his brother would make settlement this week.

MacMillan's Next Arctic Trip to Be in 60-Foot Boat

Professor Donald MacMillan, of Bowdoin College, noted as an Arctic explorer, is planning to start early in the summer of 1921 upon his third trip to the northern regions, according to a report from Portland, Me. Bull's Bay will be the object of the trip. The trip will be financed by the Bowdoin alumni and the National Geographical Society. Bowdoin Museum will be enriched by mineral and animal specimens collected, and photographs and data on topographical conditions will go to the Geographic Society. MacMillan's party will have a special type of boat, costing about \$50,000. Every requirement suggested by previous Arctic trips will be met in the new boat, which will be only sixty feet long.

ARE YOU Suffering from CATARRH? For quick relief, The MAN-HEIL Inhaler. Demonstration at Gorgas Pharmacy, 16 North Third street.—Adv.

ANTHRACITE SHIPMENTS GROW

Exceeded Million Tons First Since October, 1918

Philadelphia, Aug. 13.—The shipments of anthracite for July as reported to the Anthracite Bureau of Information at Philadelphia, show a substantial increase over the preceding month and exceeded a total of 6,000,000 tons for the first time since October, 1918. The tonnage sent out last month amounted to 6,052,324 tons, an increase over June of 422,743 tons, or 7.7 per cent.

Compared with July, 1918, when production was abnormally stimulated by war conditions, the shipments last month showed a decrease of 1,032,441 tons. A large part of this decrease, however, was in the production of steam sizes from washeries that are not in operation this year. Washery production in 1918 averaged 550,000 tons a month, whereas in recent normal years the washery output has amounted to between 150,000 and 250,000 tons a month.

Compared with July, 1918, the latest normal year in anthracite production, the shipments last month showed an increase of 619,456 tons. The shipments for the first four months of this year, beginning April 1, have amounted to 22,608,555 tons, as compared with 21,146,535 tons for the corresponding period in 1918, an increase of nearly one and a half million tons.

Big Lot of Hay Fever Jokes

But Kentucky Man Says—"People Who Belong to Hay Fever Colony are Kidding Themselves."

Wouldn't Be Any Rose o. Hay Fever if Simple Home Remedy Was Given a Chance.

"Yes, there's a real NINETY-NINE per cent. effective remedy for hay or rose fever," frankly states a druggist in a prosperous Kentucky city.

"But I don't expect anyone to believe me, because the treatment is so easy and the cost not worth mentioning."

"The annual crop of hay-fever jokes would be mighty scarce if people would get an ounce of Mentholized Arcline and by just adding water that has been boiled make a pint of liquid that will prove a real help to all who suffer."

"Many of my hay-fever friends tell me that by stirring to gargle and sniff or spray the nostrils a few times a day the expected severe attack often falls to appear and in cases where it does show up is very mild and does not annoy."

"The Better Class of Pharmacists" who dispense Mentholized Arcline say it will greatly modify any attack even when taken three or four days after hostilities begin.

Go to a real live druggist when you get ready to make a pint.

7 A DAY FOR 7 DAYS

If Your Nerves Are Shaky Because of Over-Indulgence in Tobacco or Alcohol or by Excess of Any Kind, Bio-Feren is What You Need Right Away.

Don't grow old before your time, don't let nervousness wreck your happiness and chance in life. The man with strong, steady nerves is full of vigor, energy, ambition and confidence. You can have nerves of steel, firm step, new courage and keen mind by putting your blood and nerves in first-class shape with mighty Bio-Feren, a new discovery, inexpensive and efficient.

Men and women who get up so tired in the morning that they have to drag themselves to their daily labor will in just a few days arise with clear mind, definite purpose and lots of ambition. All you have to do is to take two Bio-Feren tablets after each meal and one at bedtime—7 a day for 7 days—then reduce to one after each meal until all are gone.

Then if your energy and endurance haven't doubled, if your mind isn't keener and eyes brighter, if you don't feel twice as ambitious as before, any druggist anywhere will return the purchase price—gladly and freely. Bio-Feren is without doubt the grandest remedy for nervous, run-down, weak, anaemic men and women ever offered and is not at all expensive. All druggists in this city and vicinity have a supply on hand—see many packages.

SURVEY ROUTE FOR AIRSHIPS

Complete First Section Between Sydney and London

Sydney, Australia, Aug. 13.—Survey of the route of the first section of the projected aerial service between Sydney and London was recently completed. The section extends from Sydney to Darwin, which is on the north coast of Australia and relatively near the Malay Archipelago. This service will be carried on by a Sydney company.

From Darwin the route will cross the sea to the island of Timor, proceed along the Malayan Archipelago to India and thence run to Bagdad or Port Said—probably the latter. From Port Said it will cross Europe to London. The survey of the second section of the route, from Darwin through Malaya to Delhi, is now going on.

It is expected that the first flight will be made within the next few months, and it is planned to have the proposed passenger and commercial services in full operation in

about two years. If the company succeeds London will be reached regularly from here in 6 1/2 days. The Sydney-Darwin section is 2,000 miles. But the survey party traveled about 4,000 miles in order to select the most satisfactory landing places or relay stations.

When the flights are in full swing business between Sydney and London will be greatly facilitated from the fact that letters may be answered within two weeks of their dispatch from here. Use McNeil's Cold Tablets.—Adv.

Beau Brummell shaved serenely on

BEAU BRUMMELL who "taught Wales what a coat was like"—inventor of numberless niceties of dress—gambled himself into poverty. Publicly cut by the King, he had his last remaining finery laid out preparatory to seeking a friend who might save him from disgrace. With Weston, his faithful valet, keeping the door against the bailiffs, the great beau shaved serenely on. Prince of the Dandies to the last, he finished the job with the utmost care. Then, carefully wiping dry the precious blade and affectionately placing it in its case, he turned to Weston with the command: "Now let the rogues in."

DURHAM-DUPLEX A Real Razor—made Safe

Heft this wonderfully balanced razor in your hand—feel the comfort of its long, keen blade on your cheek. Automatically it lies on your face at the one-and-only angle for right shaving—because its design is thousands of years old. More than that—it can't cut your face. It's the longest, strongest, keenest, best-tempered blade on earth—with more shaving mileage than any other razor. Seven million shavers have changed from other razors to the Durham-Duplex—a real razor made safe. Make it your razor today.
