Restaurant Employes Must Give Health Certificates

ON MONDAY LIST

City health officials to-day began an investigation to determine whether the proprietors of city restaurants complied with a State law requiring them to furnish semi-annually, health certificates for each employe.

Many city restaurants are complying with this law, Dr. J. M, J. Raunick, city health officer said, but there is a possibility that a few hire transients who may be suffering from communicable or incurable diseases.

The report that there may be violators of the law came as a re-sult of the arrest of Helen Engle-breth, alias Watkins, on a charge of Division of the Pennsy was a big success. If you want to know how soliciting. She was employed in a city restaurant and when examined after her arrest was found to be suffering from a communicable dis-

this is figured out ask J. C. Johnson superintendent or J. B. Phelen freight trainmaster. There was something doing before Monday, August 11, two big wrecks, but Monday, according to reports, passed with a good record. Only three very trifling accidents were reported to the Middle Division accident clerk at Altoona. Two of them were personal injuries, and one a slight wreck.

Assistant Superintendent Koons was in charge of the movement for a reaccident day and he reported from Mifflin that he had not yet, received reports from all parts of the division, but that up to date no accidents had been reported.

Armenian Extermination

Complete report of the results in the no accident periods inaugurated on the various divisions that it has been decided by the safety section to make a universal effort along the same lines.

In the early fall, possibly beginning in October, such a campaign will be commenced covering every line of activity in railroad operation and probably extending several weeks. Details of the program have not yet been worked out. The brotherhoods have strongly endorsed the movement and will heartily co-operate with the safety first committees.

Wednesday Big Day

All record in freight movement for

and will heartily co-operate with the safety first committees.

Wednesday Big Day

All record in freight movement for the present summer were broken on Wednesday on the Middle Division, the total number of cars passing Delibolm being 7,817, while the interchange with Tyrone divisions was 1,837, making a total of 9,654 cars handled.

This big movement was handled without difficulty and officials state that with four more trains, a cotal of 10,000 could have been rounded out. An effort will now be made to attain this record breaking number.

Council that Armenia undoubtedly will starve and the people be exterminated if the British soldiers are not detained there until others are sent. The Supreme Council, however, is unable to provide troops. None of the large powers is willing to send soldiers there and consequently, no action has been taken. The relief supplies gathered at Tiffis, Batoum, and Erivan probably and the investigation to be made by Major General James G. Harbold on behalf of the American government will be of little use.

Veteran Reading Employes Victory Reunion Dance

TO ATTEND CONVENTION

Railroad Notes

Engine No. 1700, built at Reading several years ago, is making good records and has proved one of the best locomotives on the Reading system.

Jacob Wrenn, age 47, passenger conductor on the Reading, dropped dead on Sunday at Tamaqua.

Edmund C. White, a Reading veteran, whose home is in New York, died on Tuesday, a few hours after he received word that he had been placed on the pension roll. He was in service 37 years.

Eight freight cars were derailed near Lebanon yesterday on the Harrisburg Division of the Philaulphia and Reading Railway. Trains were delayed a short time.

The following residents of Lebanon reported for duty yesterday on the Pennsy: E. C. Moudy, Felton Luckenbill, R. J. Urich, J. H. Beoks, H. W. Moyer, D. N. Keenan and Elkton Zellers.

JAPS TO FLOAT **MILLIONS FOR** CABLE TO U.S.

American Businessmen Ex-

American Businessmen Expected to Help in the Venture

By Associated Press.
Tokio, Aug. 14—Prominent Japanese businessmen formally decided yesterday to float a 50,000,000 yen (about \$25,000,000) company, for the purpose of laying a cable line between the United States and Japan. This decision is the result of dissatisfaction which has been existing for a long time among businessmen on both sides of the Pacific with the present cable service which seems unable to handle the constantly increasing volume of traffic.

It is expected that the venture will be supported by businessmen of the United States and Japan and that the establishment of a new cable line will do much toward promotting not only trade between the United States and Japan, but also a better understanding between the two nations.

Newsprint Reclaiming Corporation

Owns the patents of a successfully demonstrated and practical process for removing the ink from old newspapers and with the addition of a small per cent. of pulp and sulphite will produce—right here at the source of supply:—

NEW NEWSPRINT

For \$30 Per Ton Less Than the Present Cost to City Newspapers.

Newsprint made from wood pulp will never be produced cheaper—on the contrary, if is going to steadily increase in price as the source of supply gradually gets farther away from the mills and the consumer.

It is proposed to Build a Modern Hundred Ton Paper Mill in New York

Remember this is a COMMERCIAL SUCCESS. Later it is planned to build mills in Chicago, Boston and Philadelphia and other cities.

SUPPLY PLENTIFUL

There is consumed daily in New York 1,200 tons of newsprint, which consumption increases annually at the rate of about 6%. This company will be reclaiming only one-twelfth of this amount, and, instead of bearing the vast expense of erecting mills way off in the timber lands-paying freight, etc.-will have its

Raw Material (Newsprint) Right Here and Increasing in Quantity Every Year

The Test of the Product

was first made on the presses of the New York Morning Telegraph, with Jespersen De-Inked, Reclaimed paper, made at Holyoke, Mass., in the plant of the American Writing Paper Company, in June, 1917. The second practical test was made on June 18, 1918, when a run was made by the New York Times from eight tons of Jespersen Paper, made at the Tidewater Mill of the New York Times in Brooklyn.

In both instances the high speed presses ran without a hitch, and there was no distinguishable difference in the paper from the paper made from pulp and sulphite.
