

MINERS WILL REFER DEMANDS TO COMMITTEE

Five Men From Each District Will Be Appointed on Commission

Wilkes-Barre, Aug. 20.—The tri-district convention of United Mine Workers of America has decided to refer the wage scale and other demands to a committee of fifteen...

The representatives of the three anthracite colliery districts Nos. 1, 7 and 9, of the United Mine Workers of America, yesterday went on record for a decrease of their working hours and for a boost of wages to sixty per cent. above the present level...

The demand represents the official claim of 14,000 workers, and it will be finally laid before the national delegates at the Cleveland convention in September.

John L. Lewis, acting president of the United Mine Workers of America, was called from Indianapolis yesterday to take charge of the anthracite workers' meeting.

Insurgents who have bolted the union and are still contesting the election of officers in district No. 1 attended yesterday's sessions, but remained quiet.

An effort will be made to tone down the anthracite demands before final action is taken at the convention. It is believed the curtailment of hours will be stricken out of the present demands...

GAS IN THE STOMACH IS DANGEROUS

Recommends Daily Use of Magnesia To Overcome Trouble Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stomach accompanied by flat full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrochloric acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to the most serious and serious stomach ulcers.

It is the worst of folly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach acids.

WANT RATES TO MAKE RAILROADS SELF SUSTAINING

Railway Executives Suggest Federal Board With Broad Powers

Washington, Aug. 20.—Recommendations of the Association of Railway Executives for return of the railroads to private operation under conditions that will insure adequate revenue and maximum service to the public were laid before the House Commerce to-day.

Congress, under the plan, would direct the Interstate Commerce Commission to regulate rates which would enable the railroads to be self-sustaining. The rate regulating authority to be vested exclusively in the Interstate Commerce Commission.

The proposed board also would have authority to distribute traffic when necessary to relieve congestion on certain lines, to require use of joint terminals when in the public interest, and, in times of national emergency, to consolidate all lines into a unified system.

The association recommended, Mr. Cuyler said, a great unification of public regulation of the railroads by broadening national control. It believed, he said, there should be exclusive national control of the issue of securities and the expenditure of new capital.

Not Bragging About the Program, but Just Wait and See What Happens

A "back to the land" movement will be fostered by more than two hundred Harrisburgers to-morrow afternoon, when the members of the Harrisburg Chamber of Commerce will go to Gettysburg, just back of Fort Hunter, for their annual picnic.

Other members are equally reticent, merely nodding knowingly when they are asked about the huge affair.

Finance Committee Approves Large Expenditures For Enlarged Program

The finance committee of the Pennsylvania Young Men's Christian Association, met yesterday in the Penn-Harris with Chairman W. D. B. Alney of the Public Service Commission, in the chair.

HURT IN COLLISION In a collision with a trolley car, John A. May, of Lemoine, was knocked from the wagon which was driving this morning at Sixteenth and Erie streets, and suffered a lacerated scalp.

Potash "Find" Found to Be Unimportant State College, August 20.—Dr. William Frear, professor of experimental agricultural chemistry and vice-president of the experiment station at Pennsylvania State College, announced to-day on his return from Tioga county that the potash "deposits" reported there are unimportant.

To Insure the High Quality of Transportation to which Packard Owners are Accustomed

IT is a fixed Packard principle that price is incident to quality. Price advances in Packard cars are never made for any other reason than to maintain the highest standards.

It used to be the fashion among manufacturers to think that quality was a matter of materials—to think that it could be maintained solely by purchasing high grade steel and lumber and fittings.

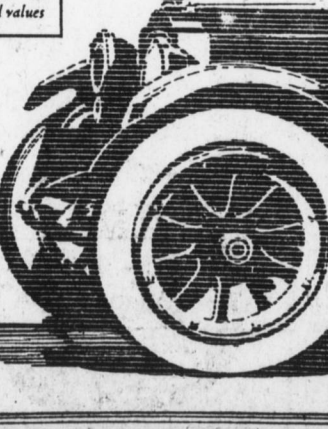

A Packard price advance is interesting to the present Packard owner because it draws attention to the cash value of his investment in transportation.
