

SHRINERS PLAN "HIYU HEEHEE"

Portland, Oregon, Lodges Prepare Big Time For Visiting Nobles

Portland, Ore., Aug. 28.—Just two months following the award at Indianapolis of the honor of entertaining the Imperial Council of the Mystic Shrine in June, 1920, Portland, Ore., Shriner have 24 committees at work on the plans of the big week of joy, and are beginning to shape their program of events. The city council has ordered the construction of adequate comfort stations to care for a crowd of 100,000 wearers of the red fez, the county commissioners are moving to appropriate \$45,000 from the county treasury to help put on the two special parades that will supplement the daylight and night parades. The city and State there is existing an intense desire to make the Portland meeting the "hiyu heehee" or biggest time, in the history of the Imperial Council.

The medicine men of the Indian tribes say that the bands of deer on the hills will be fat enough to furnish the best of venison for the same dinner, and that 1920 should see the return to the Columbia river of the great run of salmon that happens once in every five years. That means unusual quantities of shell fish along the Pacific Coast, and that the Allah of the berryfields and the orchards will be in this vicinity to cover the land with luscious fruits. There will be a large rest room, ample facilities of all kinds, a post-office, an express office, a battery of free telephone booths and half a hundred typewriters with a handsome girl at every one of them. It will probably be a plain board building of temporary construction and it may occupy a street, but it will be there as the center of all activities.

One of the two unique features already assured for Portland will be a cowboy polo on horseback. It will be made up of members of Al Kader from Pendleton, Ore., all expert riders and representatives of the "wild West" that use to be. The other is to be composed of Indians, with a band of their own, playing their tribal musical instruments so that their music, blended with the strains of the Pavalowskis can exhibit their conceptions of what real dancing should be.

Polynesian Boys Fought in Soissons Sector With Yanks

Papeete, Tahiti, Aug. 28.—Many Polynesian boys, returning as veterans of the World War wear the Croix de Guerre and some the French Military Medal. They have many friends among the American Expeditionary troops. In the last great battles they were in the Soissons sector beside the United States fighting men.

THADDEUS RIPLEE DIES

Waynesboro, Pa., Aug. 28.—Thaddeus Ripple died at the home of Herman Hess, Roadside, near Waynesboro. He was 63 years of age. He was born at Rouzerville. For some years he resided in Philadelphia.

IF THIN AND NERVOUS, TRY PHOSPHATE

Nothing Like Plain Bitro-Phosphate to Put on Firm, Healthy Flesh and to Increase Strength, Vigor and Nerve Force. When one stops to consider the host of thin people who are searching continually for some method by which they may increase their flesh to normal proportions by the filling out of ugly hollows, the rounding off of protruding angles, with the attendant bloom of health and attractiveness, it is no wonder that many and varied suggestions along this line appear from time to time in public print. While excessive thinness might be attributed to various and subtle causes in different individuals it is a well-known fact that the lack of sufficient phosphorus in the human system is very largely responsible for this condition. Experiments on human and animals by many scientists have demonstrated beyond question that the amount of phosphorus in phosphorus becomes nervous, sickly and thin. A noted author and professor in his book "Chemistry and Food Nutrition," published in 1918, says that the amount of phosphorus required for a normal nutrition of man is seriously underestimated in many of our standard text books. It seems to be well established that this deficiency in phosphorus may now be met by the use of an organic phosphate known throughout English speaking countries as Bitro-Phosphate. Through the assimilation of this phosphate by the nerve tissue the phosphoric content when absorbed in the amount normally provided by nature soon produces a welcome change in our body and mind. Nerve tension disappears, vigor and strength replace weakness and lack of energy, and the whole body soon loses its ugly hollows and becomes enveloped in a glow of perfect health and beauty and the will and strength to be up and doing. CAUTION:—While Bitro-Phosphate is unsurpassed for the relief of nervousness, general debility, etc., those taking it who do not desire to put on flesh should use extra care in avoiding fat-producing foods.

TAKES ACTION ON WHEAT PRICES

Head of Grain Corporation Discusses Situation in Regard to Grading

New York, Aug. 28.—Announcement that the United States Grain Corporation will at once declare the basis on which it will purchase the various lower qualities of wheat has caused a sharp rise in prices received by farmers for wheat with various members of Congress, representatives of farmers' organizations and vice presidents of the grain corporation. At the close of the meeting Mr. Barnes stated that the grain corporation would follow this course as a protection to the producer against under-payment of the proper relative value of his wheat and in order to reassure country buyers of the ultimate value of lower grades on arrival at the terminals. For two years it has not been necessary for the grain corporation to announce a basis on which it would buy lower qualities because of the preponderance of high grades of wheat in past crops.

Consider Producer First The Wheat Director urged that every possible consideration be given the producer, unfortunately now in the character of his yield, and the establishment of a basis as close to the guarantee price of No. 1 as could be justified by interpretation in favor of the producer of each practical doubt.

In discussing the conference, Mr. Barnes pointed out that the relative prices which the grain corporation might fix would bear a relation to the guaranteed price at the terminal markets only and not to the current prices which in such markets as Minneapolis are ruling 30 to 40 cents above the guaranteed basis and that no attempt would be made by the grain corporation to reflect any premium basis above the actual guaranteed price. He added that with the execution of 170,000 contracts between the grain corporation and country mills and dealers, any producer who felt that he was not being fairly treated in grades and price could, by submitting a sample through the mails, receive a decision, binding on the buyer, as to the proper relation to the guarantee No. 1 price at the terminals, but not as to its relation with any premium basis currently ruling in the terminals and outside of the grain corporation buying.

Thrashing and marketing in the Northwest have now reached a stage demonstrating the large proportion of the crop shrunken and damaged by heat and premature ripening. Flour qualities of much of this wheat appear to be excellent owing to its high gluten strength and low per cent of moisture content. Because of this shrinkage in the berry, many producers in the Northwest are securing yields as low as four to six bushels, where fifteen to twenty had been confidently expected.

Dr. Ladd, of North Dakota, presented at the conference tables showing exhaustive experiments made in 1916 by the Agricultural College of North Dakota. He expressed the conviction that the quality of No. 4 wheat in the Northwest indicated a value for actual milling of within 10 cents per bushel of the No. 1 price. The grain corporation will announce a scale of relation to their No. 1 price for lower qualities, probably tomorrow, and thereafter country buyers must pay to the producer not less than the freight and handling charge relation to the grain corporation terminal prices so given.

Will Give 3-Year Credits to Belgians

Brussels, Aug. 28.—Several American and English houses have arranged to give credits for three years to the Belgian buyers, who, now that industries are beginning to work again, are in need of a great variety of raw materials and many manufactured articles. The Minister of Economics has prepared a report in which are listed the materials wanted. They include materials for lining coal mine shafts, cables and machines used in coal mining, steel and galvanized wire, sulphuric acid, heavy tar oil and special coal for coke to be used in coke ovens; iron ore and tools for blast furnaces and rolling mills, flux for textile industries, sulphate of soda for glass works, sides of a quality not found in Belgium for tanneries; pulp, spruce and Norway pine for paper mills.

Will Discontinue Old French Army Quarters

Paris, Aug. 28.—The General Headquarters of the French Army, established August 2, 1914, at Vitry le Francois, soon will be discontinued after five years of varying fortunes, vicissitudes, reverses and victories. It will now be superseded by the old French Supreme War Council, with headquarters at the Military School in Paris. Marshal Petain, it is understood, will drop the title of Commander-in-Chief to take that of Chief of Staff, which Joffre held at the beginning of the war.

Mexico to Welcome Immigrants of Europe

Mexico City, Aug. 28.—The newspaper Excelsior says it learned officially that Mexican consuls in the principal European capitals have been instructed to give all possible aid to prospective immigrants and that during the month of September "excursions" will be run from both Germany and Belgium. The Secretary of Agriculture told El Excelsior that the Japanese, about whose alleged colonization schemes there has been so many rumors, would be admitted on equal footing with other foreigners.

NEW CUMBERLAND

Mrs. Levi Ebersole, of Hummelstown, is spending a week with her sister, Mrs. Harry Sweeney. Mr. and Mrs. Jacob Shank and daughter, Mr. and Mrs. Walter Detra, and E. Ebersole, of Elizabethtown, were guests of Mr. and Mrs. Lester Cook in Market street, New Cumberland, this week. Mrs. John Sweeney, New Cumberland, spent several days at her home in Penbrook. Mrs. May Free, of Philadelphia, is visiting friends at New Cumberland. Mrs. Louise Swarthout, of Coatesville, who have been visiting Mrs. S. M. Smith at New Cumberland, returned home. Robert Senseman, of Detroit, Mich., was in New Cumberland this

Gas Turbine, Now Made by Germans, Is French Discovery

Paris, Aug. 28.—The gas turbine, which a large German company is reported to be manufacturing, it

is claimed here, a practical application by Germans of French discoveries. The principle of this turbine was worked out by French inventors but the trials and experiments were interrupted by the war. Briefly, the engine consists of a spherical combustion chamber to which vaporized gasoline and air are admitted by separate pipes and

exploded, as in the ordinary gasoline motor, by an electric spark. Another pipe conveys the jet of gas against the vanes of a turbine enclosed in a metal casing to which the propeller is directly attached. It is claimed that the turbine motor gives the same power as a piston motor on half the gasoline. The engine is said to be much lighter

than the ordinary airplane engine and to make little noise. TAKE CENSUS OF MEXICO By Associated Press Mexico City, Aug. 28.—President Carranza has ordered that a general census of the republic be taken next year.

RURAL CARRIER QUILTS Chambersburg, Pa., Aug. 28.—Because the wages of mail carriers have not been advanced in proportion with those in other industries and in proportion to the cost of living, C. W. Durr, carrier on rural route No. 5, has resigned.

"The Live Store" "Always Reliable" It's More Important Than You Might Think

That you give the deepest consideration to your clothing needs. Don't be misled and carelessly put off buying with the idea that perhaps, after all, the manufacturers are mistaken when they foresee higher prices on all clothing. The fact is, they know for a certainty already what they have been compelled to do in adjusting their prices. They can't help themselves any more than the individual. They're up against the most serious conditions that have ever confronted them; they don't know which way to turn. The shortage is giving most manufacturers many a headache; they are anxious to please their clients, but can't deliver the goods unless they are made.

That's where the rub comes in, getting them made, keeping up with the demand. The small manufacturers will have all kinds of trouble to deliver merchandise. The big operators are in a better position, but, even so, it's no picnic for them to keep supplies coming through in sufficient quantities to satisfy everybody. If you use good judgment, you'll buy clothing now or in the early Fall; but, if you are anxious to save on good clothing, you had better decide to come to this "Live Store's" Semi-Annual.

Mark-Down Sale

Where Everything Is Marked Down (Except Arrow Collars and Interwoven Hose)

We know it's going to cost more to replace our stocks, but, regardless of all this, we are disposing of all Spring and Summer stocks in order to make room for incoming Fall goods. We have an established policy to carry nothing over from season to season. That's why you can buy at such low prices in our final Clean-Up Sale. You make the profits. They're here for you and your friends, and, if you buy now, you'll save a handsome sum that can be used to many advantages these days.
