

MAKE FLASHLIGHT BATTERIES WHEN THEY ARE NEEDED
With a fresh battery, the popular electric flashlight is beyond criticism. Unfortunately, the battery does not stay fresh, deteriorating even if not used. An enterprising manufacturer has taken advantage of this opportunity to put on the market an outfit for making batteries as they are needed. The outfit consists of six empty zinc cells, six carbon electrodes, surrounded with depolarizer and surmounted by a cork, and materials for the electrolyte. The ingredients keep indefinitely. The cells are supplied in standard size.—Popular Mechanics.

Simple Home Remedy Advised For Rose And Hay Fever

Anyone Can Make a Pint For Trifling Sum and Used in Time May Prevent Annual Attack

"No matter how severe your yearly attack be, no matter how distressing or humiliating—its intensity can be reduced to a harmless, mildness."

Kentucky druggist who believes from what he has seen that this simple home made remedy is a most important discovery.

He has seen the most severe and apparently unmanageable cases reduced to what might be called a mild cold in twenty-four hours.

In many cases where the patient started treatment a week or ten days before the expected attack the unwelcome yearly visitor failed to appear with anything like its usual intensity.

People who want to try this new treatment can make a pint in a few minutes.

Four one ounce Mentholized Arcline into a pint bottle then fill the bottle with water that has been boiled. Gargle daily as directed and sniff or spray the nostrils twice daily.

That's all there is to the treatment which so many sufferers have found to be a true friend.

Mentholized Arcline in one ounce vials is dispensed by all the better pharmacies.

FASCINATING TEETH

How Every Woman Can Quickly Charm Her Friends With Lovely Teeth, Clean, White and Brilliant

If you want the cleanest of white teeth and healthy gums free from disease, an easy and quick way to get both is to use a tooth paste so effective and perfect that astonishing results usually come in a week's time.

And the cost is so little. Just go to any drug or department store, and get a large tube of SENRECO TOOTH PASTE for 35 cents.

Not only will it make your teeth clean and white, but it will at once remove any filmy coating, help to check the ravages of Pyorrhea and banish acidity in the mouth.

It is used by thousands of dentists and its sale has been remarkable. When you visit your dentist, which you should do at least twice a year, ask him about SENRECO. It's a most delightful and refreshing tooth paste.

NEWS AND NOTES OF THE BOY SCOUTS

THE WIGWAM

SEPTEMBER
Hats off, Scouts! Have a big cheer when we greet the month of all months—September!

Summer is over. The fellows are rushing back from camps, summer resorts, and farms. The old troops that have been creeping through the hot months with six or seven members at a meeting will look like home again when the fellows all crowd in.

And—oh boy! Talk about over-night hikes, campfires, cornroasts, marshmallow toasts, and days in the mountains and woods. Say, fellows, can't you see the sumac and the Virginia creeper turning red in the golden September sunlight? Can't you see the burrs growing on the chestnut trees? The soft haze of autumn is in the air; the golden red is waving in the fields; the broad leaves on the cornstalks are turning brown; mosquitos are gone; there is a pep and snap in the early morning air; and a delightful chill at dusk that makes us hug close to the campfire and appreciate its warmth—all these are the things that make September dear to the heart of the scout. And what promises the month holds! As the golden leaves drop from the branches and float lazily to the ground we look forward to the first frost which will bring down the chestnuts and ripen the pumpkins. The pumpkins ripening in the fields hold forth a delicious promise of golden pies and Thanksgiving Day. We know that old King Winter is on his way to visit us and our blood tingles as we think of skimming over the frozen lake, while a silver moon sailing in the cold winter sky and the glowing fires along the shore make a picture which words cannot describe.

Hats off, Scouts! While we greet the month of months in the Scout Calendar. Hats off to September!

By RED CLOUD.

TROOP 8
James Brooke, patrol leader of the Eagle patrol, Troop 8 was pleased to announce that he had secured a new member.

TROOP 16
Troop 16 will meet as usual to-night at 7:30 and as usual there will be something doing. Last week thirteen fellows were present and after some games the room was darkened and a ghost story was devoted to the telling of ghost stories. "Bill" Criswell told one he heard at the scout camp and became the tale was a hummer. We regret that some of "13" were not present. Mr. Hunsberger from his position as field executive, and I suppose he is just about as sorry to give up his position as you are to give up yours. He helped so many of our fellows in first and second class work that we feel so deeply indebted to him that we wish him success in his new venture.

By the way, this is the last week of vacation and also of meetings held at night. Our attendance next week should increase by at least ten. You scouts who have spent the summer out of town don't forget that your place is open and we'll welcome you gladly to lend an ear to the story of your life.

On September 12 we will have one of our old-time fifteen cent meetings. Let's all put our shoulders to the wheel and start things moving.

HUSTON, Scribe.

Western Strike Is Crumbling as Result of Warning From U. S.

By Associated Press.
San Francisco, Aug. 29.—The strike of railway men in the extreme west and southwest, from indications, was crumbling to-day, following the warning of Walker D. Hines, director general of railroads, that if they did not operate trains by 7 a. m. to-morrow, the railroad administration would undertake to do so.

San Francisco yardmen, out about 36 hours, agreed to return to work at 8 o'clock this morning. Strikers at San Jose, Tracy and Oakland, returned to work last night.

Resumption of work at Los Angeles awaited approval of meetings to-day of union officers and locals they represented.

At San Bernardino, where members of the big four brotherhoods are out, the engineers were said to have expressed willingness to return to work, but were bound by an agreement that all four crafts would return together, while other crafts continued to oppose a return.

Meanwhile, traffic continued virtually paralyzed from Albuquerque, N. M., and Yuma, west to Los Angeles, and for a considerable distance north and south of that point on all lines.

No alleviation was reported from desert towns, dependent upon rail transportation for water for domestic purposes.

Automobiles still were being used to handle mail in many instances.

Washington Awaiting Strike Developments

By Associated Press.
Washington, Aug. 29.—Although it was thought that the drastic action threatened by Director General Hines together with the supporting stand taken by officials of the brotherhoods involved would hasten the return to normal conditions, developments to-day in the railroad strike situation in California and other western states were being awaited with keen interest here.

Mr. Hines in a statement addressed to public officers, railroad officials and employees and citizens in general, in the three states served notice that all striking employees who failed to return to work by the time limit set would find their places filled and that any one who interfered with or impeded the use of railroad property would be prosecuted for having committed an offense against the United States. His action was considered the most drastic ever taken by a Government agency in dealing with a labor situation.

FEMALE MOSQUITO DOES ALL THE DEADLY WORK

The male mosquito does not bite; his bill is so blunt that he could not pierce a blood vessel. It is the female mosquito that does all the deadly work of fever, procreation, according to a writer in the Scientific American.

In the autumn the males die, and the females seek winter quarters. They hibernates in dark corners of cellar and garret, and on the first warm day of the spring are out laying their eggs. Save when extended by the arrival of this hibernating period, the life of the female is one or two months; the male, on the other hand, lives but a few days. The food of the mosquito is the juice and nectar of plants and, of course, blood—do not necessarily that of man; animals, reptiles, and even caterpillars are bitten with the same freedom.

The female mosquito lays from 50 to 100 eggs at a time in any quiet bit of water. In about three days they hatch, and though the larva is very small, it grows rapidly and attains full development in a few days. We have seen the familiar wrigglers of the old-time rain barrel and the uncovered cistern.

During the larva stage, which lasts from seven to fourteen days, the material variety can be distinguished from all others by the curious incline by virtue of the fact that it lies with its body parallel to the water, while other species hang with their heads downward.

FIRST AID GIVEN BY BOY SCOUTS

Woman in Distress Finds the Youngsters Are "Right on the Job"

The following letter is one of many good reports that scout officials are accustomed to receive expressing the appreciation of services rendered by Scouts:

Mr. John German, Scoutmaster Troop 13, Harrisburg, Pa.

Mr. Dear Mr. German: May I report the "good turn" of two of your scouts—Krause and MacLaughlin? On Tuesday on my way in town, while going over State street bridge I got a piece of coal in my eye, and by the time I arrived at the Square I was suffering very much with it. I didn't know what to do until I remembered that the Scouts had been called for duty at headquarters that day and judged that some of "13" were there. I found them right "on the job" and in a few minutes I was fixed up as well as any doctor could have done it.

I think it mighty fine that the city has one dependable place to look for first aid and until they get the comfort station.

I was afraid the boys would not report their good turn and wanted them to have the credit.

Sincerely yours,
MRS. KELLER.

TROOP 28
A small number of scouts of Troop 28 met at our last meeting, and as the scoutmaster was out of town, I took them out on a hike over the hills north of Derry street to what is now the new driveway from theervoir to Derry street. We were very glad to have with us R. W. Smith, who is desirous of connecting himself with the troop. His brother Weston is one of our most loyal members.

We scouted around for some wood and built a fire on the hill just off the drive, around which we had a very successful meeting. Many in-

KIPONA

Nothing can happen in the city without the Scouts participating in some way. This is also true of the big Kipona celebration next Monday. Those in charge of the affair have requested all the Scouts of the city to be on duty during the afternoon. Hence a request has been issued to all Scoutmasters, asking that the Scouts report at Scout headquarters at half past twelve on Monday afternoon.

Those who have passed first class tests, or are proficient swimmers will be assigned to special duty. Other Scouts will be given the task of patrolling the water front and keeping little children from falling into the water. A squad will be assigned to act as orderlies, and another group will assist the committee in charge of the swimming. A special squad of signallers will send messages to the various departments. This will be an opportunity to put signallers into active practice. Of course, all Scouts should report in uniform, if they possess them.

Interesting tales were told, and at last the fire was put out and we started down the driveway toward Derry street. As a scout is a brother to every other scout, some of us took turns carrying Scout Nune-macher who had tramped on a rusty nail.

We hope that our meeting to-night will show that the members of Troop 28 are in for scouting with both feet.

AMOS NYE,
Assistant Scoutmaster.

A FRIEND IN NEED
Mrs. Flatbush—Who is that man with the red nose you just bowed to west?

Mr. Flatbush—Oh, he's a man I met out West.

"He is certainly not a prohibitionist is he?"

"Why I never had occasion to ask him, dear."

"But how did you happen to meet him?"

"Well, we were traveling out of Milwaukee on the same train one night. He had a bottle and I discovered that he had a cork-screw."—Yonkers Statesman.

NEW COURSES ARE ADDED AT TECH

Nearly 750 Boys Will Take Up Studies at High School Next Tuesday

When the Technical High school opens Tuesday morning, four former Harrisburg teachers will greet the incoming students of the Walnut street institution. Three of the instructors are former Tech tutors who served in the war. J. E. Belt, teacher of English, will have six sophomore sections. Mr. Belt has spent fifteen months in France as a Y. M. C. A. secretary.

John D. Renninger will teach Latin and French. He returns from two years' service in France at the general headquarters at Chaumont, where he acted as an interpreter. J. Clyde Zeigler will teach sophomore English. He was located at an arsenal below Baltimore. Fred Burrus will come to Tech from the Central High school where he was teaching prior to entering the Navy. He will have charge of the new-ly installed commercial course at Tech. Sections J and K will pursue business courses in rooms 12 and 13.

Already books have been sent to the various rooms of the building to which the sections of the school will be sent to receive their supplies Tuesday morning. There will be but three classes, all the students belonging to the sophomore, junior and senior classes. The first year boys will go to the Junior High school, and the absence of the "greenies" will mark the inception of the Senior High schools.

According to Dr. Charles B. Fager, Jr., principal at Tech, there will be an enrollment of about 750 boys. They are instructed to report Tuesday morning at 9 o'clock. Entrance examinations and re-examinations were held Wednesday, Thursday and Friday of this week.

Another new course inserted into the curriculum at Tech will be an industrial course elected by a group of thirty boys. This course will have the teaching of a trade as its objective. This year's group will assemble in pattern making.

Overcrowded conditions at Tech the past several years made daily chapel exercises impossible. Meeting together in the auditorium every day will be one of the features of the program, where school spirit is injected into the student body. The school day will begin at 9 o'clock and close at 2:45. Lunch will be served to the students in the basement by S. S. Rutherford, and the entire student body will be served during one period instead of two periods as was the custom last year.

The "hobby" clubs will feature school life at Tech. These organizations will meet every Thursday just prior to the lunch hour. Tuesday morning at nine is the time, and Walnut and Aberdeen streets is the place for all Tech High boys.

INDUSTRY
"What led you into politics?" "My industrious nature," replied Senator Sorghum. "I was determined not to be idle and it didn't seem as if I could get a regular job any other way."—San Francisco Chronicle.

MRS. DOOLEY'S ADVICE TO WORKING GIRLS

Milwaukee, Wis.—"I wish all girls who work and suffer from functional disorders would profit by my advice and take Lydia E. Pinkham's Vegetable Compound. Before I was married when I came home from work at night, I would be just worn out with pains which dragged me down. I took Lydia E. Pinkham's Vegetable Compound and it made me feel like a new woman. I can work from morning until night and it does not bother me, and I wish all girls who suffer as I did would try Lydia E. Pinkham's Vegetable Compound."—Mrs. H. Dooley, 1135 25th St., Milwaukee, Wis.

Working girls everywhere should profit by Mrs. Dooley's experience, and instead of dragging along from day to day with a burden, give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. It has overcome just such conditions for thousands of others, and why not for you? For special advice, write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years' experience is at your service.

Feet Hurt?
New Treatment Gives Soothing, Cooling Comfort at Once.

To freshen, cool and comfort hot, tired, aching, swollen, sweaty feet, just rub in a little Georo Wormwood ointment (like a vanishing cream) once (oh! how cool and fine your feet will feel. Gives real, honest foot comfort, and it is so easy and pleasant to use. Rub it in—That's all, it doesn't take a minute.

Just the thing for a stinging, burning corn or bunion and for sweaty, swollen, offensive smelling feet. A package of Georo Wormwood Ointment costs little at H. C. Kennedy, Geo. A. Gargas, C. M. Foreney, Croll Keller or any good drug store and will last for weeks.—Advertisement.
