SHOULD TAKE

Judging from the countless pre-parations and treatments which are continually being advertised for the purpose of making thin people fleshy, developing arms, neck and bust, and replacing ugly hollows and angles by the soft curved lines of health and beauty, there are evident thousands of men and women who keenly feel their excessive thinness. Thinness and weakness are often

due to starved nerves. Our bodies need more phosphate than is contained in modern foods. Physicians claim there is nothing that will supply this deficiency so well as the organic phosphate known among druggists as bitro-phosphate, which is inexpensive and is sold by most all druggists under a guarantee of satisfaction or money back. By feeding the nerves directly and by supplying the body cells with the necessary phosphoric food elements, bitro-phosphate should produce a welcome transformation in the appearance; the increase in weight frequently being asserted in the increase in weight frequently being asserted in the increase in weight frequently behalt. Nervousness, sieeplessness and lack of energy, which nearly always accompany excessive thinness, should soon disappear, dull eyes ought to brighten, and pale cheeks glow with the bloom of perfect health. Miss Georgia Hamilton, who was once thin and frail, reporting her own experience, writes: "Bitro-Phosphate has brought about a magic transformation with me. I gained 15 pounds and never before felt so well." CAUTION:—Although bitrophosphate is unsurpassed for relieving nervousness, sieeplessness and general weakness, it should not, owing to its endency to increase weight be used anyone who does not desire to put flesh.
