RELICS OF ARAWAKS When in 1494, on his second voy age. Columbus discovered the island they forced the of a scientific society, to recover all pendants and axes—1,500 objects in all, which have been given to that end explorations have been given to that end explorations have been for the of a scientific society, to recover all all, which have been given to that end explorations have been for the or have been found, be the six of the most in the gold mines of that in the old kitchen middens, tory in New York city. To the anthropologist the most in the six of have been found, be the six of the most in the gold mines of the six of the severy morning and bine raticles hitherto unknown to them. When later the Spaniard as the whole later the Spaniard severe made, under the auspices for the auspices f by Garrett P. Serviss The person who possesses strong imagination does not need to go to a ater is order to enjoy Shakespeare WE SELL FOR LESS bis hand, he is independent of the whor and the stage manager. This some elemental power ou the imagina-tion frees the mind from the limita-tions of time, also. Knowledge of his-tory would be impossible without it. One reason why historians disagree so much is because of the immense share that imagination necessarily has in their work. They can describe only what they mentally visualize, but 'winntal as well as physical sight varies of the persons. If, as lawyers know, two catual witnesses of the same occur-rence never see it exactly alike, how could we expect two persons to form an imaginary picture of an unwit-nessed scene or event in exactly the same way? However, this is aside from what 1 set out to write. The imagination being free of time limitations and of wander wherever we will in the uni-verse and relieve its whole life, as far his hand, he is independent of the MANUR MARY MEN'S \$1 .65 6 Suits 'S MEN \$1 Q.50 1 Suits 1 MEN'S \$99.50 being free of time limitations end space limitations likewise, we c wander wherever we will in the u verse, and relieve its whole life, as as we can get clues. We can, not of po back through geological ages, a plecing together the bits of evide which the rocks afford, reconstruct most dramatically interesting see which occurred on this earth mill of years ago, but with the hints rived from another line of evider we can follow the earth in its am ing adventures as a chaser of the s We are carried 400,000,000 m ber year toward the region where 1 shines the star Vega, in the north sits motion of the earth, disregar-its annual spiralling around the which is merely an incident, follow straight line in space. Probably real path is a very long curve. Suits MEN 'S \$90.50 TITT FRIDAY FRIDAY 13 12 11 12 15 Suits 40 Up to \$35 AND Our Men's Clothing Department can save up dollars on every suit you buy here. The materials and styles are all leaders. Come SATURDAY SATURDAY in and see our suits. MEN'S \$1.98 straight line in space. Probably real path is a very long curve, for the present let us regard it 428-430 Market Street No. \$ 3 Pair 50c R. & G. Corsets Pants straight. Four hundred million miles seems a vast distance. It is about four and a third times the width of the space between the earth and the sun. But compared with remoteness of even the nearest stars it is so slight that to ordinary observation this amount of change in the position of the earth has no effect upon the apparent posi-tions of those stars. When we reckon star distances in miles we have to use trillons instead of millions, a trillon being a million millions. Thus Alpha Centauri is about twenty-five trillion miles away, and Sirius about fifty trillions. Vera is probably two hundred trillion mile distant. Yet magnify the time units enough and a very different as-pect is put upon the matter. Thus, while the 400 million miles traveled northward by the earth in a year is not enough to make any noticeable difference in the brightness of Vera during a human lifetime, or even in a thousand years, yet if we use geo-logical time intervals all this is changed. In a million years the earth will raight. Four hundred million miles s vast distance. It is about Suspenders Dollar Days at Salkins are the days that we offered "Golden Rule Val-In pink, with four Y \$9.95 MEN'S For men.
