

### FIRST HOLIDAY IN FIVE YEARS

#### Marshal Foch Wearing Civilian Clothes on Estate Near Brest

Paris, Sept. 8.—Marshal Foch is enjoying the first holiday he has had in five years. On his estate at Morlaix, near Brest, the Generalissimo of the Allied armies is living the simple life, dressed in loose weeds and wearing a cap, only retaining his leather leggings as a reminder of his uniform.

The Marshal is a great lover of hunting and partridges are thick in the woods of Brittany. But the Marshal disconsolately watches them flutter about with impunity. It will not be open season for hunting in France until September 15. It was open season for the enemy for five years and the Commander-in-Chief of the Allied armies never missed a day. Some newspapers are asking that an exception be made in favor of Foch, one of them adding naively that "as he has rendered slight service to his country, in ridding it of the Germans, he might be allowed to deprive its woods of a few partridges."

When it became known that Foch was going to Morlaix, the mayor and city councilors at once made elaborate plans for the reception. They assembled at the house of the mayor and commenced marching down to the station when some one remarked that the hour at which the train was due had passed.

### National Forest Policy Is Needed, Pack So Declares

Washington, Sept. 8.—Standing against anything except co-operation on the part of the National Government in the National forest policy, through George H. Wirt, chief forest fire warden seconded by Robert S. Conklin, commissioner of forestry, expressed her official position on this great economic question in the first of a series of articles in the American Forestry Magazine. Charles Lathrop Pack, president of the American Forestry Association, has called for a Nation wide expression as to the best features a National forest policy should comprise. "All that a National forest policy is needed," says Mr. Pack, "for the new growth of timber is not more than one third the amount being used or destroyed each year."

### Why you need Resinol Ointment

The same soothing, healing, antiseptic properties that make Resinol Ointment so effective for skin eruptions, also make it the ideal household remedy for:

Burns	Ulcers
Scalds	Felons
Cuts	Pimples
Scratches	Cold-sores
Wounds	Chafings
Bruises	Stings
Sores	Fles
Boils	Irritations

And a score of other troubles which constantly arise in every home, especially where there are children. That is why Resinol Ointment should be on your medicine shelf, ready for immediate use.

Sample free: Your druggist will send you a sample and a miniature cake of Resinol Soap, write to Dr. J. H. Resinol Chemical Co., Baltimore, Md.

Use McNeill's Cold Tablets. — Adv.

## Asserts New Discovery Brings Blessed Relief to Rose and Hay Fever Sufferers

#### Can Make It Yourself at Home at Trifling Expense

In spite of all the doubters and scoffers a man in Kentucky, who changed his annoying and distressing hay fever into less than a mild cold, claims most emphatically that if taken in time hay fever can be conquered or at least made so harmless that it is not even bothersome.

He gave his discovery to scores of other sufferers with the most remarkable result and has recently been prevailed upon to dispense it through pharmacists to all hay fever sufferers who still have faith that nature has provided an effective remedy for this common yet miserable disease.

And, best of all, this remedy costs almost nothing. Get a one-ounce bottle of Mentholized Arcine at any drug store, pour the contents into a pint bottle, fill the pint bottle with water that has been boiled. Then gargle as directed and twice daily sniff or spray each nostril thoroughly.

That's all there is to it; so simple that a lot of people will say that it can't do the work; but a hundred simple natural remedies are the best as you will find after using.

If you will make up a pint and use it for a week or ten days you need not be surprised if your unwelcome yearly visitor fails to appear.

## Put Value Into Buildings

IT IS JUST as important that you use good lumber for framing and joists as it is to select good material for inside trim, hard-wood floors, etc.

True the framing is not visible to the eye, but its quality tells as time goes on.

It never pays to let price influence you when buying lumber. The "cheap" Lumber often turns out most expensive.

### STRIKERS IN ITALY STIR STATESMEN

#### Government Agencies Fail to Function, It Is Charged; "Rule Without Rule"

Rome, Sept. 8.—Intermittent and sporadic strikes, which have produced thorough Italy conditions in some instances approximating bolshevism, in others a kind of socialism and in still others localized anarchy, have given Italian political economists and statesmen new spurs to study and remedial action.

There has been "rule without rule," according to foreign observers. The government agencies long established for the administration of public affairs existed but failed to function. Municipal authorities, communal officials and representatives of the state admitted they were helpless to deal with the unusual situations which rendered inactive the prerogatives of those in power. Striking workmen forced demands upon a helpless commercial class, it is pointed out, while the authorities merely looked on "in obedience to the will of the disturbers."

The organizations throughout Italy that planned the newest departure in governmental and economic administration were styled Camera del Lavoro. A liberal tradition would define them as Chambers of Labor, but their functions went much beyond the province of labor, as one ordinance concedes. They have extended so far that prices were arbitrarily fixed and the sale of commodities ordered.

The merchant seems to have been the one who has suffered most by the "adventure." His stocks were commandeered by the Camera del Lavoro, if he did not show the disposition to sell at the prices fixed by that organization. In most cases, the arbitrary reduction of 50 per cent was exacted on all commodities regardless of the cost of the goods and the condition of the market or the rate of foreign exchange or any of the factors which determine selling prices.

### Garden Cities to Be Built Around London

#### London, Sept. 8.—Millions of pounds are to be spent in the creation of a system of industrial garden cities which will surround metropolitan London. The scheme, just outlined, is the most elaborate city-building project ever undertaken in England and is the adaptation of the modern industrial town idea originated some years ago in the United States.

Building on the first of these "flower garden" suburb cities is to begin next year north of London, according to newspaper announcements. The town will be self-supporting and will cover several thousand acres. Within its precincts will be an agricultural area. Its population will be supported by several engineering industries to be located there.

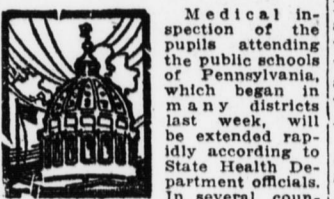

The project is an attempt not only to solve London's housing problem, which has become a grievous one, but to prevent an overwhelming congestion of the city's industries and other commercial activities.

### Krupp Plant to Turn Out Locomotives

Cologne, Sept. 8.—The great Krupp firm of armament manufacturers has begun to center its attention on preparations for government contracts for the construction of locomotives and railway cars, according to German trade journals. The firm has agreed to give the government part control of the superintending. One of the first contracts calls for 100 locomotives and 2,000 cars. Directors of the Krupp works are also endeavoring to obtain contracts in other branches of iron construction in order to bring all of its factories up to at least a part of its activities during the war.

### MEDICAL MEN IN SCHOOL WORK

#### More Inspectors Named to Carry Out the Examinations of the Public School Pupils

Medical inspection of the pupils attending the public schools of Pennsylvania, which began in many districts last week will be extended rapidly according to State Health Department officials.

In the initial counties, which began in many districts last week will be extended rapidly according to State Health Department officials. In the initial counties, which began in many districts last week will be extended rapidly according to State Health Department officials.

The following additional medical inspectors have been appointed: Drs. C. C. Ross, for Frankford Springs, Georgetown and Hookstown boroughs and Racoon, Potter, Hanover, Independence and Greene townships, Beaver county; W. W. Carrier, Beaver township, Jefferson county; William C. Brown, Burnside and Westover boroughs, Clearfield county; Dr. Adelbert D. Dye, Horton township, Elk county; A. F. Shero, Union City, Watsburg and Mill Hill boroughs, Union county; LeBoeuf, Amity and Venango townships, Erie county; George H. Robinson, Marleysburg borough; Wharton township, Wharton Independent district, Fayette county; R. A. Gans, Greensboro and Monongahela townships, Greene county; E. M. McLean, Lewis Run borough; Bradford, Corydon and Foster townships, McKean county; L. W. Dolan, Hamilton and Wetmore townships, McKean county; J. C. Borland, Falls Creek borough, Washington township, Jefferson county; I. D. Bowser, Winslow township, Jefferson county; C. N. Mills, McCalmont township, Jefferson county; and W. A. Ostrander, who recently returned from the army, will have charge in Smethport borough and Keating and Norwich townships, McKean county.

### Many Letters For Yanks in Siberia Are Going Astray

#### Vladivostok, Sept. 8.—Hundreds of letters intended for American soldiers in Siberia have gone astray because of incorrect addresses, according to S. A. Cislter, United States postal agent in Siberia, who was sent here with the American Expeditionary Forces to look after the mail for the doughboys. Many letters intended for Siberia were sent to Archangel when American troops were there, and many letters intended for Archangel were sent to Vladivostok.

The correct address for letters to Siberia is: Name, unit, A. E. F., Siberia, via San Francisco. Writing the unit to which the soldier belongs in the address saves at least 24 hours in delivery of mail upon reaching the A. E. F. base in Siberia. Mail addressed to units is delivered from the ship at Vladivostok without being redistributed at the main United States Postoffice here.

### WILL RAISE CAPITAL

London, Sept. 8.—A trade development reflecting the extraordinary prosperity of the British shoe industry and calling to mind recent newspaper reports of combinations within the industry forecasting a British monopoly of this business, is the proposal of the British United Shoe Machinery Company to raise its capital to \$6,000,000. Most of the machinery now used in English footwear is purchased from this concern.

### GIRLS TO MARCH WITH OLD UNIT

#### Three Pennsylvanians Will Take Last Hike on Wednesday

New York, Sept. 8.—Three Pennsylvania girls have been especially requested to march with their old unit, the victorious First Division, in its great home coming parade up Fifth avenue Wednesday. They are Miss Mary H. Steen, of Philadelphia; Miss Cassandra Small, of York, and Miss Vivian Aston, of Mansfield, all of them "Regular First Division girls" who, under the sign of the Red Triangle, fed and amused the division throughout its hardest days abroad. As a mark of honor these "veteranettes" of the First are to march with the soldiers in their last hike.

Miss Aston returned to New York last week. She was a teacher of voice at the Pennsylvania State Normal School at Mansfield before she entered the service of the Y. M. C. A. She was especially fitted for Y. M. C. A. work, having done Sunday school, Red Cross and Y. W. C. A. work previously.

Miss Small went abroad in February, 1918, for an indefinite period, but, owing to the death of her brother, she was compelled to return to the United States in September of the same year. After her return she was particularly valuable to the Y in recruiting overseas workers. Miss Steen served the "Y" in Germany.

### Wife Aids Soldier in His Re-Education

#### Washington, Sept. 8.—The Federal Board for Vocational Education attempts to make a man self dependent; but in at least one case it has been found necessary, in order to accomplish this, to get the assistance of the wife of the disabled man. A seaman because of injuries received in service, developed a form of epilepsy. Not able, on account of these seizures to return to his old trade, the Board's officers were at a loss as to how to place him. It was discovered that during his leisure hours at sea, he had learned to embroider and strange as it may seem, enjoyed it. A course in embroidery designing was arranged for him at the Rhode Island School of Design. While the course is given to the disabled soldier, his wife is allowed to attend the lessons, and

### AMERICAN MOBILE Hospital at Budapest For Wounded Soldiers

Bucharest, Sept. 8.—Rumanian and Hungarian wounded in the recent fighting around Budapest have been treated in an American mobile hospital of the most modern type—the last word in war hospitals for use in the field with a rapidly moving army.

The type of mobile hospital being used, is that known as the "autochir." It is a hospital on wheels—eighteen huge automobile trucks equipped with everything needed for war-time medicine and surgery. There are automobile operating rooms, automobile sterilizing equipment, an automobile laboratory, a pure-water machine with ice-making attachment, an X-ray car, electric light plant, steam heating plant, a blacksmith's repair shop and a complete tent hospital which can be set up anywhere in about two hours so as to accommodate more than 400 wounded men.

The hospital is a gift from the American Red Cross to Queen Marie of Rumania. It arrived here about a fortnight ago, and is now being used for the first time under the command of Major J. B. Bayne, of Chicago, a physician attached to the American Red Cross Commission to the Balkans. It was built by the Red Cross for use on the West front, but did not arrive in Europe until after the armistice.

### For Skin Tortures

Don't worry about eczema or other skin troubles. You can have a clear, healthy skin by using Zemo, obtained at any drug store for 35c, or extra large bottle at \$1.00.

Zemo generally removes pimples, blackheads, blotches, eczema and ringworm and makes the skin clear and healthy. Zemo is a clean, penetrating, antiseptic liquid, neither sticky nor greasy and stains nothing. It is easily applied and costs a mere trifle for each application. It is always dependable.

### Potato Disease in Western County

Alarmed by reports of the potato wart disease, which ruined the potato crop in portions of the anthracite coal field, in Cambria county mining regions agents of the State Department of Agriculture's bureau of plant industry, including Government experts, will begin an immediate investigation of the potato crop in Allegheny and other counties in the southwestern bituminous region. For more than a year federal and State experts have been fighting the disease in the lower anthracite field where a laboratory has been established and a quarantine placed on the movement of potatoes from one community to another. Recently reports of the disease came from Cambria county and it is feared that either some infected potatoes from the anthracite district had been bought by store companies from eastern counties or from other States and possibly may be some of those which were imported a long time ago and carried the disease.

W. A. McCubbin, the acting director of the bureau in the absence of Dr. J. F. Sanders, who is studying means of fighting the potato diseases in Great Britain, will direct the southwestern survey with headquarters at Pittsburgh. The inspection will cover Allegheny, Washington, Greene, Westmoreland and Fayette counties, especially the mining districts.

Future steps will be undertaken in connection with the United States Government in case the disease is found.

### Military Training at Lehigh This Fall

Bethlehem, Sept. 8.—Lehigh University will have a unit of the Reserve Officers Training Corps, beginning this fall. President H. S. Drinker, in a letter to students and their parents and guardians announcing the unit, endorses military training as an educational and patriotic movement. Uniforms to be worn at drill only, and all equipment will be supplied by the Government without cost to students. Dr. Drinker states that the military work "will promote rather than interfere with athletics."

### Claims Father Was Soldier in Revolution

Ontario, Calif., Sept. 8.—Francis Lemmon, 86 years old, said to be the only living man whose father was a soldier in the Revolutionary War, has arrived here to make his home with his son. His father, James Lemmon, born in 1762, entered the Continental Army when 16 years old.
