Police Call Attention to Necessity of Observing New Traffic Regulations

Vehicles approaching to the right of any driver shall at all times have priority to proceed.

This point of the city traffic laws, while incorporated in the city ordinance for a considerable period of time, is not generally known to automobilists.

The city ordinance says in part: "and at intervals the vehicle approaching to the right of any driver or operator shall have priority to proceed."

This does not mean, Captain Thompson says, that the driver to the right shall have the privilege to speed ahead at street intersections without regard to other motorists.

Workmen Strike While Police Await Opportunity to Move Into Quarters

A strike will further hold back the entrance of the several divisions of the police department into their new headquarters in the old Fager school building.

Practically the entire force of workmen are now out on strike. Late yesterday the forces of plumbers, paperhangers and carpenters refused to continue work because of the employment by a plumbing contractor of one non-union workman.

Efforts were at first made to have the contractor call off the one non-union workman. No definite results were secured and the workmen picked up their tools and left at various times yesterday.

Today electricians only are working about the building.

Just how long the work will be delayed no person about police station was willing to say to-day. It had been fully expected to have the entire department in their new headquarters by September 15, but this hope was abandoned even before the strike.

The police report that the fire alarm system have already been transferred to the new headquarters.
