

### CASUALTIES GROW AS RIOT CONTINUES

(Continued from First Page.)

Senate Committee which will investigate the strike is preparing for its first meeting to-morrow when John Fitzpatrick, commander-in-chief of the strikers, will be the principal witness. It was reported from Washington to-day that this committee would also investigate charges that secretary Foster has I. W. W. affiliations and that there are more sinister motives involved in the strike than the question of labor unionism.

Rioting and disorder still mark the progress of the struggle, but they are only sporadic. The latest outbreak occurred to-day at Cleveland, where four men were stabbed in a battle between strikers and non-strikers, two probably fatally. At Farrell, where the gravest disturbances to date have been reported, the town executive, Burgess Moody, is under special guard as

Ask for Talcolette TALCUM VIOLET the dainty violet TALCUM POWDER for every toilet use. Talcolette Peroxide Vanishing Cream keeps the skin soft and white at your dealer's.

the result of numerous threats against his life, and the streets are patrolled by large forces of State Troopers and deputy sheriffs.

**Carnegie Encouraged**

"We feel very much encouraged," was the word that came from the Carnegie Steel Company offices a few hours after the day shift went to work in the plants of that company which are in operation. At Clairton, it was given out, more departments were to be placed in operation to-day because of the reporting of additional men. The company had no early reports from the general superintendent at Homestead, but information came to the offices from the main gate where men check in that more workers passed in on the day shift than yesterday.

At Braddock, it was said, more foreign-born workers reported to-day. Duquesne, which all along has been reported as working 100 per cent. by the company, was said to be still operating on the same basis. The city mills of the Carnegie company, it was given out, "look good."

According to officials of the West Penn Steel Company up the Allegheny Valley, an independent concern, over ninety per cent. or more than 700 American-born employees there were at work to-day, while but six foreign-born out of approximately 450 were on duty.

On furnace in the open hearth department of the Allegheny Steel Company in the Allegheny Valley was reported to have started to-day. Practically all the carpenters employed in the mill also reported it was said. The plate mill was also in operation.

**Says Strike Is Spreading**

William Z. Foster, secretary of the steel workers' national committee, did not agree with the reports given out by the Carnegie people.

He reiterated that the strike "was spreading." He predicted that the Homestead plant would be closed down by the end of the week. Mr. Foster, commenting on the claims of the Carnegie interests, said that in the Chicago district the company "know positively that there is a ninety-eight per cent. shutdown there, while the union leaders there 'know positively that there is a ninety-eight per cent. shutdown.'"

"We closed two large independent plants in Pittsburgh to-day," he added. "They were the plants of the A. M. Byers Company and the Oliver & Snyder Steel Company."

**Foster Pleased**

Mr. Foster said that he was highly pleased with the strike progress in this district. At Duquesne and Clairton he said men were continually walking out. He declared that the local steel plants were practically shut down with the exception of the Jones & Laughlin works on the South Side.

The advance guard of a large number of organizers sent into the district by the United Mine Workers' Union began to arrive to-day. They are being assigned to Homestead, Braddock and other large steel towns.

Everything was reported quiet around the plant of the National Tube Company here, when the plant, which closed down last night, did not reopen this morning because of the shortage of men.

**Operate Without Trouble**

The National Tube Company in McKeesport was operating without difficulty to-day, according to an official, while at strike headquarters in McKeesport it was stated that employees of the plant report two blast furnaces banked and that the pipe furnaces had been shut down. The union men claim 2,000 men on strike in the works.

Conflicting claims also continue to come from small independent plants in the Pittsburgh district. Many of them are working, but few of them are reporting to the Carnegie people the best information obtainable.

**Inquiry at the general offices here of the American Steel and Wire Company to-day was announced its plants scattered throughout the Pittsburgh district, elicited this general statement: "Little change in the plants in the outlying district; a change for the better in the Pittsburgh field; Shoenberger works of the company in Pittsburgh working full handed; many men who are returning to work Monday now returning because of assurance of police protection."**

**Plants in Operation**

The coroner here is investigating the death of a watchman early to-day at the Munhall plant of the Carnegie Company. According to officials of the company he had been assigned to guard duty on a motorboat and while stepping from one boat to another his shotgun was accidentally discharged, killing him.

At the offices of the American Steel and Tin Plant Company, another subsidiary of the United States Steel Corporation, it was announced that a telegram had been sent to J. A. Farrell, New York, president of the corporation, that the following plants were in full operation to-day:

Scottsdale, Pa. (two plants); Cambridge, O.; Wellsville, O.; Canal Dover, O.; New Philadelphia, O.; Mount Vernon, Pa.; Chester, W. Va.; McKeesport, Pa.

**Four Stabbed, Two Fatally, in Rioting at Cleveland Plant**

By Associated Press.

Cleveland, Sept. 24.—Four men were stabbed, two probably fatally, and two others were badly beaten near the entrance of the American Steel and Wire Company, Newburg plant, this morning, in the first serious local disorder of the steel strike. The trouble broke out when a street car stopped near the plant to let off men bound for work at the mills.

Among those who got off the car were three negroes. Strike sympathizers sought to stop them from going into the plant, according to the police, and two of the negroes drew knives. A general fight ensued in which many men in the vicinity of the plant joined. When a detail of police reached the scene they found four men had been stabbed, two probably fatally. The negroes returned to the street car for shelter. The car was pursued by hundreds of strike sympathizers and bombarded with bricks and stones and the three men seized and beaten. Police rescued two of them and the third escaped.

**Wheeling Company to Recognize Unions; Mills Will Resume**

By Associated Press.

Martins Ferry, O., Sept. 24.—Signs of a truce in the steel mill operators in this district came yesterday when notices were posted informing striking employees of the Wheeling Iron and Steel Company that its plant would resume operations within a few days under a union agreement.

The company's Wheeling plant at Yorkville, near here, employing 800 persons, is working under an Amalgamated Association of Iron, Steel and Tin Workers' contract. At other furnaces and mills here and at Wheeling, W. Va., employing 3,000 men are idle.

and performed yeoman service throughout the entire time our country was in the struggle. The corps was proud to count among its members some of the most distinguished surgeons of this country, whose reputations were international. The first American unit to go into the line was a medical unit which took the line with the British in May, 1917, and was made up almost exclusively of civilian doctors who had only been commissioned actively for several weeks. Over a thousand of our officers were doing work with the British forces, doing well and bravely. They were unable to supply sufficient officers.

**Good U. S. Record**

Colonel Martin concluded by urging every physician and surgeon to accept a commission in the reserve corps explaining the work which the corps hoped to accomplish.

The Health Commissioner was followed by Colonel Reuben Miller, chief of the Surgeon General's Department. Colonel Miller spoke of the work which the medical department had done and expressed the hope that Colonel Martin's recommendation to the doctors about joining the corps would be followed. He told his audience that at the beginning of the war the German medical staff was able to return 82 per cent. of the wounded men to the line, while the French and British could bring back 32 per cent. because the French were able to bring up their percentage to 82. When the United States took up their part in the war, records showed that they were able to return a total of 82 per cent. of our wounded to the firing line; the best record of any nation in the world.

**How Any Woman Can Remove Hairy Growths**

(Beauty Culture)

It is no longer necessary for a woman to visit a beauty specialist to have superfluous hairs removed, for with the aid of a plain delatone paste, she can, in the privacy of her own home, remove even a stubborn growth in a very few minutes. The paste is made by mixing some water with a little powdered delatone. This is applied to the hairs and after 2 or 3 minutes removed and the skin washed, when it will be left clear and hairless. Be sure you buy real delatone.

port of the provost marshal general showed that the average ratio of the United States of the physically unfit to the total number of registrants was 46.67, the figures were incorrect and were a reflection upon the manhood of the State. He said that in the same report statistics showing the number of men accepted and rejected by every board in detail indicated that the percentage of rejections was only 28.55. This percentage, he said, should not be considered high owing to the regulations as they were then interpreted. Under the first regulations the physicians were very strict. Of 226,115 men drafted only 8,65 per cent. were rejected at camp.

cluded the Section on Medicine, in the ballroom of the Penn-Harris; the Section on Surgery in the House Caucus Room; the Section on Eye, Ear, Nose and Throat Diseases, in the Senate Caucus Room, and the Section on Pediatrics, in Parlor C of the hotel. The ladies are being entertained to-day with luncheon at the Colonial Country Club, after which they are to be taken in machines for a ride through the city parks and finally to the Capitol, which will be inspected.

**Plan Social Events**

This evening the big social event of the convention will take place in the ballroom of the Penn-Harris when the President's Reception will be held.

The general meeting last night was held at 8 o'clock in the ballroom and the feature of the program was an address by Lee K. Frankel, who declared that 40 per cent. of the illness existing to-day can be eliminated and will be within the next decade. Dr. Frankel said that there will no longer be such diseases as scarlet fever, diseases of childhood and numerous other diseases.

Dr. Van Sickle also spoke last evening and stated that the laws of Pennsylvania regarding the practice of medicine were quite inadequate. Under present conditions, he said, it is almost impossible to get any law with respect to the medical profession passed.

At a meeting of the House of Delegates yesterday afternoon proposed revision of the constitution and by-laws was taken up and considered. Several very interesting meetings are promised for to-morrow, the

first taking place in the afternoon when the general public is especially invited to attend. A discussion of the "flu" epidemic of last year and methods to be used to prevent a recurrence of it will be held. In the evening at 8 o'clock there will be

lectures on first aid work with practical demonstrations. Dr. John R. Culp said this morning that nobody should miss these lectures as they are of interest just as much to the public as they are to the medical profession.

**Keeping Fit**

It is because of the war that the perfect physical man has at once become the idol of the world. You can make of yourself, even rather late in life, almost anything you like. You are not going to get fit in one day, one month, or, perhaps, a year, unless you take enough outdoor exercise to keep the circulation going and practice the athlete's first principle—to keep the system clean. He does not give his body a chance to absorb poisons. He not only takes his cold shower, after exercise, but he knows a cleansing of the intestines is important, and he takes occasionally a good regulator and liver cleanser, such as a dose of castor oil, or, what is much better, a tiny pill made up of May-apple, aloin and jalap, and sold by almost all druggists in the land as Dr. Pierce's Pleasant Pellets.

Keep the kidneys in good order also. Avoid too much meat, alcohol or tea. Drink plenty of pure water, preferably hot water, before meals, and drive the uric acid out of the system by taking "Anuric" (anti-uric-acid). This can be obtained at almost any drug store.

Send a bottle of water to the chemist at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and you will receive free medical advice as to whether the kidneys are affected. When your kidneys get sluggish and clog, you suffer from backache, sick-headaches, dizzy spells, or twinges and pains of lumbago, rheumatism or gout; or sleep is disturbed two or three times a night. Take heed, before too late! Get Anuric (anti-uric-acid), for it will put new life into your kidneys and your entire system. Ask your nearest druggist for it or send Dr. Pierce ten cents for trial package of "Anuric."

**When Lafayette Shaved in America**

**WHEN** Lafayette put aside the pomp and ruffles of the French Court, and became a fighter for your liberty and mine, he brought with him his beautifully chased set of razors.

As a soldier, he realized the part they would play in keeping him fit. But after he was wounded at Brandywine, the young general found it was not so easy to shave unaided, for in spite of their sweetness of balance and true French temper, his razors lacked the common sense element of safety. What Lafayette needed was the double-edged, detachable, guarded blade of the
