**MODART CORSETS
Front Laced**

*are an
economical
purchase*

MODART Corsets are constructed of materials that will stand constant laundering without losing their shape. The boning and clasps have a rubberized covering that renders them impervious to water.

These features in the MODART are well worth considering, for many corsets are made with uncovered steels or paper covered ones. Water melts the paper. Some corset cloths are so full of starch and other filling matter that they lose their shape when laundered. Not so with the MODART. It retains its shape until worn out.

To this end every woman should have at least two corsets, for all corsets should be laundered from time to time.

The MODART Corset is essentially a figure-shaping garment. It is beautifully and symmetrically designed to train the figure into lines of beauty and to maintain those lines when once obtained.

MODART prices are moderate considering the value delivered, and the prices range from those for the plainest of cottons to the fanciest of silks.
