Some Corset Truths

for Women to Consider

It is not an easy task to reshape a neglected figure into shapely lines. Neglect or poor corsetry allows little bumps, angles or hollows to mar the figure lines.

To smooth out these inequalities a properly designed corset and the use of proper materials in the corset will re-create the figure.

MODART CORSETS Front Laced

are poise designed. The designer of the MODART Corset makes all MODART Corsets give proper poise to the figure and then designs the corset to symmetrical artistic proportions.

Women with badly poised figures can never be graceful—try as they may. If proper poise is lacking, the grace is lacking, too.

So whether you are tall or short, stout or slender, you can have the carriage that will show your figure and your clothes to the greatest possible advantage if you will adopt the MODART Corset.

We ask you to accept a trial fitting, which costs you nothing, and you will immediately see why social leaders, famous actresses and beautiful women generally wear the MODART.
