

BRITISH WARSHIP MAY BE USELESS

Boat Built to Hunt German Raiders Has Nothing to Do Now

London, Oct. 9.—The first of a new type of British cruiser, the Raleigh, launched a few days ago, is expected to give the navy trouble to find her suitable work.

The Raleigh is of 9,750 tons with a speed of 35 knots. She was designed to hunt raiders such as the Mose and the Wolf. She was given guns larger than the guns usually placed on light cruisers so she might be able to outrange any commerce-raider the enemy might send out. Now that there are no

ALPINE STREAM CAUSES ANXIETY

Geneva, Switzerland, Oct. 9.—Anxiety is felt by the inhabitants of several villages in the Engadine district because of the vagaries of an Alpine stream which has appeared in three different places during the past six weeks and as promptly vanished. The stream after cutting beds near villages disappeared overnight.

In one instance the torrent passed quite close to the tourist resort of Bergun, causing the resort to become deserted. Swiss engineers have traced the source of the stream to Lake Ravoisch but failed in their experiments with cold water to follow it to its discharge.

Inhabitants recollecting the tragedy of 1892 at the health resort of Cerval where a similar stream collecting under a mountain caused terrible landslides, destroying the village, killing and drowning several scores of persons, have appealed to the cantonal government for assistance.

CHILE PLANS TO CUT LIVING COST

South American Government Proposes Adoption of a Gold Standard

Santiago, Chile, Oct. 9.—The Chilean government is endeavoring to relieve the pressure of the high cost of living by stabilizing the rate of exchange. It has proposed the adoption of a gold standard and that Chilean currency should be made convertible at sight. This would be attended by the organization of a central bank to act in the same way as the Federal Reserve Bank of the United States. It is argued that this would put the economical resources of the country on a steady financial basis and eliminate the private speculation in gold which is felt to have much influence on the present exchange rates.

The rise of sterling exchange is attributed in part to an adverse balance of trade against Chile in 1918 to the amount of about \$7,000,000. This difference has to be paid in gold, consequently the peso declines in value. Chileans have been affected by the increased cost of living like the rest of the world and there have been public demonstrations, meetings of labor men and congressional debates on restrictions of exports of foodstuffs and upon providing work for the unemployed.

Nitrates, which is the mainstay of Chilean industry, has been out of the market for several months owing to the slump in the demand resulting from the ending of the war.

Through a recent act of the Legislature, the Bureau of Municipalities was established in the Department of Internal Affairs for the purpose of giving assistance to the municipalities of the State in the various problems connected with them.

Mr. Woodward pointed out that there are in the State many of the smaller municipalities whose public improvements made but whose municipal finances will not permit the employing of an expert to work out the necessary plans.

Mr. Woodward, "understood this condition and to overcome the difficulties the Bureau of Municipalities was established. Expert engineers in the bureau stand ready to offer the necessary assistance and the expense is borne by the State."

PARK MEMORIAL FOR SOLDIERS

Idea Appeared to Be General in the State

Town planning engineers of the municipalities bureau in the Department of Internal Affairs are working over a dozen requests for information from cities and boroughs for data regarding parks and playgrounds.

These requests have been coming in for weeks and Secretary James F. Woodward says that they may mean anything 1920 will be a real pioneer in the way of establishment of parks and similar places.

In a number of instances the municipalities have asked for the services of their planning engineers, for which the last Legislature made provision, and in others information as to cost of maintenance of parks and playgrounds has been requested. Several of the letters said that the parks were to be dedicated as memorials.

"Men's parks and playgrounds," said Secretary Woodward, "will make lasting memorials for the soldiers of the great war and the Bureau of Municipalities is going to exert every effort in assisting towns and communities to commemorate the work of their defenders. It is my impression that the parks being fitted or lasting memorial than a park, playground or recreation center and naturally, too, a memorial which will be a benefit to the health and welfare of the community in which it is established."

German raiders, it is conceded by the navy that she is much in the nature of a white elephant, being too costly for a light cruiser and too light for service with a battle cruiser squadron.

The Raleigh is armed with 7.5-inch guns, provided with an underwater "bulge" which was designed to make her torpedo proof, and is so divided that any two of her main compartments may be flooded without endangering the vessel. She has anti-aircraft guns and burns oil fuel only.

The Man or Woman Who Is About to Invest in Fall Clothing Should Know

that this is 49 years for us to be in the business of clothing families. We have clothed millions of complete families during all this long stretch of years. We have met all sorts of competition—clothing stores come and go like the circus. We have not only held our own but we have forged ahead and actually out-distanced all rivals.

We never had any difficulty in getting business. We're doing the business of our lives right now. But there is just one man and one woman we want to sell a suit to this Fall—the man or woman we have never sold a suit to before.

First, because it is business but chiefly because we're in a position to spring many surprises this Fall. We have the choicest woolsens in the market. There is no workmanship better and we don't ask a dollar more than it costs to buy clothes that can't hold a candle to these. The styles are positively CORRECT.
