Bones of Horse's Leg Offered in Testimony

During the trial of the civil action brought by John C. Witmer, a stock Biscuit wagon, an army automobil dealer, against the Pennsylvania and a motorcycle this morning Railroad Company, the bones of a Harry Houghton, 839 Kelker street,

Railroad Company, the bones of a horse's leg were offered in evidence to show that one of the animals on a car of horses shipped by Mr. Witmer had suffered a fractured leg. The horses were sent from Harrisburg to Herndon, in March, 1917. It was expected that the case would go to the jury during the afternoon session of court.

In courtroom No. 1 to-day before President Judge George Kunkel the suit brought by George M. and Laura Kepford against the Harrisburg Railways Company was on trial. It is alleged that Mrs. Kepford was injured when a brake handle struck her as she was about to step from a car at Fourth and Market street this morning it upset and the driver was thrown out. Neither the driver nor the horse were hurt to any extent and the damage to the wagon was small.

Loco. 112½ 111% Off Wage Conference Bu Associated Press Indianapolis, Oct. 14.-All blame for the breaking of the wage con-ference between the bituminous coal miners and operators of the Central Competitive Field was placed on

the coal operators in a lengthy state-ment of the miners' position, issued to-day at the headquarters here of the United States Mine Workers of America. The joint wage conference met in Buffalo and Philadel-

America. The joint wage conference met in Buffalo and Philadelphia.

The statement declares that the operators "brushed all of our propositions aside as so much chaff," and that "the only thing the operators proposed to the miners in the conference was that the Washington wage agreement be continued in force until March 31, 1920." The miners were forced to reject this proposal, it is stated, because the miners could not make a living under the Washington agreement.

WASHING MACHINES

A Big Variety of Styles and Prices in Standard Makes of Washers

A most profitable household investment, which soon pays for itself.

The family laundry is always a problem when it has to be done by hand. Not only is it a lot of worry, but it means energy wastefully expended. In this assortment of washing machines there are hand power, water power and electric machines, all of which represent labor savers. Moreover, clothes are made clean without damaging them, and in much less time than when washed by hand.

Washer

Special at \$10.98

The O. K. is without doubt the best known rotary washers on the market and is the most successful rotary ever built, all others being more or less patterned after it.

It has a large tub of the best Louisiana red cypress, the inner surface of the tub being corrugated, so as to afford a good rubbing surface. The lid is of double thickurface. The lid is of double thick-ess, and as it fits tight on the tub, revents the escape of steam and ot water and suds do not cool early as quickly as in open mach-nes. The tight fitting lid is there-

The "O. K." Water Power Motor Washer, \$24.98? Roller Gearing Rotary The "Water Oueen" The "Water Queen"

This power machine is equipped with the best cylinder type water power motor made-has no parts to break. It also is equipped with the best rubber hose and brass connections and there are no valves or washers to wear.

The "Water Queen" is a good labor saver, is cheap to operate and has no exposed gears. No wash board is needed as the machine cleans the clothes thor-

The International Electric Bench Washer Here is an excellent electric washer with all of the latest and most desirable features. The tub is made of Louisiana Cypress with corrugated sides and bottom, an outlet at the bottom permits of emptying the tub without tilting. If desired a garden hose may be at-tached permitting the water to be discharged

The frame of the bench is rigid and strong. Made of 1½ inch lumber and firmly bolted to-gether. An extension for the basket slides out of the way when not in use. The wringer is mounted on rods and can be

moved from one tub to another, thus making possible the wringing of clothes without moving a tub. The wringer is electrically operated.

\$85.00

Moderately Priced

This washer gives excellent service and satisfaction. The tub is made of cypress and is fitted with casting of gray iron. The machine is operated by a lever turning back and forth.. A most moderately priced, serviceable washer.

\$7.98

Brammer

Tub made of Louisiana Red Cy-press, grooved and dovetailed. Re-inforced lids. Natural finish. Flat fly wheel permits hand machine to be converted to Belt Power Drive.

\$16.98

"Knoxall"

High Speed Hand Power Washer

The important factor of this washer is the speed which can be obtained. Likewise it is an important one in getting the washing quickly done. The combination upright and pump handle feature enables the operator to obtain the best and quickest

\$16.98

"1900" HIGH SPEED VACUUM WASHER The vacuum principle, combined with the rotary movement. This machine attains at once the ertical vacuum and the spiral rotary movement. The automatic action of the air valve produces the greatest cleansing force which reaches to the bottom of the tub, thus allowing no clothes to escape the cleansing process. The handle is adjustable to suit the convenience of the oper-Standard to suit the convenience of the oper-

This tub operates on the oscillating tub principle—that is back and forth swing of the tub. The hot, soapy water is forced through the clothes, which quickly removes the dirt, but does not injure the clothes. White Cedar and Juniper which out-wears other woods is used in the construction. It also shrinks the least.

Hoops are all round and electrically welded. Further strengthered by having the hoops sunk into the wood.
