

**M. CLEMENCEAU IS SUSTAINED**  
Ministry Is Upheld in Chamber of Deputies by Vote of 324 to 122

Paris, Oct. 16. — The Clemenceau ministry was sustained in the Chamber of Deputies this afternoon by a vote of 324 to 122. The premier thus victoriously emerged from the bitterest and best organized assault which the ministry had ever faced, the Chamber adopting the cabinet's policy on the chronological order of the elections, placing the legislative elections first, on November 16, and the senatorial and municipal elections in that order.

For the first time Aristide Briand, the former premier, came out openly in leading the opposition forces, but M. Clemenceau's majority was the largest he had ever received when the question of confidence was presented.

Preparations had been going on for months for this test of strength, the opposition awaiting the ratification of the Peace Treaty to make a definite onslaught on the ministry.

Premier Clemenceau had a bitter oratorical duel with M. Briand. The result of the vote makes it positive that M. Clemenceau's platform will go before the people, his opponents avowed intention of forcing a postponement of the mandate of the Chamber having failed. In his speech, M. Clemenceau never was in better form.

**State History Week**  
November 9 to 15

Philadelphia, Oct. 16. — The week of November 9 to 15 inclusive is to be State history week.

This was agreed upon at a meeting of the Pennsylvania War History Commission. During this week the people, through their churches and schools and other organizations are requested by the commission to call to mind victories won and sacrifices endured during the war. This will afford the opportunity, the commission says, to complete local honor roles, to gather records relating to war work performed at home and to collect material relating to the great industrial activity of the State during the war.

**PIMPLES**  
How to remove them

You'd give a lot to get rid of those distressing pimples, wouldn't you? For you know how troublesome they are—how they spoil your beauty—how often they prove embarrassing.

Klearskin—a soothing cream, prepared by the physicians of the Klearskin Laboratories, proves effective in the treatment of pimples, blotches and other unsightly facial eruptions. This cream contains a medicament of wonderful value—the water of the sea—and a two-weeks' treatment will demonstrate its merit. Klearskin is harmless, greaseless and does not show on the skin and will not promote hair growth on the face.

Pave the way for better looks. Send for a large sign of Klearskin and Dr. Russell's treatise—"Facial blemishes and their removal." If you will send your name, address and address, we will include a trail package of Intes-tone.

**MAN-HEIL**  
Colds, Catarrh, Asthma, Nose, Throat or Lung Trouble  
**INHALEK**  
QUICKLY RELIEVED

By this wonderful new Discovery and Invention. Gives relief in thousands of cases after other methods fail. Just as pleasant as it is logical, convenient and comfortable. With honest guarantee—if not satisfied money promptly refunded.

For sale at the Gorgas drug stores, 16 North Third street, Harrisburg, Pa., and leading druggists everywhere. Manufactured by Frederick Heilmann Co., Johnstown, Pa.

**Middletown RETURNS HOME FROM PORTUGAL**  
Jacob Houser Was on Boat Struck by German Submarine

Middletown, Pa., Oct. 16.—Jacob Houser, son of Mr. and Mrs. Frank Houser, of South Catherine street, is spending several days in town with his parents. Mr. Houser, who is employed by the Thorlow Croll Steamship Company, of Boston, Mass., and who made a trip to Lisbon, Portugal, taking nearly eight months, returned the early part of this week. Houser will leave on Sunday for New York from where he will start on another trip. He is the youngest man who had quite an experience in April of 1917, when the boat on which he was aboard was hit by a German submarine and he was one of the survivors.

The ship, the Benjamin Saunders, was held from his late home in East Emaus street this afternoon with services at 1:30 o'clock. The Rev. C. McCarrell, pastor of the Presbyterian Church, officiated. Burial was made in the cemetery at Reick's Church, Lancaster county.

The Liberty Fire Company will take part in the welcome home parade to be held at Highspire on Saturday afternoon.

Steve Petrak, who served nine months in the service of Uncle Sam, and was stationed at Camp Meade, Md., and Washington, D. C., and was mustered out of service, May, 1919, has re-enlisted in the infantry service. He left last morning for Fort Bliss, Texas. He was born in Poland, coming to this country when a boy.

Mrs. Florence Saul, who has resided in town for many years, will leave shortly for Pittsburgh where she will make her future home with her nephew, John Watson.

Mrs. A. Quicker, Nisley street, is spending some time at Washington, D. C., as the guest of her son, Major Herbert Quicker and wife.

Mr. and Mrs. Paul Sinker, of Reading, are spending the weekend in town as the guests of the latter's mother, Mrs. Abram Klawansky, of Ann street.

Mrs. William Fink left yesterday for Columbus, Ohio, where she will join her husband.

Mrs. H. C. Boyer and daughter, Grace, of North Spring street, are spending the week at Halifax, with relatives.

Mr. and Mrs. Harry Foreman, of Ann street, announced the birth of a son, Monday, October 13, 1919.

Mr. and Mrs. John Harvey Good, Race street, have announced the birth of a son, Tuesday, October 14, 1919.

M. H. Gingrich, P. P. Ackerman, Ira Springer, W. S. Sides, H. C. Force, school directors of town, and Isaac Coble, William Shoppe, Frank Balbaugh, David Erb, Robert Alleman, of the operators of the township school board, attended the Dauphin county institute at Harrisburg today.

Mr. and Mrs. George Etter announce the birth of a son, Wednesday, October 15, 1919.

Miss Rosa Brink, of Sunbury, and Miss Emma Eves returned home after spending a few days at Philadelphia.

Mrs. J. B. Otto and son have returned to town after spending ten days at Williamsport.

The Boy Scout troop, No. 1, of town, will go to Highspire Saturday where they will join in the parade in the welcome home celebration.

**STEEL DEMAND EXCEEDS SUPPLY**  
Pressure Will Be Needed to Keep Prices From Rising

New York, Oct. 16. — Whether it will be possible to get back into a good swing in a few weeks or a long time will be required, the fact remains that demand will exceed supply and pressure will be needed to keep prices from rising. This statement is made to-day in the issue of the Iron Age, which further states:

"Developments in the strike point out more clearly the success of concentrating efforts on strategic plants, leaving others without any effort to resume, particularly where such might be attended with bloodshed. The leading plants of the Carnegie Steel Company in the Pittsburgh district are at this writing running close to 100 per cent. of capacity, while other plants which were shut down on the first day of the strike are still in that condition with no immediate prospect of activity.

"Buying activity has largely centered in pig iron. Part of this is of emergency sort, spot iron bringing higher prices than for 1920 deliveries. Largest purchases have been in malleable iron, which is relatively scarce. One lot of 10,000 tons for delivery in nine months has sold at prices \$3 and \$4 above recently prevailing levels. Inquiries include two 10,000-ton lots. Heavy export demand for basic iron is now estimated at 75,000 tons, of which the bulk is for Japan. In sympathy with these advances a number of makers have marked up foundry iron \$1 and \$2 per ton.

"A factor in the situation is the uncertainty of future prices with the coal strike impending. Foundry coke, as it is, has stiffened. "Jobbers have generally been having a normal business."

**SOMETHING TO LOOK FORWARD TO**  
[From the Albany Journal]

Some day, when pastebord carriers are substituted for the boxes that are now used to contain soap, there will be a wall from street-corner orators.

**Harrisburg Girls at the Founder's Day Service at Mt. Holyoke**

South Hadley, Mass., Oct. 16. — Three Harrisburg girls took part in the eighty-second annual celebration of the founding of Mount Holyoke College, South Hadley, Mass. Miss Eleanor May and Miss Margaret May, who entered the college as juniors in the fall of 1918, took their places with the seniors in the procession that was held at the grave of Mary Lyon, founder of the girls' seminary which later became Mount Holyoke College. Miss Pauline Kist, of the class of 1922, took part in the singing of the vested choir.

The faculty and seniors in academic dress, followed by the choir and the student body, proceeded to the grave of Mary Lyon, where a short memorial service was held. The president of each class now in college placed wreaths around the grave.

After this a service was held in the chapel at which President Neillson, of Smith College, gave the address. His subject was "Is It a New World?"

Other members of the college whose homes are in Harrisburg are: Miss Sidney McLean, class of 1922; Miss Charlotte Ferguson, 1923, and Miss Virginia Downs, 1923.

**Lutherans Respond to an Appeal From Europe For Clothes**

New York, Oct. 16.—A statement issued from the headquarters of the European relief committee of the National Lutheran Council, to-day indicates the Lutherans of the United States are rallying to the appeal to bring relief to the Lutherans of Eastern Europe, Finland, Poland, Latvia and Estonia especially. The appeal has been made for two thousand tons of clothing and for a million and a half dollars.

It is believed that within a little more than two weeks at least 2,000 tons of clothing will be on the water to bring relief to the Lutherans of Eastern Europe. Clothing is being shipped directly to Danzig. The American ambassador at Warsaw, Hugh Gibson, has assumed responsibility to have it transported into the interior. The distribution will be made through the Lutheran church authorities.

**Backs Up Cooper on Foster Charges**

Youngstown, Ohio, Oct. 16.—In a letter to the Mahoning United Labor Congress, received yesterday, Senator Atlas Pomeroy says he backs Congressman John C. Cooper of this district, in everything Cooper has said against William Z. Foster, head of the steel strike.

**Scientific Discussions**  
by Garrett P. Serviss

"Does an aeroplane violate the law of gravity?" C. T. S. asks. How did you come to imagine that an aeroplane could violate the law of gravitation? You might as well suppose that a bird violates it. Yet, you are evidently by no means singular in entertaining such a notion, for two or three others have asked the same question. It seems plain that this great law is not as familiar to everybody as it ought to be. In fact, however, there are some peculiar things about it, which you could hardly be blamed for not knowing, unless you are a student of physics.

For instance, everybody knows that the force called gravitation, or gravity, makes any heavy object that is unsupported from beneath, fall toward the ground, or toward the center of the earth, which is the focus toward which the force tends. But gravity is supported by a table, or by the ground, or by the air, or by the water, or by the earth, or by the sky, or by the sun, or by the moon, or by the stars, or by the planets, or by the galaxies, or by the universe. In fact, gravity draws upon it just the same, but the body does not move, because the resistance of the table exceeds the gravitational force, and the effect of the latter is felt simply in the form of a steady pressure.

There is here no violation of the law, for the body obeys by pressing upon the table, just as truly as it would obey by falling if the table were taken away. When the body is supported or kept from falling, we call the effect produced upon it by gravity, its weight. But when it falls the effect of gravity is called acceleration. Technically this means the increase of velocity that gravity imparts to the body during each second of its fall. For objects near the earth's surface this increase, or acceleration, is a constant quantity, amounting to about 32 feet per second—per second, i. e., the velocity of a falling body (neglecting air resistance) increases 32 feet every successive second.

In scientific calculations the acceleration of gravity is a thing of immense importance, and scientific men have a short name for it, the letter "g." If you asked a Ph.D. how fast a body would be going after it had fallen one minute he would reply, if he was the right kind of a Ph.D., and was also in a hurry, "Sixty g." From what has been said above, see if you can figure out why that answer is correct—it being understood that atmospheric resistance is neglected.

When an aeroplane is in flight, it obeys the law of gravitation in the

**Forest Rangers Search For Pittsburgh Man Lost in Mountains**

By Associated Press  
Halley, Idaho, Oct. 16.—Forest rangers in this district have been sent out in an endeavor to find Joseph Unger, prominent athlete and hotel man of Pittsburgh, Pa., who has been lost in the Sawtooth mountains, 130 miles north of here since October 9. Unger became separated from his companions on a hunting trip on Flat Creek and despite every effort to find him, no trace has been found. It is understood that he had no provisions at the time he became separated from his friends.

Now, let us see what that other means of support is which enables the aeroplane effectively to rest its weight upon the thin air. It is a force derived from the engines, driving the propellers, and the air, which is blown backward at such speed that the upward component of the air resistance, or air pressure, equals the downward pull of the gravity. The effect may be likened to that of a wind on a kite. The kite would fall in a calm, but the swiftly moving air, driving against its sloping surface, balances the downward effect of its weight, so that it soars in spite of its constant obedience to gravity, which never ceases to impart the downward pull of the gravity.

Here is another curious fact about gravitation. It acts with practical instantaneousness at all distances. If two bodies were suddenly created, one 10,000 miles from the earth and the other 1,000,000 miles, both would be gripped by the earth's attraction at the same instant, although the amount of that attraction would be ten thousand times greater on the nearer than on the distant body. It results from the instantaneous action of gravity that if a projectile is shot straight upward it begins to fall the instant it starts. The incapable "g" has its grasp on it from the very beginning, pulling it back at the rate of 32 feet per second. All that the force derived from the powder is able to do is to start the projectile upward at a greater speed than that and the more the initial upward velocity exceeds "g" the higher the projectile will go. But the velocity of fall due to "g" accumulates 32 more feet every second, so that in a little while it completely overcomes and then reverses the motion of the body, bringing it back to earth.

Use McNeil's Cold Tablets.—Adv.

**TOO LAZY TO WISH**

Two negroes were enjoying a respite, during the noon hour, from their hot task of carrying freight. "Good Lawd, man," sighed one, "I sho wish I wuz up in the cool mountain where der wuz a lake of watah, and I had lots of money and nuffin' to do 'cept eat ice cream, fish and swim aroun' and keep cool all de time."

"An' if you owned dat place would you all invite me to come up and laze aroun' wif you?" asked the other.

"Can't say as how I would."

"But of you jes had a cool lake, couldn't I all come up and swim in it?"

"It ain't saying I would."

"But posin' you all jes' had a lot of ice cream, wouldn't you give me a bite?"

"Say, look hear mas' came the sharp retort. "If you all is too darn lazy to do yer own wishin' foah all dem things, and dem coolin' stimulants, jes' set heah an' wifit."—Columbus Dispatch.

**ETERNAL ANSWER**  
[From the New York Globe]

"Our salmon are sice and fresh, mum."

"Er—have they rose?"

"Well, yes, mum, the price is a bit higher."

**FOUR MILLION BISCUITS A DAY**

Seems like a lot of biscuits - but it doesn't quite meet the demand for Shredded Wheat. We hope to make more as soon as we recover from war conditions. In the meantime be patient with your grocer. We are increasing our output as rapidly as industrial conditions will permit. Shredded Wheat is the same ourishing biscuit you have always bought—the most real food for the least money. For any meal, with sliced bananas, sliced peaches, or other fruits.

**KAUFMANS TOMORROW, KAUFMANS**  
MARKET SQUARE UNDERSELLING STORE Friday October 17th MARKET SQUARE UNDERSELLING STORE

**ALONG WITH THE BIG 14th ANNIVERSARY COMES**  
**A Sale of 257 Pairs of Blankets**  
Bought of the Susquehanna Woolen Mills of New Cumberland, Pa.

Every Price Lower Than Future Prices—All Prices Lower Than Today's Mill Prices

**99 Pairs of 60% Wool Blankets at \$5.94**

Beautiful plaid and plain gray blankets. Every blanket in this lot comes from the Susquehanna mills and contains 60% wool, which assures warmth and wearing qualities, also will not shrink in washing; all full bed size, and are the biggest blanket bargain you ever had the chance of buying. (Only 99 pairs in this lot; first come, first served.)

**158 Pairs of Extra Fine Blankets at \$6.94**

Handsome plaid and plain gray blankets, in red and black, pink, blue and tan, all tasty plaids, good combinations. These blankets are firmly woven, with enough cotton warp to prevent shrinking. They are listed among the very best grades and are being sold at away below value. Don't hesitate, but come early; only 158 pairs.

All were bought at opening mill prices, which were considerably lower than prevailing prices of to-day. You can't make a mistake, but you will save money on every purchase made during this sale.

A Sale That Is of Much Importance to You, Because of the Great Savings It Offers.
