A Quart of Hershey's Ice Cream
For 35c and the Wonderful
Thermopak, } \$1.45
To Carry it Home in }

We are not in the ice cream business and are selling it at practically cost during the demonstration of the Thermopak. The Thermopak is unbreakable, is light and durable.

It is handy to carry, takes up little space, handy for auto parties, as it keeps the edibles in good condition. Will keep hot or cold food or drink and you can enjoy home cooking away from home and save the cost.

The price, \$1.45, is within the reach of all. It does the work of a high-priced vacuum bottle that costs four to five times as much. We have exclusive sale of it.

Is Your House Ready For the New Rugs?

If you are through with housecleaning, perhaps you have found one of the rooms that is badly in need of a new rug to brighten up the room. You know that, even though a room is empty, entirely devoid of furniture or other furnishings, and you spread a beautiful rug on the floor, the room at once presents an appearance of being more than half furnished. Did you ever try it?

It proves without question the important part the rug plays in the proper furnishing of a home. The beautiful designs, rich colorings and soft, luxurious tread seem first essentials when it comes to furnishing a room and first in consideration when it comes to re-furnishing.

Bowman's Rug Department has for years been known for its excellent rug values. We now have in stock many rugs that were purchased months ago. The manufacturers are now getting considerably higher prices than we paid and we will naturally have to pay more for all we secure later. Our present selling prices are based upon the prices we paid and, therefore, in many instances are about equal to the present wholesale prices. So, investigate these values if you need rugs now.

Why Dread Wash Day A Vacuum Electric Washer

removes all worry. No more of that tired feeling at the end of "Blue Monday," no indeed, instead you will feel like going out to spend the evening, in place of staying at home all fatigued as heretofore. All you need do is turn on the current and the washer starts. It relieves you of a lot of work, while the washer is doing the wash you can be doing something else. Come in and see the Easy Vacuum Washer. When the washer is in operation, the two vacuum cups inside the tub move up and down one stroke each second, taking a new position on each downward stroke. The air contained in the cups on the down stroke forces soapy water through the mesh of the garments. While on the up stroke, the cups suck the soap water back through the mesh. This suction carries with it any foreign substances and dirt that might be lodged in the mesh. It does not tear the dainty laces, lingerie, etc. In fact, it preserves them as there is no dragging, rubbing or jerking of the clothes over cleated or corrugated surfaces.
