Dollar Eggs in N. Y.; Strike Is Blamed For Sharp Advance

New York, Oct. 22.—The price of eggs took a few jumps yesterday, in the usual direction—upward. At many retail stores the price a dozen for fresh eggs crossed the dollar mark this morning, and the high level quoted at noon was $1.08. Many cheerful predictions were made by retail dealers that the price for "strictly fresh" would climb to $1.15 before night.

Housewives, foraging this morning for these almost golden luxuries, found that fresh white Leghorn eggs were quoted at 95 cents a dozen wholesale and at $1.05 retail. Most of the retail stores were holding this figure for the best grade. Storage eggs were quoted at 58 cents wholesale and 65 to 70 cents retail, while fresh brown eggs were 71 cents wholesale and 80 cents retail.

Wholesalers attribute the rise to the inability of the American Railway Express Company to move the egg supply, owing to the strike, and they say that the prices will drop when the supply has increased.

Trees create love of country, state, city and home. Be patriotic, plant trees.

Dyspepsia and Home Life

What a Relief When All the Family Eat the Same Foods! Avoid Dyspepsia, Sour Risings, Gas —Indigestion From Breakfast Sausage to Dinner Mince Pie.

After mother has struggled two or three hours over a hot fire to do the cooking for a hungry family, it

To be Free of Indigestion Contributes Wonderfully to the Happiness of Home Life.

is real enjoyment when there isn't a dyspeptic jinx among them. Of course, a case of dyspepsia or daily indigestion must be looked after. But it is far more to the point to prevent as well as to treat sour stomach, belching, water brash, etc., by such a valuable means, as Stuart's Dyspepsia Tablets. Coddling the stomach with soft food and predigested stuff merely invites sluggishness.

Eat your little pork sausages for breakfast without fears; have a plate of beans and a piece of pie with cheese for lunch, and end the day with a real dinner, instead of a bowl of bread and milk. Follow each meal with a Stuart's Dyspepsia Tablet and get right back to your natural self.

These tablets digest food and assist the stomach to prepare the content for assimilation in the intestinal tract. Thus you get the practical relief and help which induces a better appetite and a greater freedom in the selection of foods. You will find Stuart's Dyspepsia Tablets on sale at any drugstore in the United States and Canada, as they are considered one of the stand-bys by the druggist.

ALL THE YEAR ROUND FAMILY MEDICINE

You Must Remember:— that Father John's Medicine is an all-the-year-round tonic flesh-builder and people gain steadily while taking this wholesome food medicine. If you want to gain weight begin taking Father John's Medicine right now. Guaranteed free from alcohol and dangerous drugs.

Proof—Mrs. Lucy Wing of Liberty, Mo., says her run down baby was made fat and healthy by Father John's Medicine.

Scratching is dangerous, stop it with

Resinol

Every time you scratch that itching rash you make it worse. The intense desire to scratch such skin disorders as eczema, humor, nettle rash and like skin ailments, may be instantly relieved when Resinol Ointment is applied to the affected parts.

It is advisable in most cases to thoroughly cleanse the inflamed spot with Resinol Soap and warm water. This accelerates the healing action of the ointment, and consequently quicker and better results are derived.

For sale by all druggists. For free trial write Resinol, Baltimore, Md.

COMES TO RESCUE OF ERZBERGER

Berlin Paper Tells Why the Money Scheme Was Abandoned

Berlin, Oct. 22.—Finance Minister Erzberger has been so assailed since, under fire, he withdrew his plan of calling in all paper money, stamping it, and issuing it again, that the Berlin Political News Agency comes to his rescue with its explanation of why the scheme was abandoned.

The plan, says the news agency, involved the surender of about 40,000,000,000 marks' worth of notes of all denominations, and of course was aimed at luring out of their hiding places the sums that had been saved up and "put into the stocking."

The task of enforcing and conducting the surrender and the physical work of stamping each of several millions or billions of bills meant a great deal of work for which men were not obtainable.

More important perhaps was the further fact that for a quick redistribution of the money a large army of guards would be necessary to escort the new cash to every hamlet and small town in Germany. It would be impossible to send the money in any other way, and even under guard there was danger.

The agency cites the temptation which great masses of money being transported freely about Germany, even under guard, would be to the Sparatcists and the Communists, not to speak of the average German with his greatly decreased morale since the war and the revolution.

The stamping of money and securities therefore can be considered as done away with, says the agency.

Presidents of Three Cossack States Give Dinner to Americans

Ekaterinodar Russia, Oct. 22. — The presidents of the three Cossack states of Terek, Kuban and the Don gave a dinner to Americans who recently brought into the Caucasus three trainloads of 103 freight cars in all of American goods consigned to the Red Cross. Each of the three presidents referred to Russia's ambition to become a federation of states patterned after the American union. "The United States of Russia," was a favorite toast.

The supplies are for the hospitals and asylums to the three Cossack states and for the Volunteer Army.

The territory of the Cossacks, particularly the remote regions among the mountains have been shut off from the world market for the past three years by the Turks on one side and the Bolsheviki on the other.

Finds 40,000 Pounds of Sugar Stored Away

New York, Oct. 22.—Food Administrator Arthur Williams found 40,000 pounds of sugar in an uptown warehouse, which he ordered placed on the market at current rates.

Williams also unearthed two cases of sugar profiteering. One was a case in which retail grocers charged that a wholesaler and retailer had been selling sugar for 20 cents a pound. This grocer, according to complaints, refused to sell sugar to the trade and has been selling it himself in combinaton with other commodities.

The second case was a downtown wholesale house which is charged with having sold 5,000 pounds of sugar to soda water manufacturers in Brooklyn for $1,000, in which a chauffeur was the "go between." In one deal, it was discovered, 500 pounds of sugar were sold for $98.70, and the seller refused to deliver the sugar unless the purchasers took brown sugar in combination. This deal netted the seller 22 cents a pound for the sugar.

British Army Cultivates Soil During the War

London, Oct. 22. — The British army was doing something other than fight in the last year of the war, according to the Army Agricultural Committee report made public to-day. It cultivated 6,658 acres of land in the country occupied by the home forces alone, and made a profit of about $50 an acre.

In France thousands of acres were cultivated by the soldiers, and vegetables worth no less than $2,500,000 were produced.

By irrigation the army in Mesapotamia became self-supporting so far as vegetables were concerned and the grain crop was valued at $15,000,000.

The Saloniki army also was busy cultivating the soil back of its lines and in addition to harvesting crops worth some $300,000 saved 52,000 tons of ships which would otherwise have been used to carry supplies to that faroff front.

Burton Makes Address to Tokio Bankers

Tokio, Oct. 22. — Former United States Senator Theodore E. Burton, of Ohio, told the Japanese financiers in a speech he delivered recently at a banquet tendered to him at the Bankers' Club, that what the United States most desired was that Japan should do everything possible to promote peace among the nations and "avoid that spirit of imperialism which has so disturbed the world.

"What America asks of Japan in the Orient," he added, "is a fair field for competition in trade and no policy of aggression toward other countries. We only ask that no political control or special privileges shall exclude us from entry to the ports and to the trade of the Orient."

Speaking of the future relations of Japan and America, Mr. Burton said, "every interest points to amity, rather than discord."

Fortunes in Furs Brought From North

Nome, Alaska, Oct. 22.—Fortunes in furs were brought out of the far north this summer by the few trading schooners that braved the unusual heavy Arctic Ocean ice and worked their way along the northern rim of the continent to Banks Land and Herschel Island and back again.

Over 2,500 furs were stored on Banks Land alone waiting the boats, according to reports brought here. For two years the ice has prevented boats from reaching the spot and as a result, the trappers on the island have been piling up what Nome men said was the greatest cargo ever brought agound into the Bering Sea.

SAYS VIENNA IS DYING TO MUSIC

Austrian Capital Is Victim of Fast Spenders, Writer Declares

Berlin, Oct. 22.—Vienna, ever a gay city, is now more superficially gay than ever, owing to the illicit traders who have profited by the war and now are spending their ill-gotten gains, writes a newspaper correspondent from the American capital. Vienna, says one of these writers, is "dying to music." He described the people as starved and "morally degenerate." Describing the scenes in the dance halls and pavilions and gambling rooms, the writer says that nearly all the people demonstrate a desperate demand for youth and enjoyment and adds that "this sickly whirl of enjoyment bordering on self-destruction" produces a frightful effect on the sober-minded people of the city.

Public amusements are provided in the Pleasure Park and Schoenbrunn, where are given plays for children, fireworks, alphine dances, Tyrolese clog dances by Berchtesgaden peasants, acts from Iphegenie and band concerts.

One writer says that all of this striving for amusement is only a mask for perplexity and inability to return to older and saner life or evidence of heedlessness and indifference.

MEXICAN BANDIT DEAD

Mexico City, Oct. 22. — Jenaro Amezcua, one of the several men who claimed to be the successor of the bandit Zapata who was recently killed in the state of Morelos, is dead, according to reports reaching the capital. It is said Amezcua was in the village of Santa Maria, state of Morelos, conferring with some of his followers concerning 'a new campaign' when dissension arose and in the gunplay that followed Amezcua was killed.

Beautiful in form and color, trees inspire constant appreciation of nature. Plant them.

SOAP AND WATER CONQUERS TYPHUS

With American Energy, It Is Found to Be the Best Remedy

Belgrade, Serbia, Oct. 22.—American physicians and Red Cross workers conquered the typhus epidemic in Serbia by using soap, scrubbing brushes, kerosene, disinfectants and delousing machines, says Lieutenant Colonel Edgar Erskine, Hume, of Frankfort, Ky., director of the American Red Cross here.

"We went into the homes of people and carried the patients out," said Colonel Hume. "At times they were reluctant to leave and we had a hard task overcoming their fatalism. Often we had to use force. We cleanesd them, scrubbed them and literally turned the hose on them.

"Until an effective serum is found, the most potent agent in combatting the disease is soap and water. Mix this with American energy and enthusiasm and you have a combination that will check, if not overcome, any disease that has its origin in dirt.

Three Boys Start West to Slay a Few Indians

Pittsburgh, Oct. 22. — Tiring of life in the East, where there are no Indians to shoot, three New York newsboys, Frank Cioffi, 11 years old, and his brother, Daniel, and Robert Curtin, 10 years old, decided to go West and become cowboys. They boarded a train for St. Louis at the Pennsylvania station in New York, and secreting themselves under a berth in one of the coaches started on the first leg of their journey to the plains.

This morning a negro porter who was making up the berths discovered them. Their parents have been notified.

The boys said that they had seen "Bill" Hart in the "movies" shooting Indians and that they wanted to try their own hands at the sport.

Many Small Towns in War Zones of France Are "Adopted"

By Associated Press.

London, Oct. 22.—Five hundred small towns and villages in the devasted regions of France have been "adopted" by the British Committee of the French Red Cross Society. The inhabitants of each of these hamlets are being assisted in their struggle to re-establish themselves in their former homes. In many instances they are living in the cellars of their former ruined houses. Other returned refugees have to be content with living under sheets of corrugated iron leaning against a bit of broken wall.

House Cheers Clark as 1920 Candidate

By Associated Press.

Washington, Oct. 22. — Champ Clark was cheered in the House of Representatives yesterday when he indicated he might be a candidate for the Presidency.

Mr. Clark was opposing a provision in the budget bill which retires the director of the budget at 70 years, and was pointing out that many noted men did remarkable work after that age.

"We are now discussing sending a youth of 69 years to the White House," Representative Hulings, of Pennsylvania interrupted him to say, 69 being Mr. Clark's age.

"I'm willing," Mr. Clark replied. The House apparently took it as the throwing of his hat into the ring. Both sides rose and cheered. Then Mr. Clark threw cold water on that view by his remark, saying:

"But I would want to know the identity of this 69-year-old youth," he added.

Hair On Face DeMiracle

Ordinary hair growths on face, neck and arms soon become coarse and bristly when merely removed from the surface of the skin. The only common-sense way to remove objectionable hair is to attack it under the skin. DeMiracle, the original sanitary liquid, does this by absorption.

Only genuine DeMiracle has a money-back guarantee in each package. At toilet counters in 60c, $1 and $2 sizes, or by mail from us in plain wrapper on receipt of price.

FREE book with testimonials of highest authorities, explains what causes hair, why it increases and how DeMiracle devitalizes it, mailed in plain sealed envelope on request. DeMiracle, Park Ave. and 129th St., New York.

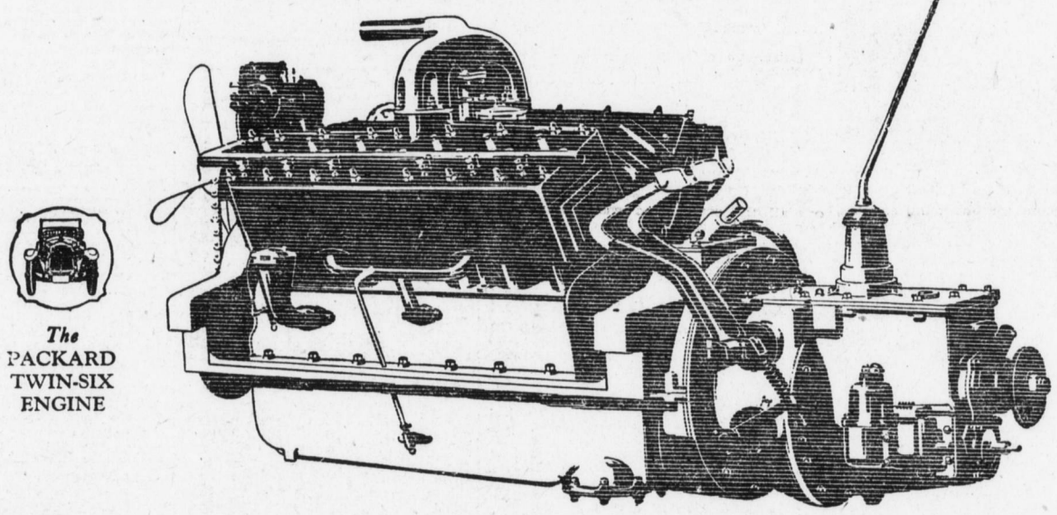
PRODUCTION *of* PACKARD TWIN-SIX *to be Doubled* NEXT YEAR



The PACKARD TWIN-SIX ENGINE

ON September 2nd, 1919, the *twenty-four thousandth* Packard Twin-Six Motor Car was delivered to its owner.

It is worth noting that the engine in this twenty-four thousandth Twin-Six was *practically identical* with the original Twin-Six Engine introduced to the motoring world in June, 1915.

No experienced motorist will miss the importance of this fact—especially when he knows that in doubling our production for 1920 we shall still make *no major change* in the engine.

A basic engineering principle such as the Twin-Six embodies is not come at by chance—nor easily "improved."

The war aviation emergency, the greatest stimulus to motor engineering the world has ever known, confirmed definitely the 12-cylinder "V" type (Twin-Six) motor as a success because never before had flexibility, power and lack of vibration been combined to such a high degree in a single unit.

Most people are used to seeing cars change year after year—reflecting the faults found by owners on the road—or for the sake of "talking" points—or indicating a desire to make the owner buy a new car every season.

Established standards like the Twin-Six motor are certainly necessary—but none too plenty in the automobile business today.

* * *

To the man with a motor problem we have this to say—especially if he has been looking for a motor car which cannot be *wished* out-of-date overnight.

The Packard Twin-Six principle is *Established*—a permanent contribution to the Passenger Transportation service of the world.

* * *

With your experience with the best of other cars fresh in mind—a single drive in the Packard Twin-Six will show you by direct comparison a new standard for acceleration, smoothness, speed, comfort, safety.
