**See the Demonstration of  
Domestic Science Fireless Cookers**

Monday, Tuesday, Wednesday and Thursday  
October 27th, 28th, 29th and 30th

Miss May Alrich, factory expert, will demonstrate how deliciously you can prepare meals or bake bread or cakes, with fuel just enough to heat radiators. After that is done you may go visiting or shopping and return hours later and the meal will be ready to serve. No attention needed for basting, turning or stirring the food. It cannot burn. It retains the flavor in the food to better advantage and several kinds of foods may be cooked without mixing the flavors.

There are certain patented and exclusive features in this Fireless Cookstove not found in any other. The principle of fireless cooking is very simple to understand, but unless the cooker is scientifically constructed, it will not perform efficiently. This is the reason for the Superior Roasting and Baking qualities of the Domestic Science Fireless Cooker.

BOWMAN'S—Fifth Floor, for Fine Furniture.

The Fireless Cookstove saves 25% of the food. Food does not shrink or evaporate when cooked by our Fireless method. It is, therefore, possible to use less expensive meat because of the intensive cooking process, which makes the meat tender, juicy and nutritious. Bakes golden brown loaves of bread, cakes and flaky pie crusts.
