week of November 3. In the procla-mation the burgess refers to such a clean-up as a possible prevention of the repetition of the influenza epidemic which about a year ago was at its height in the borough. It was quite noticeable then that while the epidemic reached into the clean-er sections of the borough, it had its root and growth in those sections of the town which are noted for their filthy condition. The highway department will co-operate with the residents of the borough during the clean-up week and the rubbish removed from the premises will be taken care of im-mediately. During the week follow-ing the clean-up, the police depart-ment will make a thorough investi-gation. All premises not thoroughly cleaned up will be reported to the burgess and action taken.
