The Biscuits Were So Nice and Brown She Thought They Were Painted

Two ladies were admiring the display of Domestic Science Fireless Cookers in our window yesterday. Flaky biscuits with rich brown crusts and golden loaves of bread and delicious looking pies were in the window. One of the ladies said to her friend:

"They are browned with some preparation. You can't tell me they do that in a Fireless Cooker."

But this is not an ordinary Fireless Cooker. There are cookers and cookers, but the Domestic Science Fireless Cooker is really called a "Cookstove," because it does its work as well as a real stove.

See the demonstration all this week while Miss May Alrich is here and avail yourself of the price that now prevails. After this week we are obliged to apply the advance in price according to the new factory list. Different sizes to suit various requirements.
