Brussels Factories, Damaged by Germans, Being Re-Equipped

Brussels, Oct. 29.—All Belgium is returning to work and the country is recovering rapidly from the war. Big Lot of Hay Fever Jokes

But Kentucky Man Says—"People Who Belong to Hay Fever Colony are Kidding Themselves."

Wouldn't Be Any Rose o. Hay Fever if Simple Home Remedy Was Given a Chance.

"Yes, there's a real NINETY-NINE per cent effective remedy for hay or rose fever," frankly states a druggist in a prosperous Kentucky city.

"But I don't expect anyone to believe me, because the treatment is so easy and the cost not worth mentioning."

"The annual crop of hay-fever jokes would be mighty scarce if people would get an ounce of Mentholized Arcline and by just adding water that has been boiled make a pint of liquid that will prove a real help to all who suffer."

"Many of my hay-fever friends tell me that by starting to gargle and sniff or spray the nostrils a few times a day the expected severe attack often fails to appear and in cases where it does show up is very mild and does not annoy."

"The Better Class of Pharmacists" who dispense Mentholized Arcline say it will greatly modify any attack even when taken three or four days after the hostilities begin.

Go to a real live druggist when you get ready to make a pint.

All druggists in this city and vicinity have a supply on hand—sell

has resumed, and steamers loaded with cotton are arriving almost daily. During the German occupation, all copper fittings were removed from the machines in the spinning factories, and some of these have not yet been replaced.

The liner industry also has taken on new life, and additional workers are being employed every week. The export trade in linen is growing just as rapidly as the factories can turn out the finished product. It is in the country districts, however, where one sees the Belgian people at their best. In the vast garden country which stretches from Brussels to the sea scarcely a square foot of ground is left uncultivated. So anxious are the people to produce their own food, and they are working from early morn until late at night to attain that end.

Charges Smuggling Is Rampant in the Occupied Areas

Dusseldorf, Oct. 29.—It is a wonder that the Cologne Cathedral has not been sold in the channels of illicit trade, sarcastically remarks a writer in the Berlin Zeitung Am Mittag, who has just made a trip through the occupied districts and asserts he has seen at first hand the smuggling and tax evasion that go on daily. He estimates that every train into Germany from Frankfurt carries several hundred thousand marks worth of untaxed goods, ranging from tobacco and chocolate to automobiles.

Craiova, Rumania, Oct. 29.—Riding on the roof of a box car through 150 miles of Rumanian mountains, Miss Georgia Watts, of Lexington, Ky., carried a consignment of much-needed medicines and surgical supplies from Bucharest to the American Red Cross hospital here. The outbreak of a sudden epidemic of typhus demanded the immediate receipt of certain supplies which could only be obtained from the American warehouses in Bucharest. Miss Watts offered to make the trip. There was not an inch of space left in any one of the freight cars. Miss Watts, who had carefully packed her supplies in small cases with an eye to some such contingency, obtained the consent of the stationmaster, the crates of medicines were tied to the roof of a box car and Miss Watts mounted to a place beside them, when she clung as the train climbed tortuously up a crooked mountain trail, across many bridges and through numerous tunnels. women smoking but encourage their wives in the practice. "We sell almost as many cigarettes for their women as to men," said one. "Frequently men customers, after buying cigars and tobacco for themselves, ask for cigarettes for their wives."

Clergymen who do not themselves smoke come in and ask for a hundred Turkish cigarettes for their womenfolk. Cigaret smoking has not yet become fashionable among working-class women, but in the middle and

upper classes I imagine that the husband who quarrels with his wife because she smokes must be a rare bird. Use McNeil's Cold Tablets. — Adv.

Large advertisement for Packard Trucks. Section-Header: "Packard Trucks For All-Winter Transportation". Text includes: "No More Guess and Gamble in Trucking Costs—Packard Figures Based Upon Severest Service". "WHAT does it mean when thirty cities report demands for more housing construction and increased industrial building? What does it mean when members of the National Association of Builder's Exchanges promise to 'attempt to carry on building all winter regardless of weather conditions'?" "It means that if demands and plans are carried out, motor trucks must do their bit." "And motor truck users must know how big a bit they can do when cold is extreme and going is hard." "Winter building has always been more or less a gamble with the contractor. A man cannot work a system when the weather deals the cards." "In winters gone by, transportation has fallen down first. Materials were delivered behind schedule or not at all—expensive workmen were forced to slow down—costs were increased accordingly." "Replacement of horses by motor trucks helped to an extent. But reliable figures on winter motor truck performance have been hard to obtain. Consistent figures have been even harder." "Now the gamble is being taken out of winter hauling by Packard transportation figures." "Records of Packard trucks during last winter and the winter before are available." "Many of these trucks did not lose a trip or a minute's time during the winter." "Gasoline and oil consumption and repairs run at the same low average that Packard owners expect to find—" "Average loads were hauled, even where they consisted of cement or gravel or other materials whose weight and bulk increased where wet or frozen." "Trailers and special dumping and loading equipment were kept in use according to schedule." "Packard transportation figures and Packard trucks necessarily go together." "For it is the extra margin of strength and stamina that enables the Packard to meet the emergency when it comes." "And it is that same margin—that extra factor of safety—which has kept Packard trucks in continuous service, some of them over ten years. We have yet to hear of a Packard truck going out of active service."
