Scientific Discussions by Garrett P. Serviss

Why is it that when an aviator goes up 25,000 feet, more or less, he finds the temperature, say, 25 degrees below zero, although on the earth, at the same time, it is probably 90 degrees or more? This, I presume, a good many would like to know.—J. F. M.

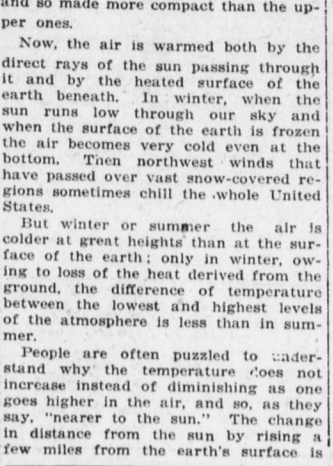

Mine Inspectors Are Asked to Give Strike Data to State Chief

Seward E. Burton, State chief of mines, to-day called upon all mine inspectors to report as soon as possible to him: How many men have struck in the district to which the inspector is assigned; if any of the mines are continuing in operation and the general situation in the district.

Surprise Luncheon For Rotarians on Monday

Rotarians who do not attend the surprise luncheon at the Penn-Harris hotel Monday noon will be sorry they did not. They will be happy if they do, they will have a good time if they do, and they will certainly be "in Dutch" if they remain away.
