Hotels differ quite as much, in character and comfort and atmosphere, as homes do. The man who builds, and furnishes, and decorates, and equips a hotel, selects, by the way he does those things, his public.

The public for which Hotel Pennsylvania was built and is operated is made up of those discriminating travelers who want the best there is when they go to New York.

This largest hotel in the world (2200 rooms, 2200 baths) has many special features which emphasize its thoughtfulness for your comfort. The unique "Butterfly Room" (a glass-enclosed sun-room on the roof) is one of them; the two complete Turkish Bath establishments (one exclusively for women), each having its own swimming pool, are others; the equipment of every bedroom with the "Servidor" (an ingenious device which eliminates contact with servants at your bedroom door) is another. And there are many others which you will quickly appreciate.

In Pennsylvania Station give your bag to a Red-Cap and take elevator to Lobby of Hotel Pennsylvania—without going out-of-doors.
