I appear with his marvelous marke learning what would I ask for?" exclaimed a friend of mine a day or two ago; "Oh, what would I ask for? Why, a worderful coat of natural dark gray squirrel, such as only Louis, the Ladies' Tailor, can make." "Last week," she continued," I was walking by the main entrance of the Capitol when I had a sudden inspiration to cross the street and visit Louis' Shop. And believe me when I tell you that I was more than repaid. Never have I seen fur coats to excel those made by Louis. Of richest beaver and squirrel, he fashions them in patterrs so modish and lovely as to make one hold one's breath." And who can help but agree?

I F you live in a small apartment do you ever find that the afternoons drag? With all your work done, does time sometimes hang heavily on your hands? "Once in a while," you say. Well, why not try embroidering to pass away the lonesome hours? "But I can't embroider; you object. Oh, yes, you can! I hate to disagree, but I know whereof I speak. You can embroider some things, and you can do them well. For instance, take the attractive luncheon sets of urbleached muslin that the Art and Gift Shop, 105 North Second street, is showing. With easy cross stitch design, they can be done most effectively by the most inexperienced person. Not only luncheon sets, but tea cloths with napkins and bedspreads with pillow shams to match are eagerly waiting the few easily-taken stitches to make them things of beauty.

dust," cried the little dollie and rush—they took her off to the hospital before she could say "boo, boo"! Have you ever visited the doll hospital at the Marianne Top Shop on Locust street? No? Well, you have an interesting treat in store. It's really remarkable to see the transformation that takes place in the dilapidated dollies that enter. Some are legless, some are armless and some are even headless. But no matter what the aliment it can be remedied there. New unbreakable heads, bisque heads, or celluioid heads can be obtained with perfect ease to say nothing of eyes, hands and body parts. Restringing loss jointed dollies is a minor operation, only if your dollie is ill, have her admitted at once to avoid the Christmas rush.

W ANDERING carelessly about Saltzgiver's Art and Antique Store today I suddenly stumbled over a heavy object. "Stupid," I said to
myself, "why don't you look where you're walking? What are you
trying to step on now?" Glancing down, I discovered that my foot had
struck a sturdy looking pair of large, iron andirons. "Just the thing I've
been looking for," I triumphantly exclaimed, only I'd prefer them in
prass." "If that's all you want," came the retort, we can easily supply
your needs. We have a number of brass ones, you know." No, I didn't
know anything of the sort, but I was certainly glad to learn it and that's
why I'm passing it on to you. Perhaps you too have been searching for why I'm passing it on to you. Perhaps you too have been searching for

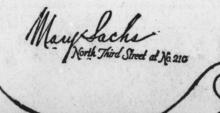

# Can You Tell a Woman What She Doesn't Already Know?

ou can not tell a man what he doesn't already know," Brand Whitlock once remarked. He meant, of course, that one has to grow into knowledge. The average man might spend a year in closest contact with a great seer or philosopher and at the end of it he'd have gained very little. For he'd be unable to grasp and assimilate the words of wisdom uttered,

I sometimes think the same applies to communities. You can not tell a town what it doesn't already know. It has to grow into knowledge and one must be patient.

When I opened my little shop people assumed it was high priced. This was due perhaps to the taste displayed in its decorations and to the style expressed in every line of the merchandise shown. In my advertising I explained that value considered, my prices were extremely low. But for a long time it did not register.

Of late, however, I've received evidence to the effect that Harrisburg has finally learned that mine is a good store in which to save money. It has finally grown into a knowledge of a truth which I'd been proclaiming for months.
