

WOMEN PLAN PEACE WORK

Miss Sarah Hamm Will Make Local Y. W. C. A. Her Headquarters

Philadelphia, Nov. 21.—A number of meetings for the purpose of presenting the world program of the Young Women's Christian Association to groups of women in the East Central field, have been called in Pennsylvania, Delaware and Maryland as a result of the conference in Wernersville last week.

Miss Sarah Hamm will work from the Harrisburg Y. W. C. A. as headquarters, and will touch Dauphin, Lebanon, Lancaster, Adams, Cumberland, Franklin, Perry, Juniata, Huntingdon, Blair and Mifflin counties.

The north central representatives will be Miss Susan Shedd, of Swarthmore, daughter of a Persian missionary, who will make her headquarters at Williamsport, and Cora Potter, of Floga, Bradford, Lycoming, Clinton, Centre, Union, Snyder, Northumberland, Montour, Columbia and Sullivan counties.

Don't Experiment with Catarrh; It Often Leads to Serious Trouble

You Will Never Be Cured by Local Treatment With Sprays

Catarrh is a condition of the blood and cannot be cured by local applications of sprays and douches; this has been proven by the thousands who have vainly resorted to this method of treatment.

Though Catarrh makes its first appearance in the nostrils, throat and air passages, the disease becomes more and more aggravated

NEW DESIGNS IN WOMENS' DRESSES PROMISE TO HAVE AN "APPEALING EFFECT"

New York, Nov. 21.—Styie will be the predominating factor for spring of next year in the women's dress industry, and with a bright outlook for big business, the dress manufacturers throughout the United States are now at work on plans for the new season, which promises to surpass those of previous years from a standpoint of expansion.

An announcement to this effect is made by the Associated Dress Industries of America. Its executive director, David N. Mossesohn, points out that the designers of women's dresses both here and abroad have originated creations for the American woman which promises to have a most appealing effect.

Mr. Mossesohn declares that the models which will be introduced at Palm Beach and other southern resorts will represent the last word in American creative ability, so far as women's apparel is concerned, and embody the most luxurious fabrics that American mills have ever before produced.

"Prices are not coming down," Mr. Mossesohn stated, "and they cannot come down just so long as raw material and labor advance in cost, as they are doing at the present time. Those are not the only items that figure in the increasing cost of wearing apparel." Practically every item that figures in the making of a garment all the way down

the line to the container in which the garments are packed for shipment to the retailer, costs more today than ever before, and so long as this condition exists the women of the country will pay more for their clothing.

In connection with the coming convention of the Associated Dress Industries of America, which takes place in Atlantic City December 2, 3 and 4, announcement was made of the chartering of a special train, which will leave New York Monday afternoon, December 1st, and which will carry the New York delegates to the convention city. The train will be known as the "Associated Dress Special."

SERBIA JUST AS THE WAR LEFT IT

Remains Are Shell-Shattered, Bomb-torn and Desolate

Belgrade, Serbia, Nov. 21.—Belgrade remains to-day as the Germans and Austrians left it—shell-shattered, bomb-torn and desolate. Owing to lack of materials, money and labor, no steps have been taken by the authorities to restore the scores of residences, public buildings and other property that fell under the enemy bombardment. Nothing has been done to repair even the royal palace, which windowless, scarred and neglected, looks like a great empty barrack.

The Serbian capital has a gloomy, depressing air about it, and this atmosphere is shared to some extent by the people, who go about with somber faces. Belgrade never amuses itself. There are a few cafes, restaurants, theaters, cinemas, or places of diversion or entertainment in Belgrade. At night the city has all the stillness and repose of a tomb. It may be, quite naturally, that the country is still mourning its losses, for it has been continuously at war for seven years.

The retail grocers display only scanty stocks. Some of them are entirely bare. Cheap articles of jewelry and tinzel find their way from Austria and Germany, while perfumes, scented soaps and silk stockings come from Paris. Wearing apparel of all kinds is high in price. The Serbian franc has fallen to low purchasing value.

In most war-affected countries, there is a tremendous amount of reconstruction work to be done in Serbia. Broken bridges, shattered railways, ruined factories and destroyed machinery will have to be replaced. Serbians say the material and, to some extent, the money and labor, will have to come from the outside, for Serbia, strained and straitened by seven years of war, is almost destitute of the means to accomplish this task herself. She is looking hopefully to the United States to help her in this direction. There is a constant plea for American engineers, businessmen and materials.

Woman Says Work Will Cut Food Cost

Philadelphia, Nov. 21.—Work, not investigations and inspections, is the solution of the problem of high food prices, in the opinion of Mrs. Frank B. Black, president of the Pennsylvania Society of Farm Women, who glories in the toil, won plenty and independence of the farm.

"After speaking rather depreciatorily of 'research boards' and 'municipal food inspectors,'" Mrs. Black said: "Food is a question of labor and preparedness. Our forefathers knew this, and the old-fashioned storehouse was a part of every home. In it the women placed the labor of their hands, in many foods, preserves of fruits and vegetables in such quantities as kept the family supplied through the winter, while the men added their portion in meats, fresh, salted and smoked (and grain), and the family lived perfectly indifferent to food inspectors, food prices and any of the later-day nuisances."

"So the country people still live in Pennsylvania. All through the summer months the farmer works through the heat and burden of the day, a produce for himself and the public, knowing full well that after seed time and harvest nature throws over the fields her mantle of snow, and production ceases."

The California Launched at Mare Island Yard

Vallejo, Cal., Nov. 21.—The third electrically-driven superdreadnought was added to the United States navy fleet yesterday when the California was launched at the Mare Island navy yard here.

In the use of electricity as a means of propulsion, the new fighting ship follows the example set in the building of the New Mexico and Tennessee.

The California is expected to cost more than \$15,000,000 and will carry twelve 14-inch guns. Besides being electrically driven, the new warship will be electrically operated from her guns to her potato-peeling machine.

Big Russian Guns Saved British Troops From Annihilation

London, Nov. 21.—British officers commanding troops which have since been withdrawn from the Archangel and Murmansk fronts were saved by Russian artilleryfire from annihilation by Russian mutineers at Tulgah shortly before they left Russia. The story has just been told by a special correspondent who was with the British forces in North Russia.

Some of the British were in a hut when they were fired upon by one of the mutineers through an open doorway. The Russian missed and was shot down, his failure revealing plans for a general massacre.

All the wires, except one to a village where loyal Russian artillerymen were stationed, had been cut and the mutineers were preparing to turn machine guns upon the British when the trapped men telephoned the loyal Russians, who began to drop 4.5 shells among the mutineers and the British escaped.

War and Turmoil Cost Russia 35,000,000 Lives

Onsk, Nov. 21.—The Polish professor, A. A. Ossendoffsky, chief of the Intelligence Department of the All-Russian government, estimates that the World War, Bolshevism, Civil War, starvation and disease has cost Russia a total of 35,000,000 lives. He places the cost of Bolshevism at 12,250,000 lives.

Professor Ossendoffsky says that formerly the Russian population increased at the rate of 4 persons a minute. To-day it is decreasing at the rate of 12 to 13 a minute. Use McNeil's Pain Exterminator—Ad
