CABINET HOPES TO DECIDE COAL WAGE ARGUMENT

Palmer Says Fuel Administration May Not Allow Advance in Price

MINING COST IS SHOWN Intimated the Operators Will Have to Bear Any Pay Increases

Washington, Nov. 25.—President Wilson's Cabinet expected to reach a decision to-day on the wage controversy between the bituminous coal miners and operators that would send the miners back to work.

Operators' View Operators construed this statement as in conflict with the contention of Secretary Wilson that miners should be given a thirty-one per cent. wage advance to equalize the margin between present wages and a seventy-nine per cent. rise in living cost since 1914.

Garfield's Principles The five principles announced by Dr. Garfield were: "First—The public must not be asked to pay more than it is now paying for coal unless it is necessary to do so in order to provide reasonable wages to the mine workers and a reasonable profit to the operators."

"Second—The arrangement entered into between the operators, the mine workers and the fuel administration, with the sanction of the President of the United States in October, 1917, was intended to equalize the wages of all classes of mine workers and to be sufficient to cover the average increase in living cost since March 31, 1919; hence the only increase in cost of living which can now be considered is the increase above that provided for by the average increase in 1917; that is to say, the average total increase in pay over the 1913 base, which was the base considered in 1917, should not exceed the average increase in the cost of living over the same base. It is also to be considered that the cost of living will fall rather than rise during the next few years."

"Third—The maximum prices fixed by the government on coal were calculated to increase production of coal for war purposes. Coal was basic and the increase imperative. The public ought not to be asked to pay and will not now pay the increase over normal profits then allowed for the purpose of stimulating production."

"Fourth—Any increases in wages now arrived at on the basis of the foregoing principles should be borne by the operators or the public or both as may be determined by the application of these principles and should take effect as of the date when the men return to work."

"Fifth—The needs of the United States are not alone to be considered; Europe is in desperate need of coal and should have all that we can spare."

CANNOT EXPEL STRIKE-BREAKER, SAYS SCHAFFER

Brings Suit For Charter Forfeiture Against Slovenic Union

Attorney General William I. Schaffer to-day brought action in the Dauphin county court to forfeit the charter of the Slovenic Workmen's Benefit Union of Johnstown, on the ground that it contained a provision in its bylaws which permits the expulsion of any man who becomes a strike breaker.

Is Un-American The bylaw which this beneficial association has adopted is un-American, unjust and outrageous and is prohibited by law, said he. "It means that poor men who have paid their money into this beneficial organization, chartered under the laws of Pennsylvania, cannot be expelled from the organization for no legal cause and all moneys that they have paid into it be forfeited. It is just as though a man had paid premiums on a life insurance policy and because he did not join in a strike his policy would be declared null and void and his payments forfeited."
