## WEST SHORE TOWN PLANS TO EXPAND

### Burgess Hummel Outlines Program by Which Wormleysburg Hopes to Widen Its Territory; New School Building Hoped For With Improvements

Wormleysburg, Pa., Dec. 5.—Extension of the borough limits to include 100 acres of land; the erection of a new school building; the paving of Second street and the purchase of fire apparatus are included in the municipal development program as outlined by Burgess J. Fred Hummel for the next two years. The program for improvements will be presented by the burgesses to the new council next month.

"This borough is unable to expand at the present time because of the fact that it is bounded by the river on one side and the railroad on the other," Burgess Hummel said. "The plan is to extend the limits of town toward West Fairview. The territory now included is the old Haldean farm, which now is being placed in suitable condition for building purposes. Many lots have been sold and several dwellings already have been erected. According to my outline, the borough limits will extend to Haldean street, a territory of about 50 acres. When laid out there will be about 800 building lots. This move would greatly increase the revenue of the borough. It would also provide a new school building within the limits of the borough. Should this territory be taken in Wormleysburg, there would be a river front of more than a mile, the burgesses continued.

"Wormleysburg has long needed an adequate school building. The present structure is out of date. Located as it is along the railroad it is not advisable to make improvements. We have been trying for years to get a new school here and nothing has been done. Personally, I have interviewed a large number of residents and I find that a loan to be used for the erection of a school building would be supported. The chief drawback for this move is that the borough does not have a suitable location within its limits for a building. The present building is located a short distance from the railroad and in the heart of all West Shore street car traffic going to Harrisburg over the Walnut street bridge. We cannot expect to get good results from our school system with building located as our present one is. Extension of the borough limits will enable us to provide adequate school facilities and I have many prominent residents of the borough back of me in this move.

Discussing the paving proposition, Burgess Hummel declared that at least 70 per cent of the property owners of this street favor the move and are willing to pay their pro rata share of the cost. The burgesses said he was going to recommend that Second street be paved from one end to the other. The highway Department a section of the main thoroughfare to West Fairview, and Perry county has been in splendid condition for several years, the street having been built and kept in repair at the expense of the borough and State. Second street is in poor condition and has been for years, the burgesses declared.

Already council has given the fire company \$1,000 toward the purchase of apparatus. According to officials of the company a piece of apparatus costing several thousand dollars will be purchased, the additional money being supplied by the fire company.

Burgess Hummel, who has been mayor of the town for several terms, declared these improvements will either be finished or well under way by the time his present term expires in two years.

Sunbury, Pa., Dec. 5.—Frank and George Wingard, at a hunters' camp in the vicinity of Paddy Mountain, above Milliflunary, were victims of an extraordinary accident on Tuesday, the second day of the season.

Their party had met another crowd of hunters and possibly 30 men were standing in a group, when Frank's gun, falling at his feet, was accidentally discharged.

The bullet cut through the flesh of the instep of his left foot, struck a stone and glanced off, passed through the trouser leg of a hunter standing near, without injuring him, flew past all of the hunters in the party until it reached his brother, George.

The steel jacket of the bullet came loose in the flight, and both packet and leaden missile passed through the calf of George's left leg, causing a double wound and breaking one of the bones in the leg.
