Newspaper Publicity Puts the Plan Across With Big Results

How one bit of newspaper publicity was largely responsible for the direct sale of thirteen fine automobiles should be convincing enough proof for anyone, of the force of the daily newspaper of to-day. The latest person to be convinced is W. M. Philips, dealer for the Franklin

M. Phillips, dealer for the Franklin car at Lexington, Ky.

Recently Mr. Phillips decided he would drive a car from the factory to Lexington. Then he hit upon a novel idea. He invited a Lexington mewspaper man to accompany him as official observer, ran large-sized advertisements in the papers announcing he was to try for an economy record for the 770.3 miles, and started out.

Each day of the run, the newspaper man, as official observer, telegraphed the day's mileage back to Lexington and the newspapers carried the telegram as the report of the day's progress. The series of the day's progress. The series of the cavitation of the cavit

OVER 2,000 CARS APPERSON BROS. STOLEN IN STATE

way Department remarks being 1919 there have been 2,049 automobiles stolen, of which only 272 have been reported as recovered. The automobile code of 1919 provided for reports to the State authorities of all cars stolen and it is estimated here that the value of the stolen cars was approximately \$2,000,000.

Of the cars reported stolen, 1,352 ere taken after the approval of the we law which establishes a penalty \$5,000 and 10 years in jail as the ximum penalty for automobile ft. In addition to the 272 cars with the wind the proof of ownership has not established, soon as a report of a theft of comes here notice is prepared 1 police authorities and for te officials of other states and ay intervals records of sent out. In the part of the part of the police authorities and for te officials of other states and ay intervals records of sent out. In the part of the

as recovered. The automobile code to 1919 provided for reports to the State authorities of all cars stolen and it is estimated here that the value of the stolen cars was approximately \$2,00,009.

Of the cars reported stolen, 1,352 were taken after the approval of the new law which establishes a penalty of \$5,000 and 10 years in jail as the maximum penalty for automobile theft. In addition to the 272 cars reported recovered, the State is holding under advisement 17 cases wherein proof of ownership has not been established.

As soon as a report of a theft of a car comes here notice is prepared for all police authorities and for the state officials of other states and at 15-day intervals records of stolen cars are sent out. In each case the name of the car and the manufacturer's number are given. The Automobile Division keeps two card indexes of each car for which registration is granted. On one of these cards is the engine number and on the other is the manufacturer's number. When application is made for the registration of a machine, a search is made with the idea of learning whether or not a license has already been issued to a car with similar manufacturer's and engine number. This system of checking is celculated to reveal theft.

The bulletin of the Automobile Division also contains a record of cars recovered. The record of November 15 Laows that the thieves, furthing the period covered by that bulletin, stole 93 Ford cars. Other cars stolen were; Briscoe 1, Buick 17, Cadillac 3, Chalmers 2, Chandler 8, Chevrolet 8, Dearborn 1, Dodge 4, Essex 1, Franklin 2, Haynes 1, Hudson 12, Hupmobile 2, Maxwell 3, Mercer 1, Mitchell 1, Marmon 1, National 1, Oakland 1, Oldsmobile 2. Overland 9, Packard 1, Paige 3, Studebaker 1, Stutz 3, Velie 1, Willys-Knight 2. The ratio of stolen cars is practically the same on all bulletins.

Recoveries of stolen cars are made in peculiar manners. For example,

willya-Knight 2. The ratio of stolen cars is practically the same on all bulletins.

Recoveries of stolen cars are made in peculiar manners. For example, in Erie county, last July, an automobile went over the side of a small bridge, demolishing the railing. In making repairs to the bridge, attaches of the State Highway Department found under the timbers a pair of Connecticut licenses. It was recalled by local people that some time previously a car without license tags was found in a field near by. An investigation showed that the Connecticut license belonged to that car and that the machine had been stolen from a man near Boston. This man recovered his car. A Massachusetts man, who recovered a machine through the efforts of the State Highway Department, declared that he had written to nine other Commonwealths regarding his car without receiving a reply.

The bulletin services of the Automobile in the content of the state of the

out receiving a reply.

The bulletin services of the Automobile Division is soon to be extended so that all of the prominen garages in Pennsylvania will receive lists of stolen cars.

SHARE PROFITS

"Mr. Laferty" is one of the Apperson mechanics—and his partnership in the concern is shared by every employe in the plant. A reminder of this partnership basis is put into the weekly pay envelope of every Apperson worker. These reminders are in the form of a message from the company, written on the back of a card that carries a cleverly worded message of homely business philosophy.

Out of the whole series of 52—one for every week in the year—only one has been found on the ground. The men really like them, take them seriously—take them home.

take them seriously—take them home.

This profit-sharing plan has had a remarkable effect on the volume of production and especially on the quality of work. The men realize how much mistakes cost them personally, so they simply don't make them. So from the standpoint of the manufacturer, it has been a successful plan for keeping up and even increasing the Apperson quality.
