

SOVIETS PLAN TO TAKE YUCATAN FOR THEIR OWN

Would Establish Their Government in the Mexican State Unless Halted

Washington, Dec. 10.—A Soviet government is to be established in the State of Yucatan, Mexico, according to Excelsior of Mexico City, December 3, a copy of which is now in Washington.

The Mexican Supreme Court has assumed jurisdiction over the case of American Consul General William O. Jenkins, the State Department was advised yesterday by the American embassy at Mexico City.

The message gave no details other than that the transfer of the case from the Puebla state courts had been made on motion of Jenkins' personal counsel and officials indicated that developments thus far had not been such as to cause any change in the American Government's attitude as outlined in the recent sharp note to Mexico renewing the request for Jenkins' release.

Jenkins was released from the Puebla penitentiary Thursday on 1,000 pesos bond furnished by J. Salter Hansen and the State Department was informed that he had arrived in Mexico City from the United States on Monday.

Letter From the Captor of Jenkins Declares He Desired to Be Kidnaped

San Antonio, Texas, Dec. 16.—El Democrita, a newspaper of Mexico City, a copy of which was received here to-day, prints what purports to be a letter signed by Rebeido Cordova, the man who captured W. O. Jenkins, American consul general at Puebla, in which it is asserted that Jenkins desired to be kidnaped.

There was no kidnapping in the case of Consul Jenkins, because it was his own desire, and he volunteered to come with me. We would not accept the money which some one sent to us. This will prove that it was not a case of kidnapping and holding for reward on my part.

It is believed that the military column of the Telegraph will be a decided success in promoting the military interests of the commune. A unity of thought and purpose will make the Wednesday and Saturday "parades" a success.

News of Interest to Military Men

MILITARY MEN BECOME ACTIVE

Organization of New Guard and American Legion Aided by Veterans

This column will be given over on Wednesday and Saturday to news of the various military societies and organizations of this community. Regular Army, National Guard, Grand Army of the Republic, American Legion, Veterans of Foreign Wars and Spanish-American War Veterans are going to furnish interesting items of local military news.

There has never been a time when local military organizations and societies are as active as they are today. The new Pennsylvania National Guard is being reorganized by live wide-awake young Americans, full of "pep and red blood."

Not only in principles and organized work do the military organizations have much in common but they also believe in good, wholesome social activity. There are planned for this winter many entertainments, smokers and dances.

Railroad Construction Shows Enormous Increase

Between 1890 and the end of 1917 there were constructed in this country about 100,000 miles of steam railroads, bringing the total to 260,000 miles. This was an increase of about 65 per cent in 27 years and an average of a little less than 4,000 miles per year.

It is believed that the military column of the Telegraph will be a decided success in promoting the military interests of the commune.

ASK DISSOLUTION OF MONOPOLIES

Liberals Score Political Parties Then Take Step Designed to Eradicate Poverty

St. Louis, Dec. 10.—Dissolution of monopolies is the only solution of the economic and industrial problems facing the nation, according to the report of the program committee, submitted to-day to the National Conference of Liberals in session here.

The committee said its report was designed to eradicate "poverty and squalidness."

The two principal political parties are arraigned and while it was said the committee would not form a new political party, the report declares that the "growing control of basic resources and industries by the trusts has created the conviction that no relief can be secured except by the formation of a new party."

Under public ownership of railroads this particular alleged monopoly would be broken and freight rates would be distributed evenly among all industries, the report says, and to break up the alleged patent monopoly it was suggested that all patents be open to use, by anybody, by paying the owner of a royalty to be fixed by the government.
