AURAND'S Great Sale of Books Continues

The special display and sale of choice new and second-hand books which started last week has proved a triumphant success.

All evidence of the sales of one day is removed the following morning, every empty space on the shelves and tables being replenished from our enormous reserve stock.

It will be the end of December, at least, before this, our greatest offering, shows signs of reaching an end.

Over 25,000 new, old and rare books on every subject, from 5c up.

Come in and enjoy the display. It is a liberal education to look over these greatest of the world's great books. No one will ask you to buy.

RAILROAD NEWS

WILL AWARD TWO SCHOLARSHIPS

Chance For Sons of Penny Employes; Frank Thompson Fund

Notices calling attention to the Thomson Scholarship, as being circulated among all employes of the Pennsylvania Railroad system. The fund was established by the children of the late Frank Thomson, formerly president of the Pennsylvania Railroad Company, in memory of his father.

The terms of the trust provide for eight scholarships for a period of four years each. These amount to \$500 each year, which sum is paid to the holders in equal quarterly installments. To fill the vacancies, the Pennsylvania Railroad Company has awarded in 1919 two new scholarships which will be awarded for the year beginning with the 1920-21 school year.

The school is awarded on competitive examinations conducted by the college entrance examinations board of the Pennsylvania Railroad Eastern Lines, these examinations, which will be held in June, 1920, are open to the sons of living or deceased employes of the Pennsylvania Railroad Company. Particular attention is directed to the fact that applicants already in college are not precluded from competing for the scholarships.

INCREASE PRECAUTION IS NECESSARY ON RAILROAD

"In most parts of the country the track is going into the winter saturated with water from the recent general rains," says the "Railway Age," editorially. "This will lead to more than the usual amount of heavy and rough track, particularly since less than the normal amount of ditching and other drainage work has been done during the last three or four years. This condition is arising at a time when the track structure itself has been weakened by inadequate renewals of rails, ties and ballast. It is now too late to make amends for the deficiencies of the past. The problem is to see that sufficient supervising and inspection are provided to detect and correct any weaknesses promptly, and before they become serious. This will call for added care by all responsible for the safety of the track."
