The cause of Common School Education is an important one. The teacher's vocation is noble, and his responsibility is great. But, to be a Director, is also honorable, and his responsibility is great. Why is it, then, that our county is not advancing, in this respect with some other counties? Is it not because our Directors do not perform their full duty as they ought? Why do they not visit their schools frequently, or at least once every month, to see what their children are doing? Why do they not manifest more interest in the welfare of their immortal little ones? Why do they not talk about Education at home, every day?

It is sincerely to be hoped that the common schools of Union county will soon present to view a different appearance. They will appear in a more favorable Thos.
