THE PARTY OF THE P Early Vegetables.

Many farmers are deterred from attempting to produce very early vegetables, by an erroneous idea that the making of a hot-bed is a complicated and difficult operation, while it is just as simple as making a hill of corn. Every man who has a garden of whatever size, if he will once try the experiment of making a hot-bed, will, we venture to predict, find the task speasy, and the result so satisfactory, that he will never forego the luxury afterwards. All that is necessary, is to make a pile of horse manure, two and a half feet deep, with the top level or sloping a little to the south, then set a rough frame made of four boards nailed together at the corners upon the bed of manure, fill the frame with six inches of garden soil and cover with a window of glass. Any old window will answer the purpose, but it is better to have the bars of the sash run only one way, and to have the glass laid in the manner of shingles.

The best plants to force are tomatoes and cabbages, which may be transplanted from the hot-bed to the open ground without any trouble. We have removed tomatoes when they were in blossom, and had them all alive. If molons or cucumbers are forced, they should be planted in flowering-pais, and in transplanting them you turn the pot over upon your open hand and give it a gentle thump, when the earth comes out in a solid lump, and the roots are not disturbed in the least. When the plants are growing, they should be watered frequently, and in warm days the sash should be raised a few inches to give the plants sir. We have found the growing of plants under glass, from a small botbed, four feet by six, up to a large grapery for raising the black Hamburg and Prontigues grapes, the most satisfactory of all horticultural operations. Having the control of the climate both in heat and maisture, the plants can be made to grow with a vigor which they rarely if ever exhibit in the open air. A hot-bed should be made from four to six weeks before the time for planting corn .- Scien-

tific American. a parallel record? The Oligarchs in Montgomery, Alabama, are engaged in the laudable business of burning every copy of Spurgeon's sermons they can lay their hands on. They have decreed the burning of all copies that may be found in the bookstores and in private houses, and advertize the affair to come off in the jail yard in about a week.
