Just Appreciation.

A committee of the Methodist General Conference, sitting in Philadelphia, called upon President Lincoln, and delivered an address to him approving his devotion to the perpetuity of the government. Mr. Lincoln replied as follows:

"Gentlemen: In response to your address, allow me to attest the accuracy of its historical statement, endorse the sentiments it expresses, and thank you, in the nation's name, for the sure promise it gives. Nobly sustained, as the Government has been by all the churches, I would utter nothing which might in the least appear invidious against any. Yet, without this, it may fairly be said that the Methodist Episcopal Church, not less devoted than the best, is, by its greatest numbers, the most important of all. It is no fault in others that the Methodist church sends more soldiers to the field, more nurses to the hospitals, and more prayers to Heaven than any. God bless the Methodist church! bless all the churches! and blessed be God, who, in this great trial, giveth us the churches !"

DR. WISHART'S PINE TREE TAR CORDIAL

S the vital principle of the Pine Tree-obtained by a peculiar process in the distillation of the Tar by which its highest medicinal properties are retained. It is the medicine that cures when all others fail.

Have you a Cough? Have you Sore Throat? Have you any of the premonitory symptoms of that most fatal disease—tonumptom? Those who should be warned by these symptoms generally think lightly of them until it is too iste. From this fact, perhaps more than any other, arises the sail prevaience and fatality of disease which aweeps to the grave at least one such of lightly of disease which aweeps to the

prevalence and fatality of discase which sweeps to the grave at least one arch of death's victims.

What are its symptoms?

It is usually begins with a short, dry cough, which soon becomes habitual, but for some time nothing is raised except a freshy macus. The breathing is somewhat differed and upon slight exercise much farried. A sense of lightness and oppression at the chest is often feit. As the discase advances, the patients becomes thin in flesh, is afflected with loss of appetite, great langer, indoluce, and dejection of spirits; may continue in this state for a considerable length of time; and is very readily affected by slight exposure or fatigue. If these occur, the cough becomes more troublescene, and is attended with expectoration, which is must copious and free early in the morning. It is sometimes streaked with block. At this stage, night-sweats usually set in and in some cases a profuse bleeding of the lungs may also occur. Pain in some part of the chest is felt, and often a difficulty of lying upon one or the other elde without severates of coughing or a sense of fullness or suffocation. The pulse becomes full, hard, and frequent, the heetic flush tings the chocks, and the dire mainly is fast hastening to its close.
