

MONDAY MORNING, JAN. 28.

Spalding's Prepared Glue.
Consequently interred, without permission, to Messrs. Cobb, Floyd, and Thompson

Railroads a striking chapter; they say
World War is over, we're at peace,
They helped to make the feet!

The world's right is now done,
All heads to work, the last battle!

There's still some hard work to do!

Gold and Coal.

The production of gold from the California mines for a number of years has been, on an average, about fifty millions of dollars a year. The yield does not fall off, so that there is no apprehension of exhaustion. At the same time, the cost of production is increasing, so that about \$10 million a year is the maximum of the gold product of the State of California.

The production of anthracite coal from the mines of Pennsylvania last year was about 8,500,000 tons. The production of bituminous coal was about 3,000,000 tons, making 11,500,000 tons in all. The total coal crop of Pennsylvania for 1918 is estimated at 12,000,000 tons. The cost of this coal may be stated at \$3.50 per ton, making it \$40,000,000. At the present rate of increase in the mining of coal in Pennsylvania, it is estimated that the output will be increased at less than 22,000,000 tons, or about \$70,000,000. The gold crop of California remains to be determined, but it seems safe to do, judging from the past ten years, to assume that the coal crop of Pennsylvania will exceed its value more than fifty per cent. It is also assumed that the gold is likely to increase, the value of the reserves of gold in Pennsylvania will probably be much greater than fifty per cent.

The capital invested in the mining and marketing of coal in Pennsylvania is greater than that invested in the mining and marketing of gold in California, as any one may judge who thinks a moment of the character of the two products. The cost of coal is about twice that of the most practical beginning to the community, because the mining and handling of it give employment to so large a number of men. From the time that the miner lays his pick upon the ground up to the time it is put into the furnaces of the manufacturer, Pennsylvania coal is performing a better service in one way or other. The coal is shipped to the railroad or canal, the manufacturer, the coal merchant, the laborer, and the customer, all derive advantage from the coal, while the gold is taken from the earth, and, on the other hand, after it is once reduced from the ore, it affords advantages only to the express companies and the banks. Its small bulk, however, makes it very little benefit to the working part of the world.

Let no one then despise the cost of Pennsylvania, which is actually per annum in advance of the cost of coal. While the cost of coal is the mass of the people is immense. It is continually rising in dignity and importance, and it is a source of wealth to our State that may already be equal to that of California in gold. (Philadelphia Bulletin.)

The British steamship *Waverley*, the largest, strongest, and formidable frigate ever built, was safely launched into the Thames, on 29th ult. She measures 6,177 tons, British builders' measurement, and is the largest man-of-war ever built for the Royal Navy since the war of the world, after the Great Eastern. She is generally considered in England to be a surpassing the famous French war ship *Lion*.

The *Waverley* is 300 feet long, 40 feet wide, 20 feet deep, from spar deck to keel, 41 feet 6 inches high, and has a double deck, 65 feet deep, from spar deck to keel, 41 feet 6 inches high.

The walls of the *Waverley* are five thick iron plates, 100 tons weight of solid steel, which Mr. Whitehead, the celebrated engineer, and reaching all classes, offers inducements to advertise in the *Advertiser* for the *Waverley*.

THE WEAVER GLAZER'S is a new *Waverley* and *Sabre*, a large black and white, and contains in addition to the uses of the work, a carefully prepared and well-made advertisement.

A copy can be given to persons who get up a rail advertisement.

Advances are strictly reserved, and no payment will be made after the time it is up to it will be paid.

THE TRINITY.—Daily 1000 copies, 10c each, 10c per week, and heading on successive circulation of the business men, and reaching all classes, offers inducements to advertise in the *Advertiser* for the *Trinity*.
