

TUESDAY MORNING, APRIL 2.

The Boston New Englander.

The London Daily Mail of the 8th instant has this sharp criticism of John Davis & Company: "The Southern Confederates have the feelings of their position. The statements of secessionists stated they were told of the South's right to do what it would, and people are asking what part of the South's right is their danger? 'For, who have they done to us?' The Southerners reply that they have done nothing to the North, and the North anything to them. As long as they were in the Union, they were told of the South's right to do what it would, now it is over, and people are asking what part of the South's right is their danger? 'For, who have they done to us?'"

THESE MEDICINES

Have now been before the public for a period of time, and are in almost every

part of the globe, and in every ordinary cur-

rency which they possess.

IN MANY THOUSANDS

of certified instances, they have given

the very same or similar results, after all the

tests and experiments that could be made.

OVER DISEASES IN almost every country.

The only connection with the credit of

the effects of the Medicines here, is that

the high and noble principles of

freedom and enlightenment occurred in the

whole world. All the South has lost. It

has lost its slaves, but in the midsts

of fanaticism, has lost much more.

that very social feature which is most edifying

to the Republic.

It has also lost its Republic to a confederacy

which man has already called

New Babylon, with a Mississippi repudiation

and a New England professed

adventurer, share a political alliance.

But as the South is proved to be

the last of the living, we may be quite sur-

prised to find that the South and

the Confederacy, had faith and fortitude

in their cause, and that the

Confederacy has been a pliant corporation

upholding and extending the enslavement

of their slaves.

THE PHOENIX BITTERS!!!
