Scrofula, or king's LVII, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitnated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is varioually caused by mercutial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the veneral infaction. What-ever be its origin it is hereditary in the con-stitution, descending " from parents to children unto the third and fourth generation," indeed, it scens to be the rod of Him who says, "I will visit the inquities of the fathers upon their children."
